# 1. INTRODUCTION, BACKGROUND AND OBJECTIVES

## 1.1 Background

This report presents the findings of a survey of residents of Argyll and Bute on their housing need and demand. The survey was undertaken by Research Resource from July to September 2019 in order to collate data which will allow Argyll and Bute Council to update their assessment of housing need.

The purpose of this project was to identify housing need and demand within eight sub-areas (housing market areas) of Argyll and Bute. These sub-areas include Bute, Coll & Tiree, Cowal, Islay, Jura and Colonsay, Kintyre, Mid Argyll, Mull & Iona and Lorn. Argyll and Bute Council commissioned Research Resource to carry out this survey to provide sufficient disaggregated data to inform a robust and credible Housing Need and Development Assessment for the authority.

## 1.2 Methodology and Sample Size

A total of 2,651 interviews were carried out with a sample of Argyll and Bute residents. Argyll and Bute has a population of 34,477 households, excluding second and holiday homes. Helensburgh and Lomond was excluded from this survey as a separate survey was carried out in this area in 2018. A sample of 2,651 households therefore provides data accurate to +/-1.8% (based upon a 95% confidence level at the 50% estimate).

In order to allow analysis within sub housing market areas, with confidence, a confidence level of approximately +/-5% was achieved within each Argyll and Bute sub-area, with the exception of Coll & Tiree where a confidence level of +/-6% was achieved. As Coll & Tiree has a very small population, a high proportion of interviews were required to achieve a data accuracy level of +/-5% which unfortunately was not possible. However, this study provides robust data at the overall Argyll and Bute level to +/-2%.

Housing Market Area	Household population (from CTR excl second and holiday homes)	No of interviews	Data Accuracy (+/-%)
Bute	4352	348	5.04%
Cowal	8102	367	5.00%
Kintyre	4096	345	5.05%
Lorn	8197	374	4.95%
Mid Argyll	5278	355	5.02%
Islay, Jura and Colonsay	1930	363	4.64%
Mull & Iona	1837	306	5.12%
Coll & Tiree	685	193	5.98%
Total	34,477	2,651	1.83%

Surveys were undertaken using a combination of face-to-face interviews and telephone interviews. Telephone interviews were primarily used on the islands while face-to-face interviews were carried out on the mainland. The surveys were carried out using a phased approach, covering area by area.

Households were selected for interview, at random, from the Council Tax Register. Furthermore, the survey was promoted by Argyll and Bute Council through a press release and residents were given the opportunity to contact Research Resource and request to be included in the survey.

Given the requirement to update the data held on housing need, the questionnaire followed the same methodology and core questions used in previous similar projects undertaken in Helensburgh and Lomond in 2018 and Mull & Iona in 2013. These questionnaires were reviewed and slightly updated to reflect current circumstances and the fact that the study was now concerned with eight sub-areas of Argyll and Bute. A copy of the final questionnaire used is available in Appendix 1.

### 1.3 Understanding Sampling Error

As stated, 2,651 interviews provides data accurate to +/-2% at the overall Argyll and Bute level. At the sub area level, data is accurate to +/-5% (and +/-6% for Mull and Iona).

The level of accuracy cited above is known as the 'sampling error'. The results of a survey based on a sample will not necessarily coincide with the exact results that would have been obtained by a full scale study of the total population. Some error (known as sampling error) may have arisen simply because not everyone will have been included in the sample.

The aim of calculating sampling errors is to indicate the confidence which you can have in a particular result. Thus, if we find that 50% of the sample behave in a certain way, the key question is the extent to which this percentage may differ from the true population proportion simply because our results are based only on a sample. The sampling error allows you to say, for example, that the true range is likely to fall within the range of, for example 45% and 55%. This is expressed in the form  $\pm 5\%$ . We always work on a 50% estimate (i.e. assuming that 50% of respondents answer in a particular way) as this essentially represents the worst case scenario in terms of the estimates. The table below indicates the difference in terms of varying estimates for different sample sizes.

Sample size (n=100%)	Estimate									
	5% or 95%	10% or 90%	15% or 85%	20% or 80%	25% or 75%	30% or 70%	35% or 65%	40% or 60%	45% or 55%	50%
	<b>percentage points ( + / - )</b>									
<b>100</b>	5.1	7.1	8.4	9.4	10.2	10.8	11.2	11.5	11.7	11.8
<b>200</b>	3.6	5.0	5.9	6.7	7.2	7.6	7.9	8.1	8.3	8.3
<b>300</b>	3.0	4.1	4.8	5.4	5.9	6.2	6.5	6.7	6.8	6.8

## 1.4 Data coding and input

Research Resource operates to stringent quality control procedures and are accredited to ISO20252 and are MRS Company Partners. Upon completion, all questionnaires were edited to ensure that they have been answered in a way that is consistent with the questionnaire design.

Once quality control was complete, questionnaires were all entered into a specially devised data entry programme set up utilising SNAP survey software. The programme included route, range and logic checks at the time of data entry to ensure that the data was valid.

As a further quality check, 10% of each data entry person's work was verified for quality control purposes. This is done by undertaking 'double data entry'. Where any problems are highlighted, i.e. where the error rate exceeds 10%, that individual's work shall be 100% verified/ re-worked. If necessary, appropriate retraining shall be given to that operator.

A second-stage cleaning process was conducted after all the data had been entered. This involved examining frequency counts for all variables and checking extreme values. Where any erroneous data is highlighted this is double checked and either amended if incorrectly entered or verified as being correct.

## 1.5 Weighting survey data

Once all data was input and quality checked, data was weighted prior to undertaking analysis. Weighting is undertaken due to the fact that the survey data is based upon a sample as opposed to a Census of the population. Sampling is used to make inferences about a population from a relatively small number of observations that are assumed to be representative of the population. Sampling works because:

- It is not necessary to collect data from all people in order to generate statistics about that population.
- After a certain sample size, there is no need to collect more data. The extra data does not improve the accuracy of the estimate to any great extent.

The weights used for the Argyll and Bute Housing Needs and Demand Survey were agreed with the Council, subsequent to data validity checks comparing the profile of survey respondents against the projected population estimates.

Weighting was undertaken to account for a disproportionate approach to sampling within each housing market area, and also to 'gross up' the survey estimates in a way that allows us to project the level of housing need at the Argyll and Bute level. We address this by applying weights which will adjust the balance of the survey data to published numbers of households for each housing market area.

In addition to the known disproportionate sampling approach by Housing Market Area, our analysis of the respondent profile compared to the profile of population illustrated that private rented households and social rented households were slightly under weighted in relation to the population and that owner-occupiers were slightly over represented.

The table below shows the distribution of respondents by tenure compared to the overall Argyll and Bute population.

Tenure	Population	% of population	No of interviews	% of interviews	Difference
Owner-occupier	24211	70.2%	1945	73.6%	3.4%
Private rented sector	3373	9.8%	223	8.4%	-1.3%
Registered social landlord	6893	20.0%	474	17.9%	-2.1%
Total	34477	100.0%	2642	100.0%	0.0%

We therefore weighted on the basis of tenure also to address this imbalance, at the same time as grossing up the responses to represent the full population of Argyll and Bute. While 2,651 interviews were carried out, tenure data was not available for 9 of these households meaning they could not be included in the weighted analysis. Throughout this report the total unweighted base for all households is therefore 2,642. The table below shows the number of interviews per area and tenure, along with the Argyll and Bute population and then the weight that was applied to each of these factors.

Area and Tenure	Tenure	Interviews	Weighting
Bute Owner Occ	2861	231	12.38528
Bute PRS	432	32	13.50000
Bute SL	1059	85	12.45882
Coll & Tiree Owner Occ	636	167	3.80838
Coll & Tiree PRS	26	13	2.00000
Coll & Tiree RSL	23	12	1.91667
Cowal Owner Occ	5817	281	20.70107
Cowal PRS	773	22	35.13636
Cowal RSL	1512	62	24.38710
Islay, Jura, Colonsay Owner Occ	1298	274	4.73723
Islay, Jura, Colonsay PRS	166	33	5.03030
Islay, Jura, Colonsay RSL	466	56	8.32143
Kintyre Owner Occ	2697	225	11.98667
Kintyre PRS	320	23	13.91304
Kintyre RSL	1079	96	11.23958
Mid Argyll Owner Occ	3741	254	14.72835
Mid Argyll PRS	554	34	16.29412
Mid Argyll RSL	983	65	15.12308
Mull & Iona Owner Occ	1437	251	5.72510
Mull & Iona PRS	198	22	9.00000
Mull & Iona RSL	202	32	6.31250
Lorn Owner Occ	5724	262	21.84733
Lorn PRS	904	44	20.54545
Lorn RSL	1569	66	23.77273

In a weighted data set each individual is assigned a weighting factor. In an unweighted table, each respondent or case is represented as a count of the base. Once you weight the data, by applying weighting factors, some respondents will now be counted as a value slightly more than one, and others slightly less than one. Those groups that were previously under represented, will have their weighed base increased because their weighting factors will be more than one. Conversely respondents belonging to groups that were over represented will see their weighted base go down, because their weighting factors will be less than one.

## **1.6 Reporting and Interpretation**

In reading this report, a number of points should be noted that the findings are based upon a sample of residents, rather than the whole population of Argyll and Bute being interviewed, therefore, all results are subject to sampling tolerances and not all differences will be statistically significant.

When reporting the data in this document, in general, percentages in tables have been rounded to the nearest whole number. Responses greater than 0% but less than 0.5% are shown as 0% and responses between 0.5% and less than 1% are rounded to 1%. Columns may not add to 100% because of rounding or where multiple responses to a question are possible.

