Yes	Excellent	Strongly Agree	Strongly Agree	Yes

**Comments**

Yes slightly just getting to grips with how much information should be given in each section of the bidding process	Informative, well paced and pitched for an overview and general understanding.	Be glad to receive a copy		Training that would be useful in how to go about writing up the bidding process
Gain and learning more knowledge	It was very straight forward and easy to follow			Perhaps around evaluation
I would previously not have considered applying for a public sector contract , even though we, as an organisation are looking to deliver services on behalf of a statutory body. This training has given me the confidence to engage in the process				I'll access the development support intimated during the training
				As my organisation looks towards taking over the services delivered by a statutory body it is good to have the skills to engage in the process