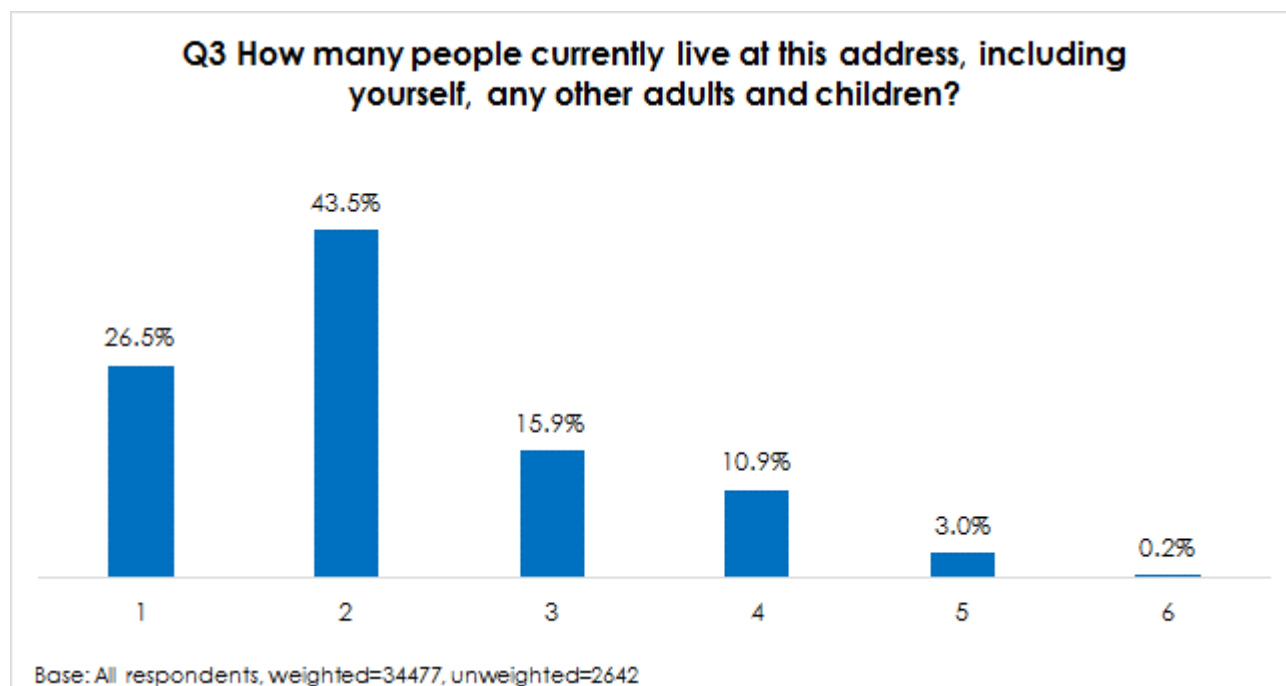

The total number of respondents to each question is shown either as 'Base' or 'n=xxx' in the tables or charts. Both weighted and unweighted bases are shown. Where the base or 'n' is less than the total number of respondents, this is because respondents may be 'routed' past some questions if they are not applicable. The percentages reported are weighted percentages.

## 2. HOUSEHOLD COMPOSITION

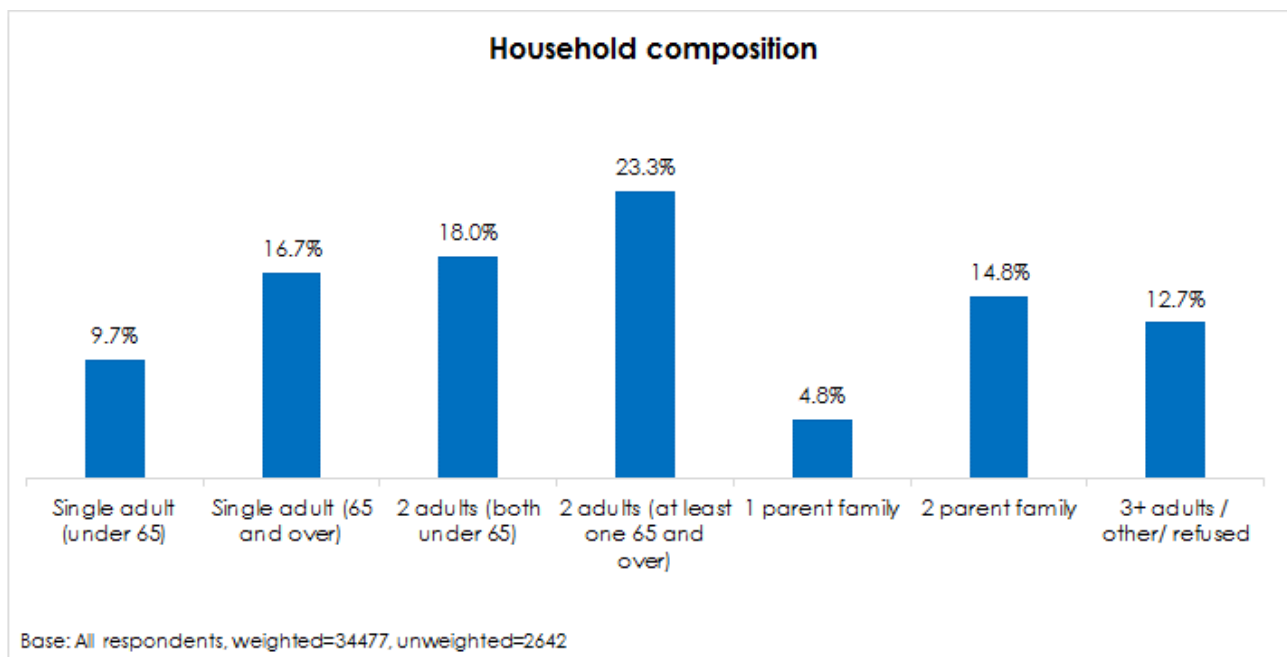

### 2.1 Household composition

The most common number of people to reside in the household was two people (44%) followed by single adults (27%) and three people in the household (16%). 14% of respondents lived in a household comprising of four or more people. There were no surveyed households with more than six people.

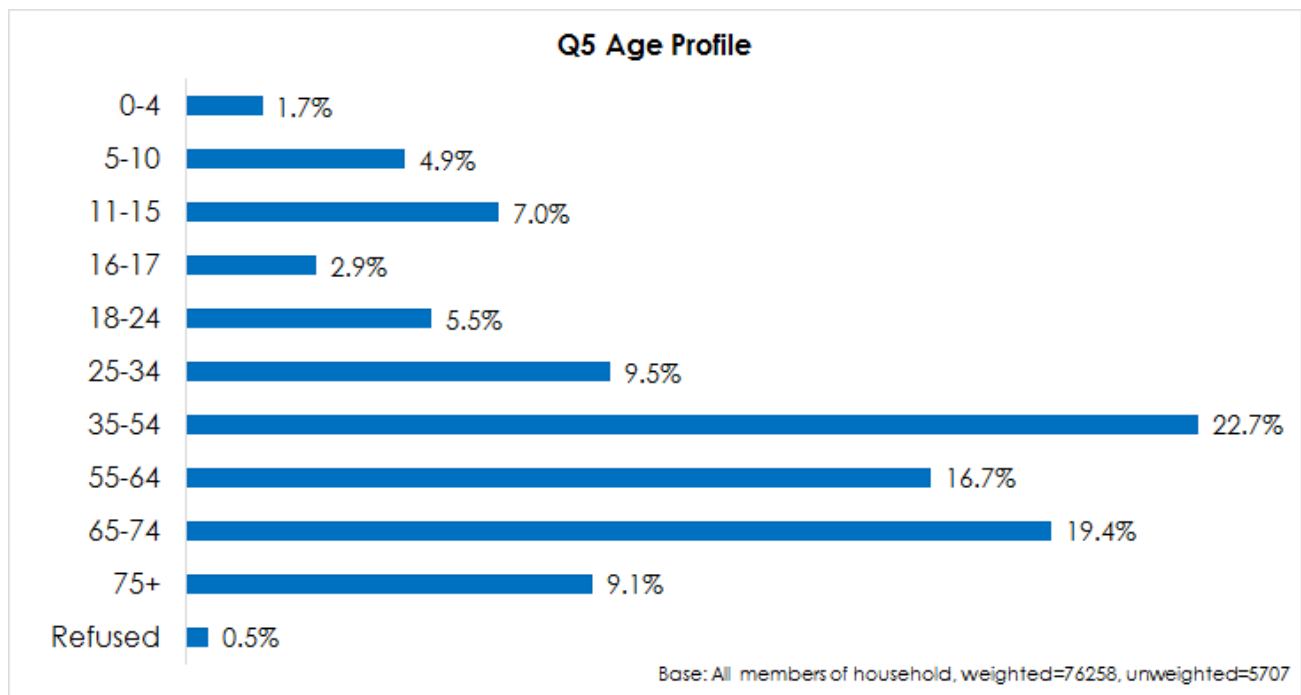

The most common household composition of Argyll and Bute residents was 2 adults in the household with at least one aged 65 and over (23%) followed by 2 adults both over the age of 65 (18%) and single adults aged 65 and over (17%). One and two parent families made up one fifth (20%) of households.

3+ adults refers to individuals who are over the age of 16 and are no longer in school. A very small number of households refused to provide their age and therefore could not be assigned a household composition. A further small proportion of households make up a household composition that is not recorded in this analysis. These three categories have been grouped together and make up 13% of households in Argyll and Bute.

## 2.2 Age and gender

Respondents were asked to provide the age and gender of all residents within the household. Just over half (54%) of residents were female while 46% were male. The age profile of Argyll and Bute residents reveals 17% of residents are aged 17 and under, while just over half (54%) are aged 18-64 and 29% are aged 65 and over.

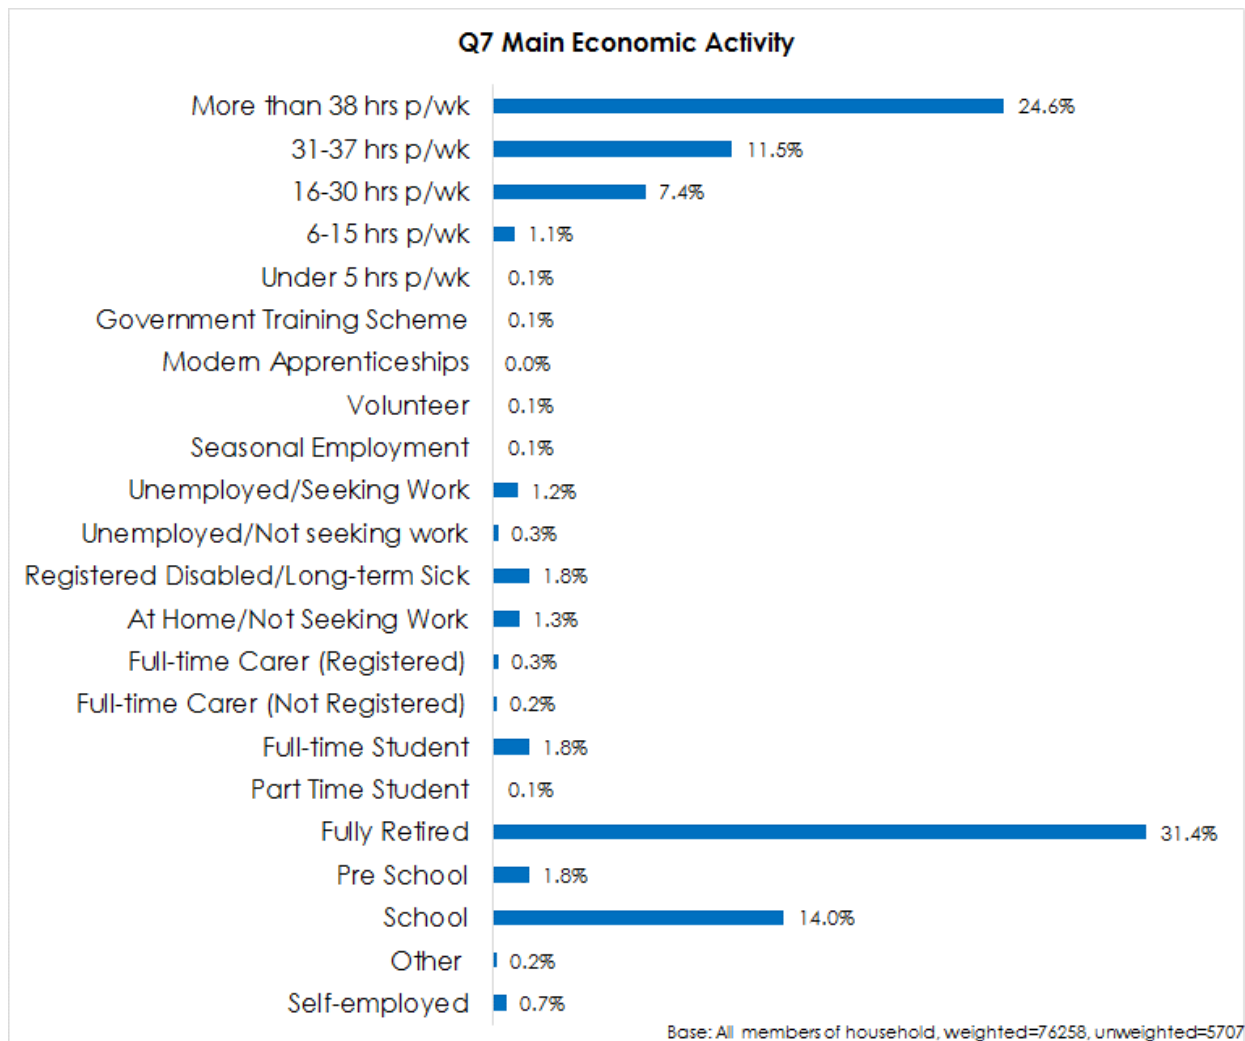

Females (54%) were more likely to be the head of household than males (46%). The head of the household was most likely to be aged 35-54 (28%) while just over one quarter (26%) were aged 65-74 (26%) and one fifth (20%) were aged 55-64.

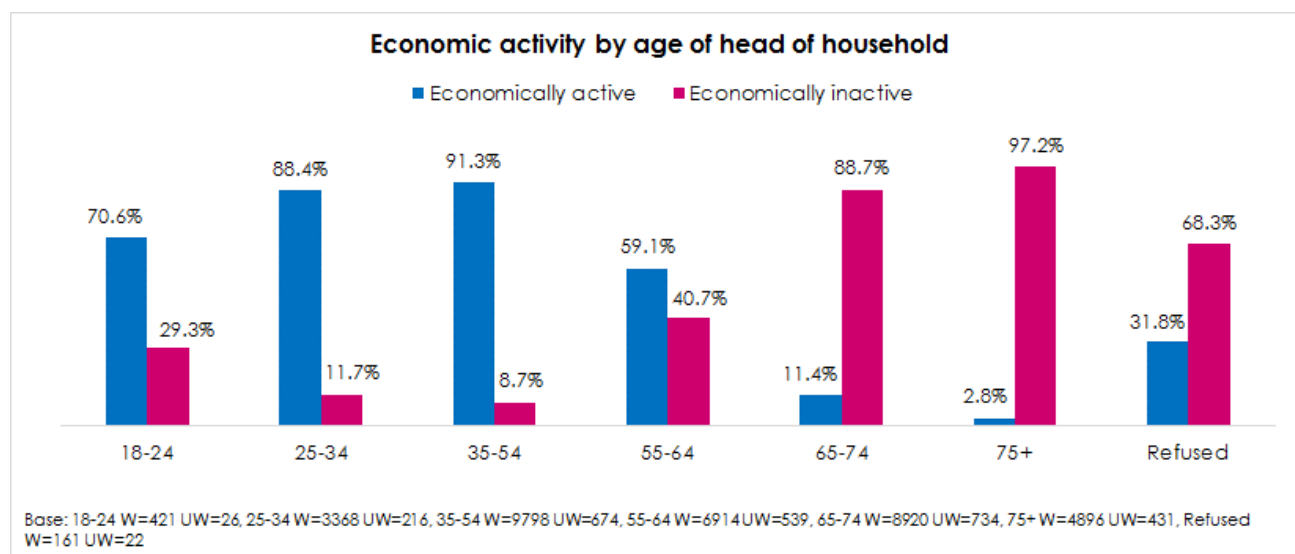

### 2.3 Economic activity

More than 4 in 10 respondents (44%) work more than 30 hours per week, 31% of respondents were fully retired and 14% were in school.

Residents who are in employment or are completing a government training scheme or modern apprenticeship are considered economically active. Residents who are unemployed, retired, registered as disabled or long-term sick, are a carer or student are considered to be economically inactive. As can be seen in the chart below, economic activity significantly declines for the head of household from age 55 and over.

## 2.4 Ethnicity

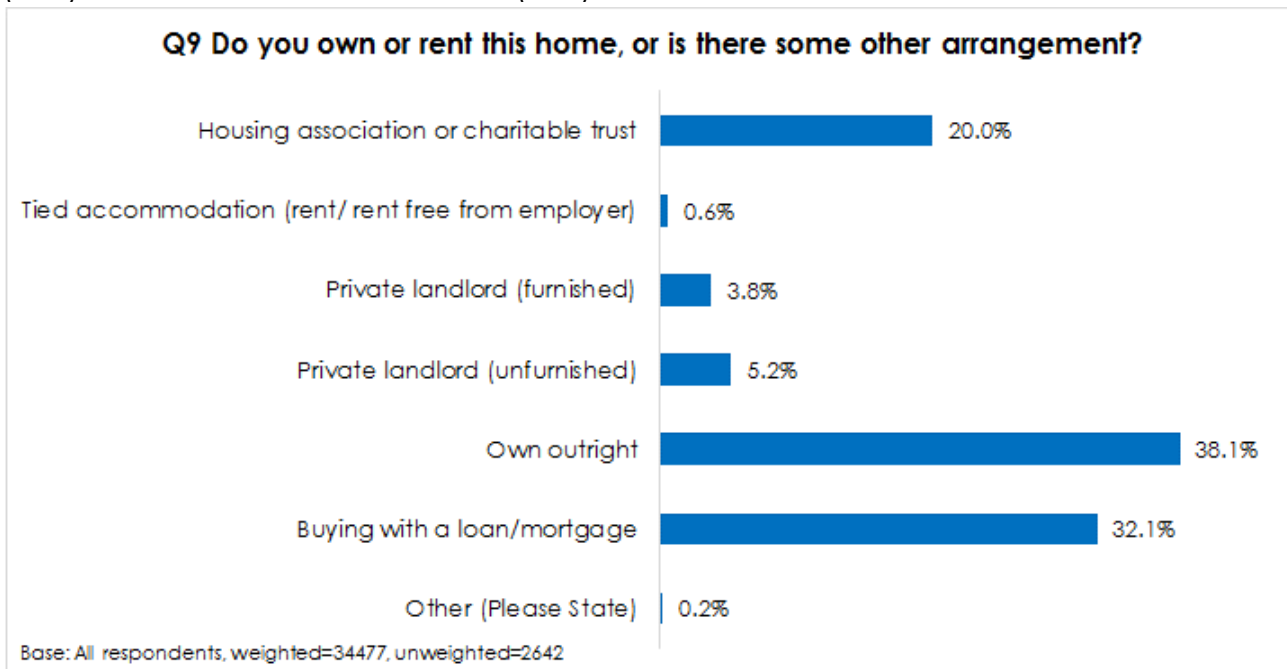

Just over 8 in 10 respondents (81%) were of Scottish ethnicity while 17% considered themselves other British.

Q8 Which of the following groups do you consider you belong to?	
	All respondents
<i>Unweighted base</i>	2642
<i>Weighted base</i>	34477
Scottish	80.9%
Other British	16.5%
Irish	0.1%
Polish	1.6%
Other white ethnic group	0.7%
Chinese, Chinese Scottish or Chinese British	0.1%
Arab, Arab Scottish or Arab British	0.1%
Any other background	0.1%

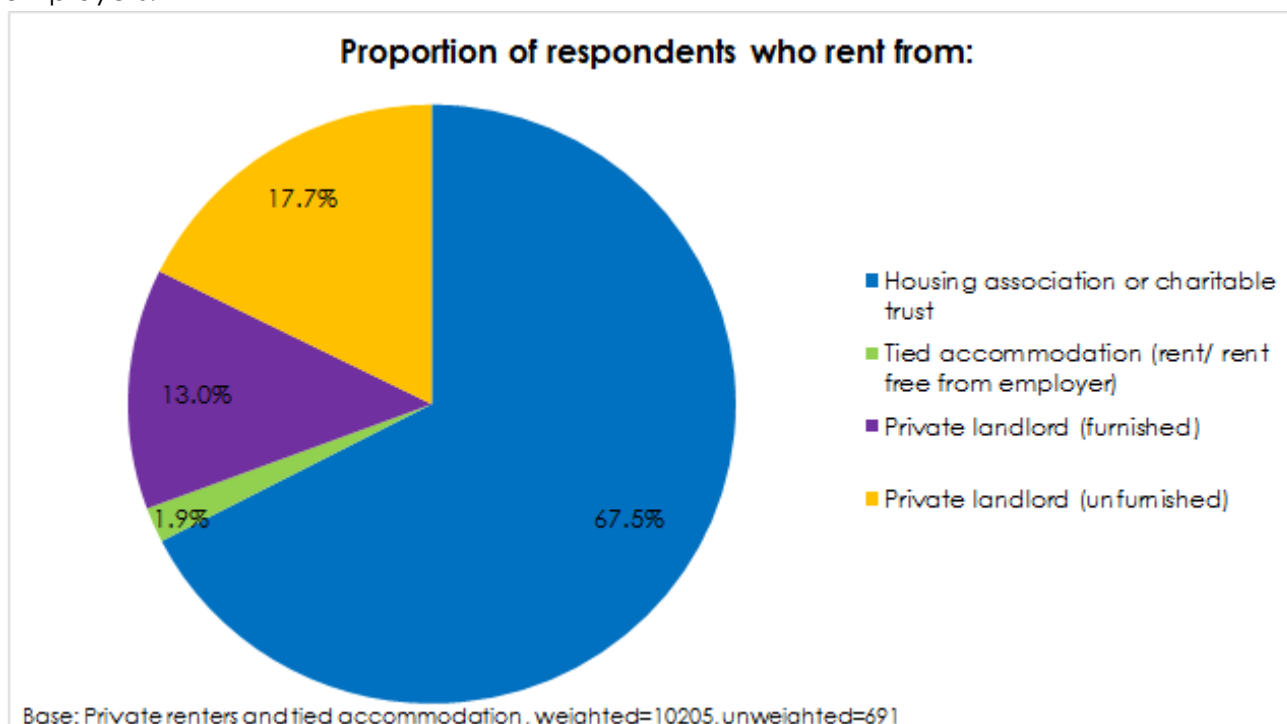

### 3. CURRENT HOME

#### 3.1 Renting and owning

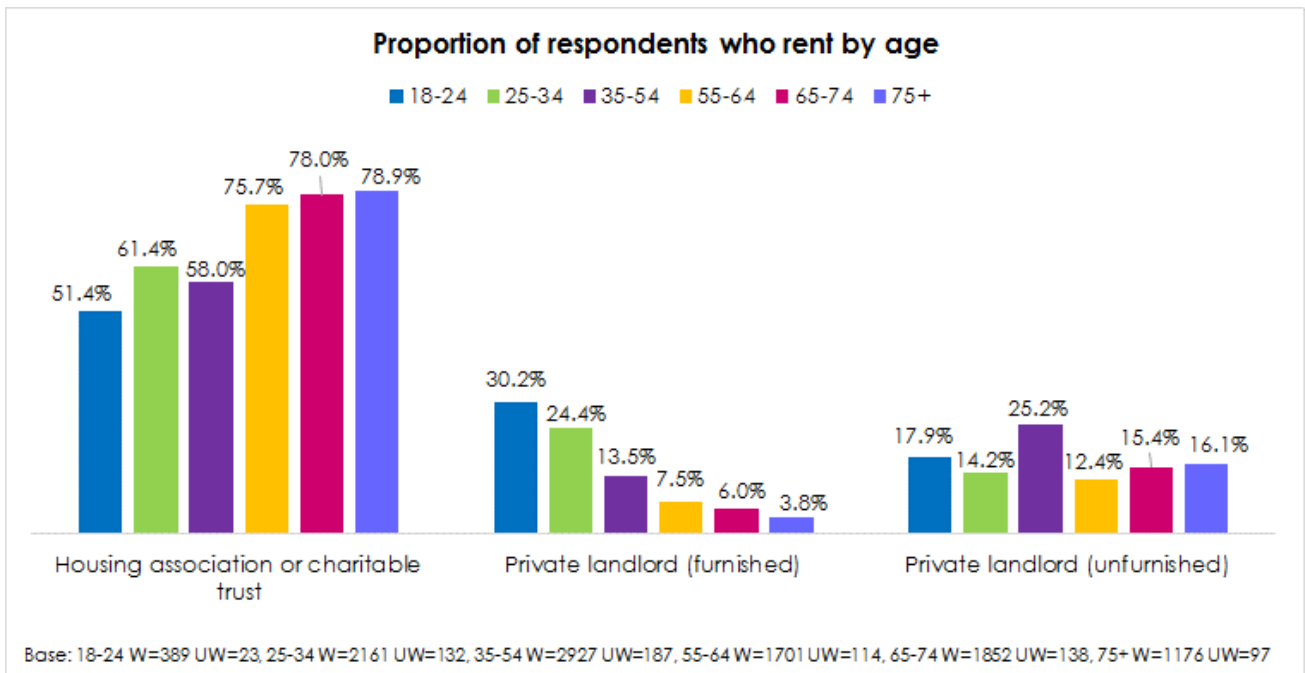

Overall, Argyll and Bute residents were more than twice as likely to be owner-occupiers (70%) than to rent accommodation (30%).

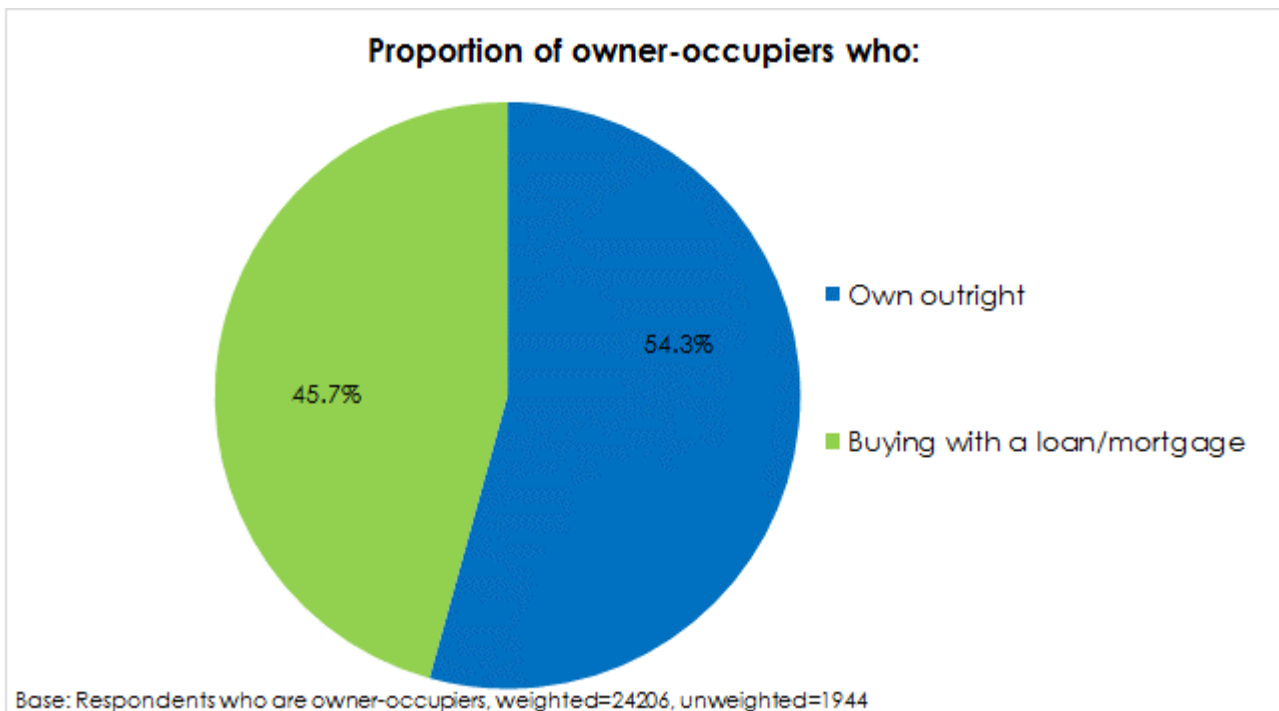

Narrowing the scope of analysis to renters only, more than two thirds of respondents (68%) who rent do so from a housing association or charitable trust. 18% rent unfurnished accommodation from a private landlord while 13% rent furnished accommodation from a private landlord. 2% of renters live in tied accommodation arrangements with their employers.

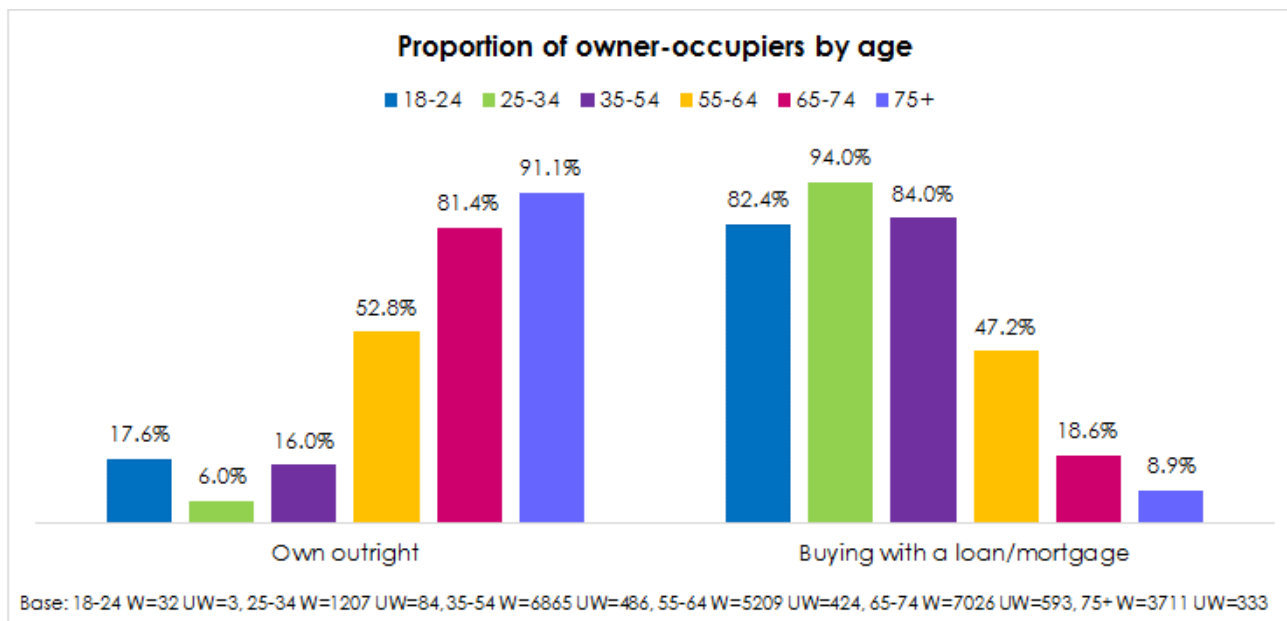

As can be seen from the chart below, respondents over the age of 55 are more likely to rent from a housing association or charitable trust than those under the age of 55. There is also a correlation between age and renting a furnished flat from a private landlord. As age increases, the likelihood of a respondent renting in this way gradually declines.

Analysis of owner-occupiers only reveals just over one half (54%) of owner-occupiers own their property outright while 46% have a loan or mortgage on their property.

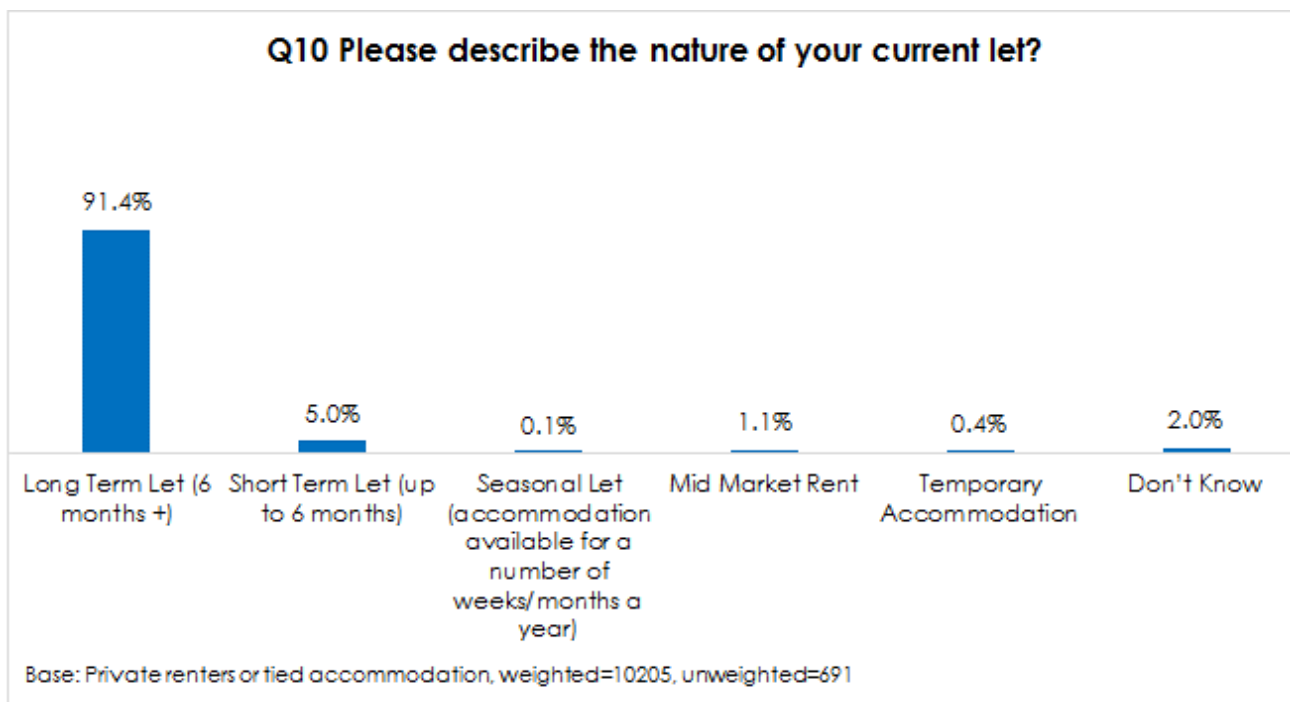

Respondents aged 55 and over are significantly more likely to own their property outright while respondents under the age of 54 are significantly more likely to have a loan or mortgage on their property.

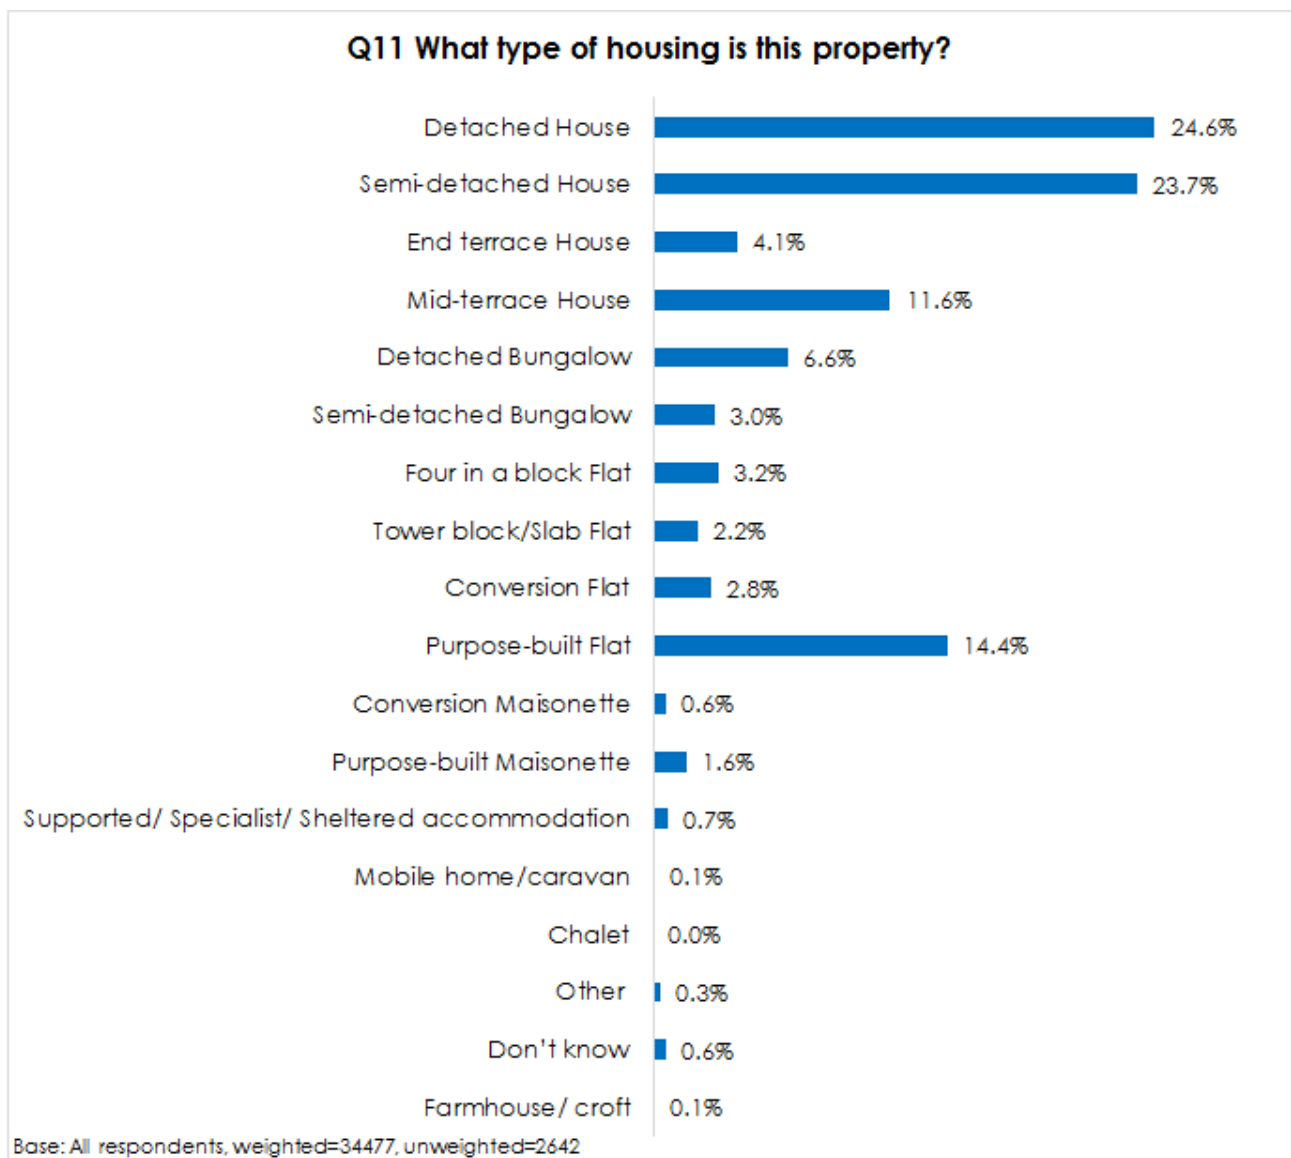

### 3.2 Renting arrangements

The majority of private renters (91%) have a long-term (+6 months) let.

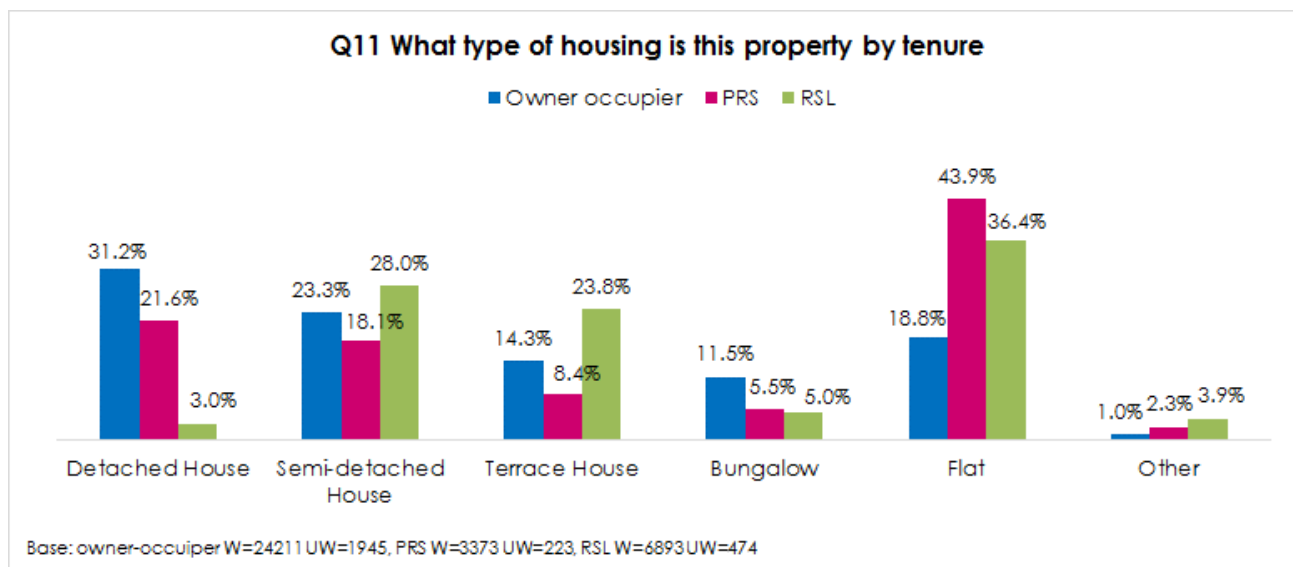

Just under half of Argyll and Bute residents (48%) live in a detached or semi-detached house, 14% live in a purpose-built flat and 12% live in a mid-terrace house.

Owner-occupiers were most likely to live in a detached house (31%), while residents who rent from the private sector (44%) or from a registered social landlord (37%) were most likely to live in a flat.

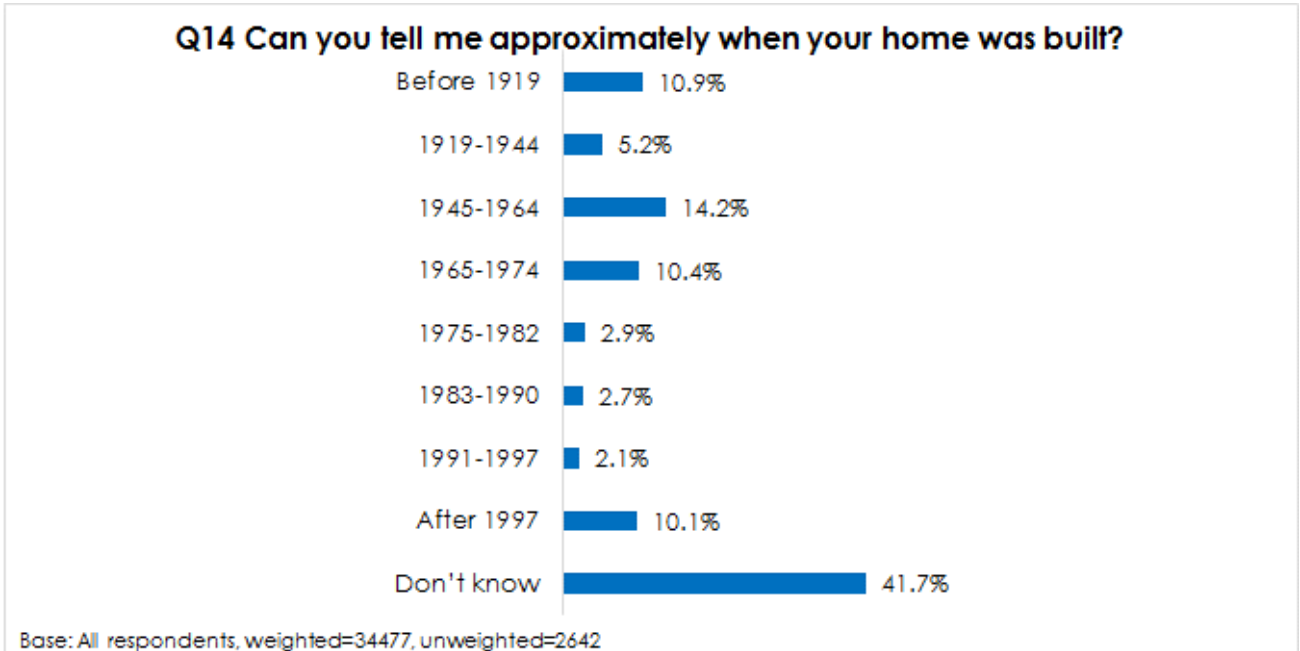

Respondents who live in a flat or maisonette were asked what floor their home is on. 56% of these respondents live on the first or second floor, 33% live in basement or ground floor property and 10% live on the third to fifth floor. 1% of respondents live on the sixth to ninth floor.

When asked how many stories there are in the building, 7 in 10 respondents (70%) live in a building with two to three floors, 21% in a building with four to nine floors and 9% of respondents said they did not know.

### 3.3 Property age

All respondents were then asked when their home was built. Just over 4 in 10 respondents (42%) said they did not know when their property was built. 30% said their property was built before 1964, 16% from 1965 to 1990 and 12% said their property was built after 1991.

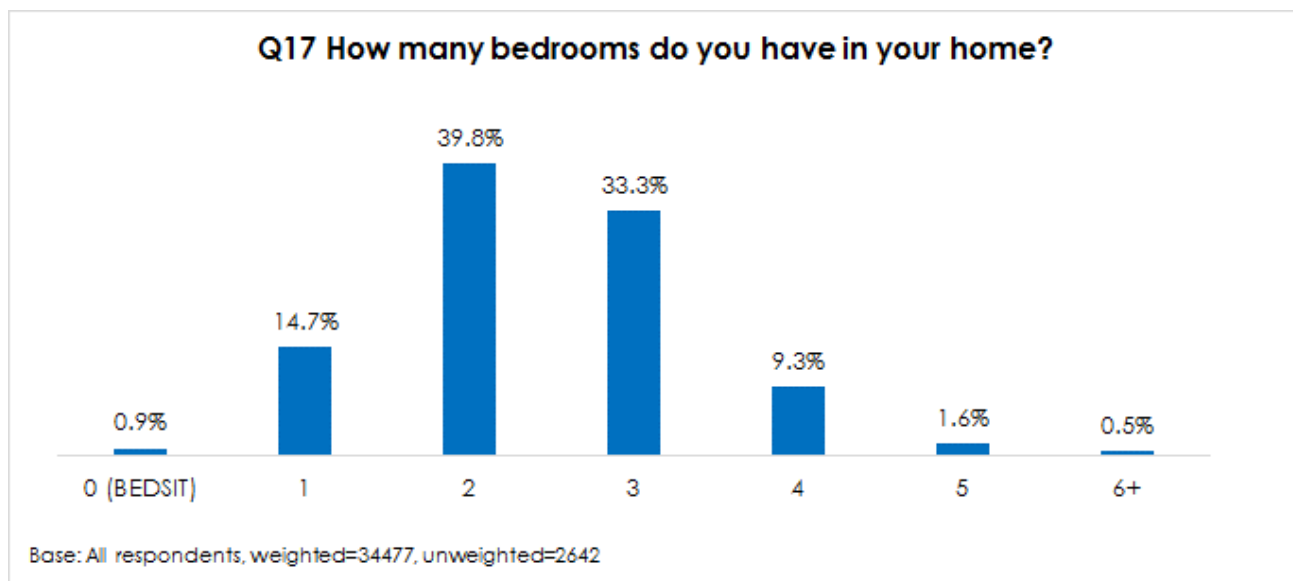

### 3.4 Property aspects

The majority of respondents (94%) do not share any rooms in their household with any other person. 4% of respondents said they share their kitchen, 1% share their bathroom and 1% said they did not know.

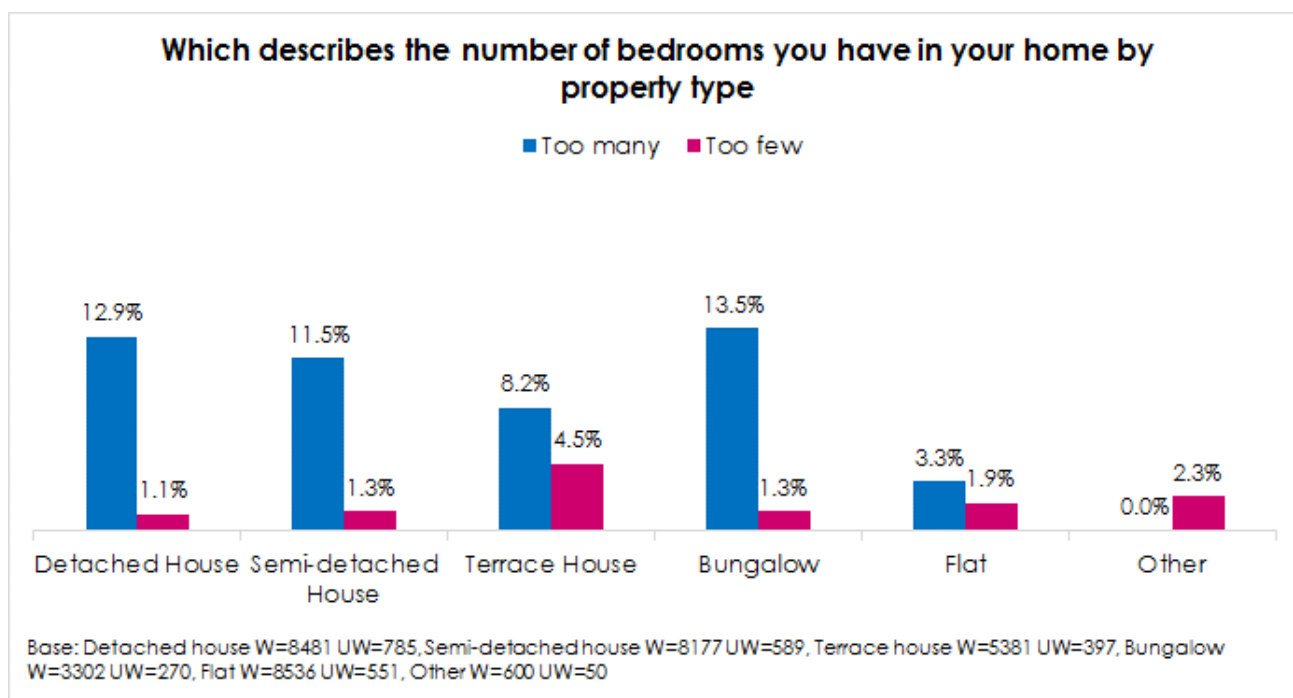

With regards to public rooms in the household e.g. a dining room, living room or lounge, 74% respondents said they have one public room, 21% have two and 5% have three or more.

With regards to the number of bedrooms, 16% of respondents live in a home with 1 or less bedrooms, 4 in 10 respondents (40%) live in a property with two bedrooms, one third (33%) have three bedrooms and 11% have four or more bedrooms in their home.

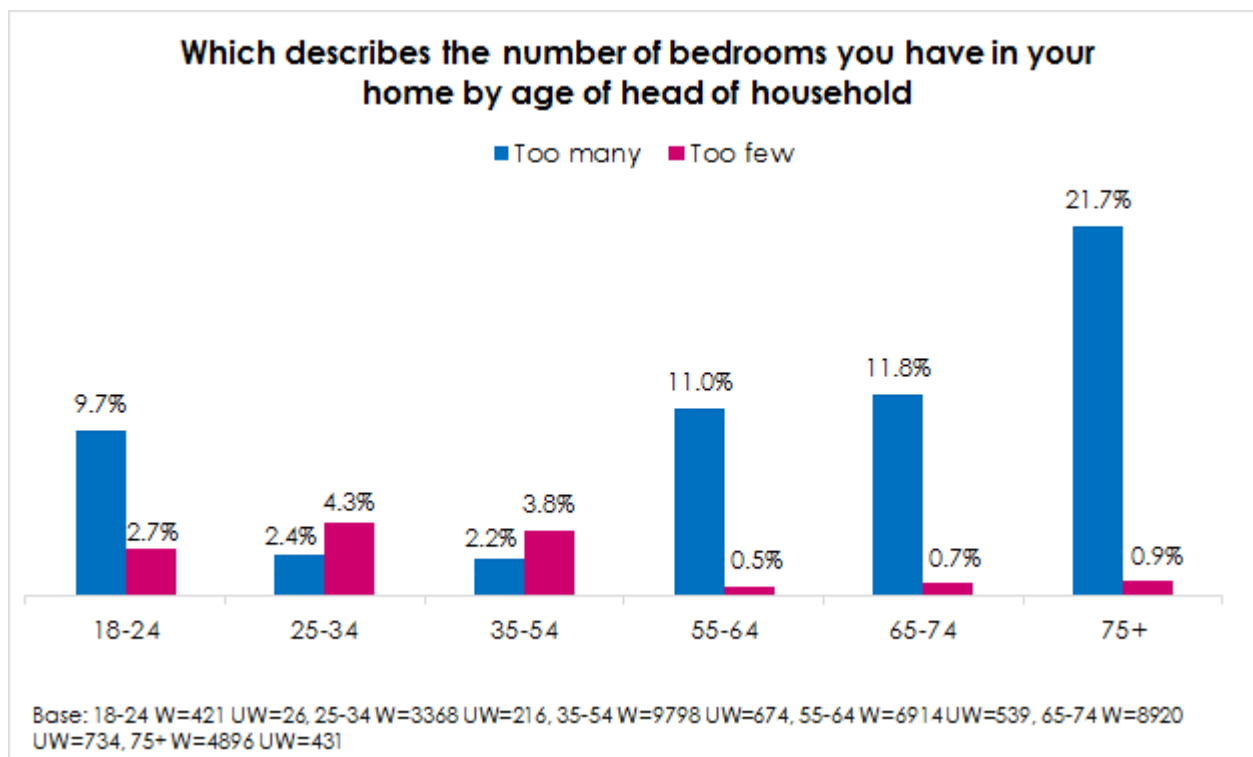

The majority of respondents (88%) felt they had just about the right number of bedrooms in their home, 9% said they had too many, 2% said they had too few and 1% said they did not know.

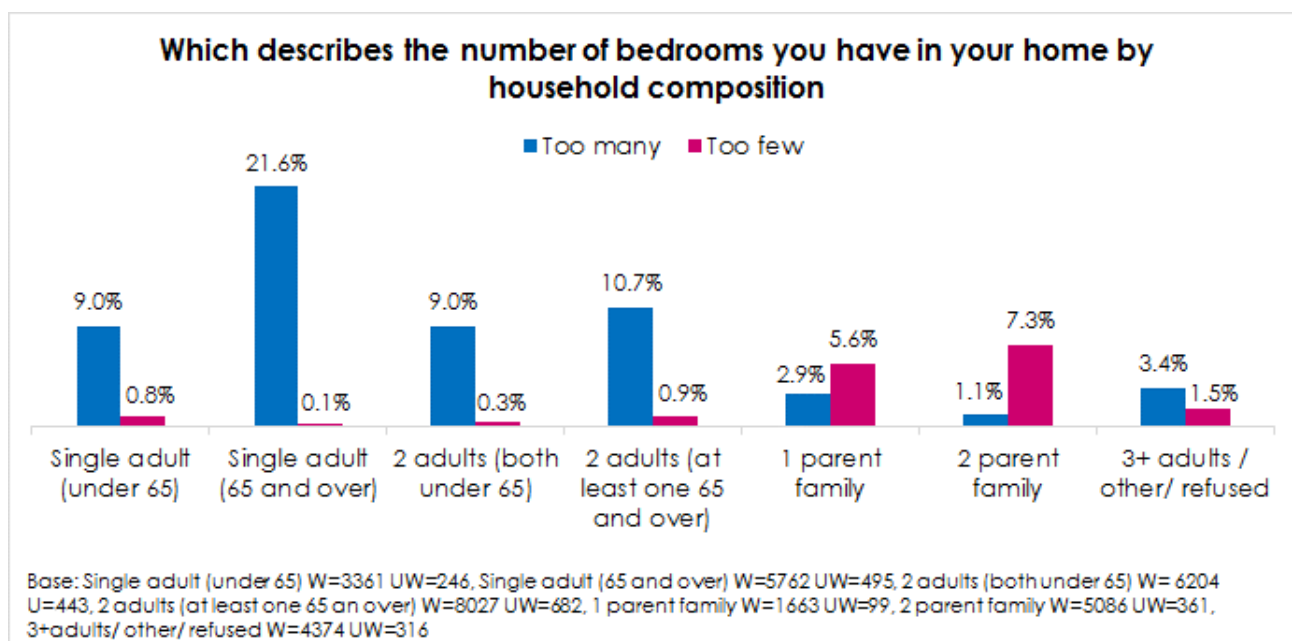

Residents living in a bungalow (14%), detached house (13%) and semi-detached house (12%) were significantly more likely to say they had too many bedrooms than residents living in a flat (3%). Residents living in a terrace house (5%) were most likely to say they had too few bedrooms.

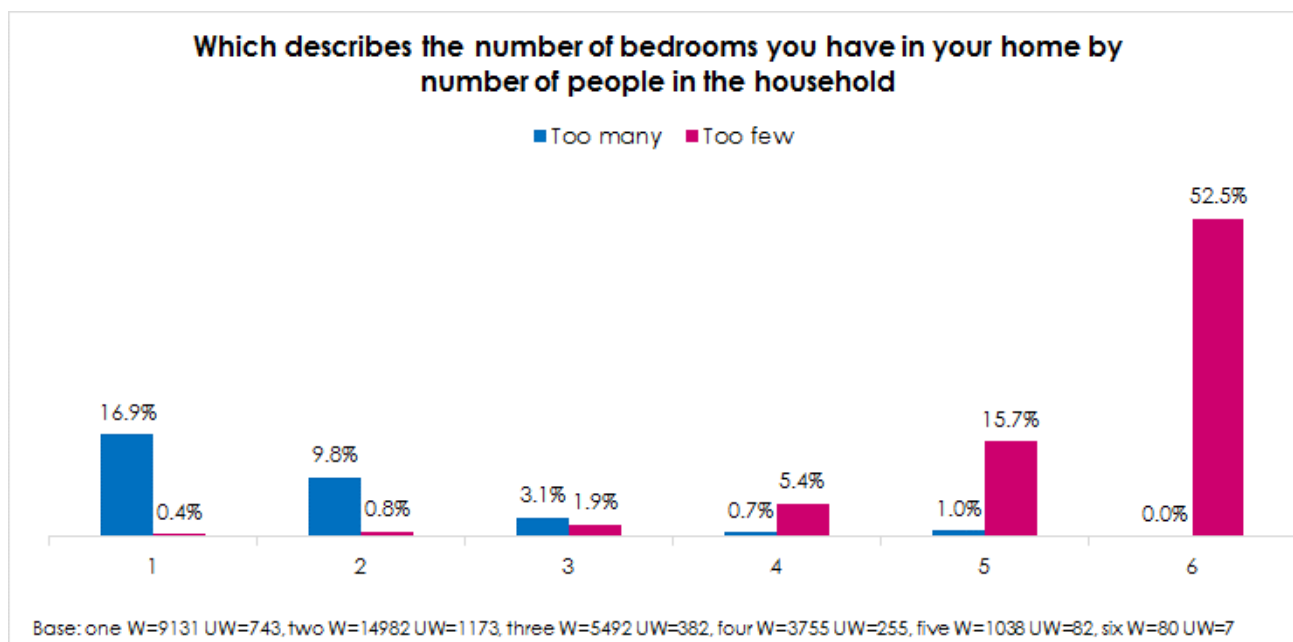

Residents aged 75 and over (22%) were significantly more likely to say they had too many bedrooms than younger residents aged 25-34 (2%) and 35-54 (2%). Residents aged 25-34 (4%) and 35-54 (4%) were the most likely to say they had too few bedrooms.

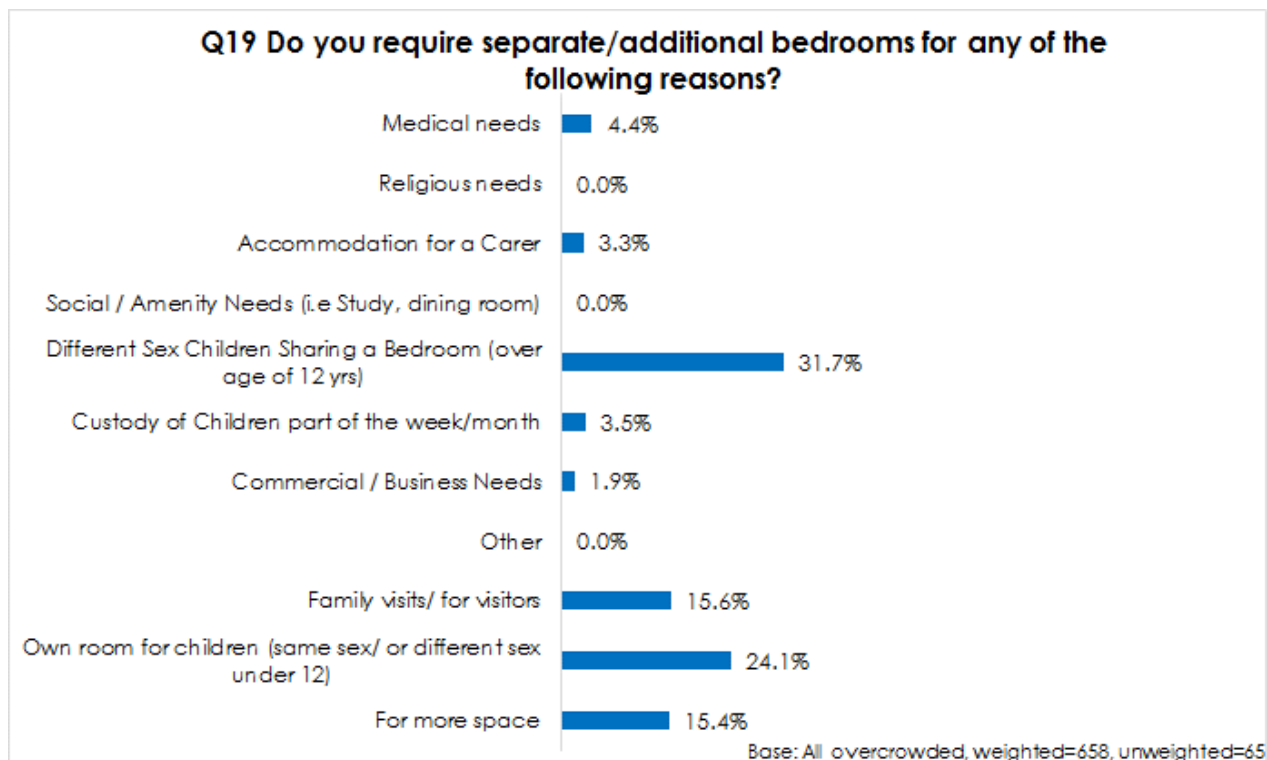

Single adults aged 65 and over (22%) were the most likely to say they had too many bedrooms while one parent (6%) and two parents (7%) families were the most likely to say they had too few bedrooms.

The proportion of residents stating they have too few bedrooms increases from 0% for households with only one person to 53% for those with 6 people in the household.

Respondents who felt they had too few bedrooms in their home were asked why they required additional bedrooms. The most common reason provided was due to children sharing a bedroom (56%) followed by needing additional bedrooms for family visits or visitors (16%) and for more space (15%).

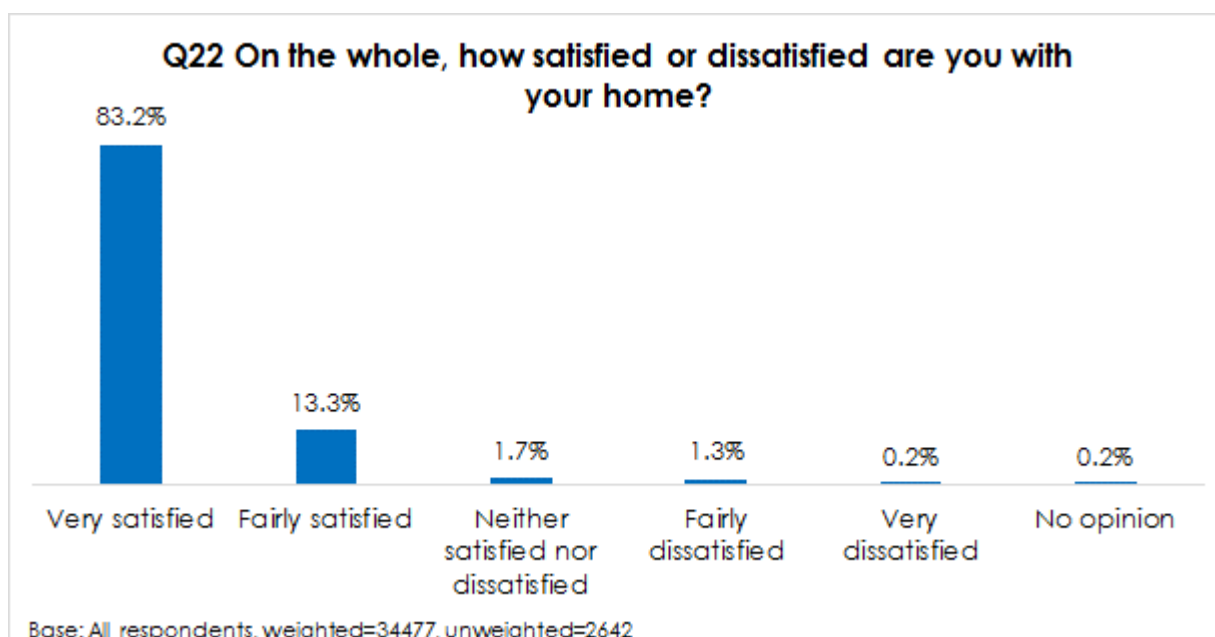

### 3.5 Plans for extending current property

Respondents who felt they had too few bedrooms in their property were then asked if they had any plans to extend their current property to add additional rooms or space with more than 1 in 10 (15%) stating yes, they do.

Of these responses, the most common extension provided by respondents was a loft conversion (49%) followed by additional bedrooms (35%) and the addition of a conservatory (12%).

### 3.6 Satisfaction with home

More than 8 in 10 respondents (83%) were very satisfied with their home while 13% were fairly satisfied, 2% neither satisfied nor dissatisfied and 2% were fairly or very dissatisfied.

Analysis by tenure reveals almost all owner-occupiers (98%) were satisfied with their home, compared to 96% who rent from a registered social landlord and 88% who rent within the private sector.

Respondents who were not satisfied with their home were asked why they felt this way. The most common reasons provided by respondents were (please note that respondents gave multiple responses to this question):

- Home is too difficult to heat (43%)
- Home is in poor condition (27%)
- Home needs modernising (26%)
- Home is too small (26%)
- Home is too big (20%)

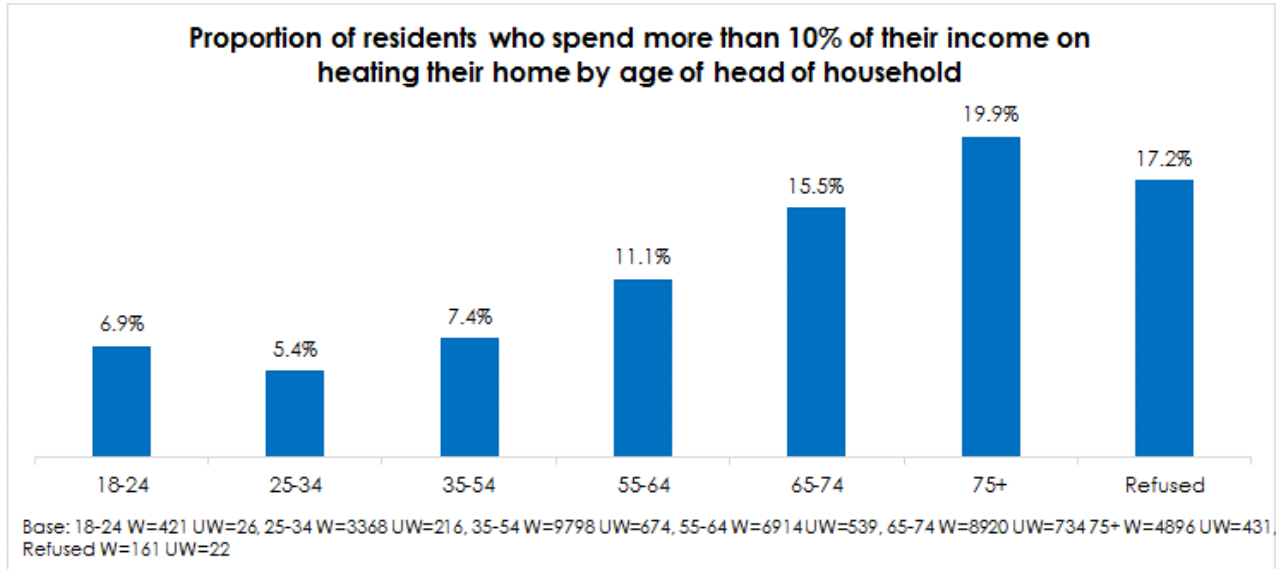

<b>Q23 Why do you say you are dissatisfied?</b>	
	<b>All who are dissatisfied</b>
<i>Unweighted</i>	54
<i>Weighted</i>	530
Home is difficult to heat	42.5%
Home in poor condition	26.9%
Home needs modernising	26.0%
Home too small	26.0%
Home too big	19.5%
Too expensive	15.0%
Lack of aids/adaptations/special facilities	12.6%
Other	6.8%
Harassment from neighbours	6.6%
Dislike type of housing	6.6%
Dislike area	5.2%
No garden/need larger garden	4.6%
On wrong floor	2.6%
Problems with neighbours	2.5%
Not near facilities	1.6%

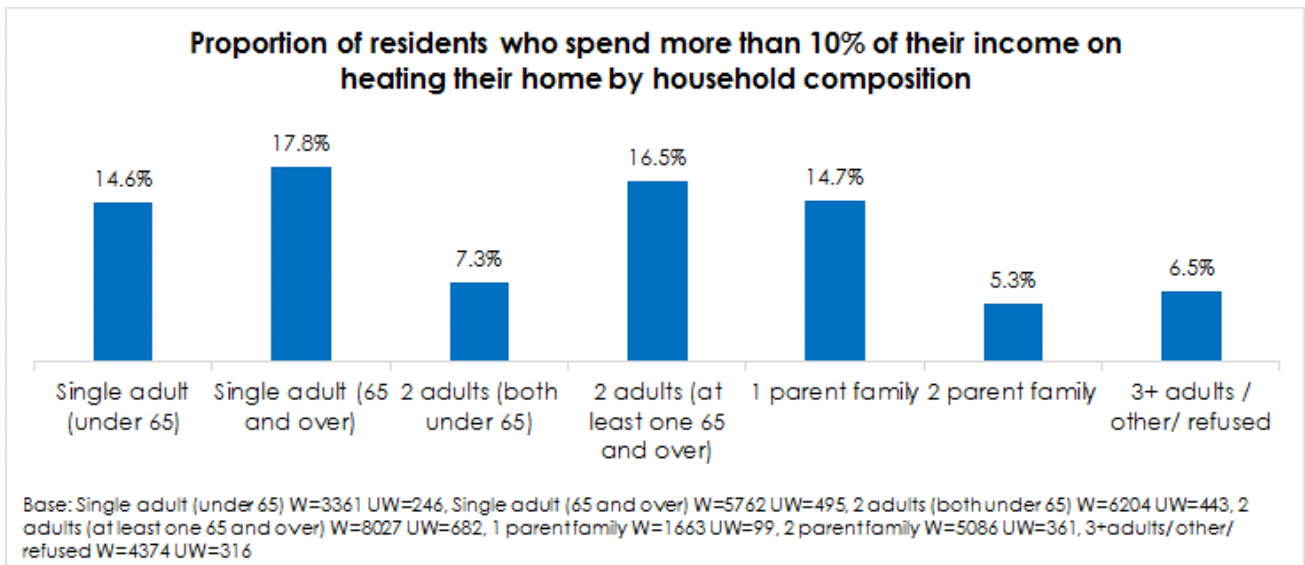

### 3.7 Heating your home

All respondents were then asked if they spend more than 10% of their income on heating their home. More than 1 in 10 respondents (12%) said yes they do spend more than 10% of their income heating their home, 73% said no they don't and 15% said they did not know.

Residents who spend more than 10% of their income on heating their home were most likely to be aged 75 and over (20%) while residents aged 25-34 (5%) were the least likely.

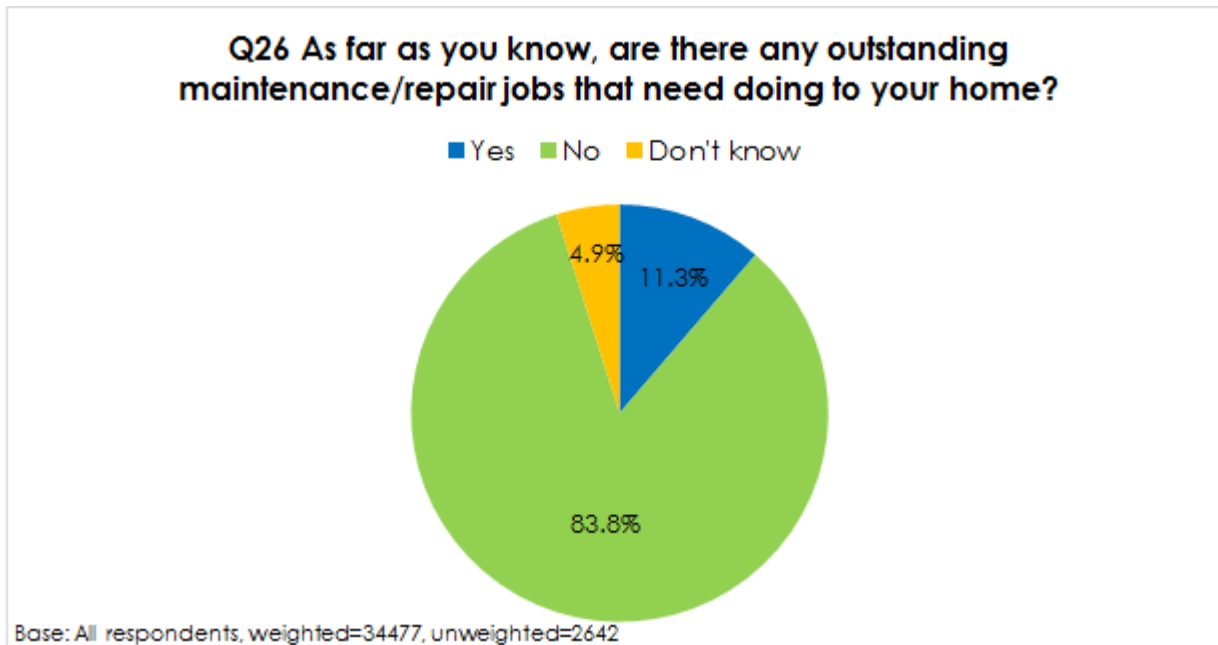

Residents who spend more than 10% of their income on heating their home were most likely to live in a single adult household (aged 65 and over) (18%) followed by households comprising of 2 adults (at least one aged 65 and over) (17%).

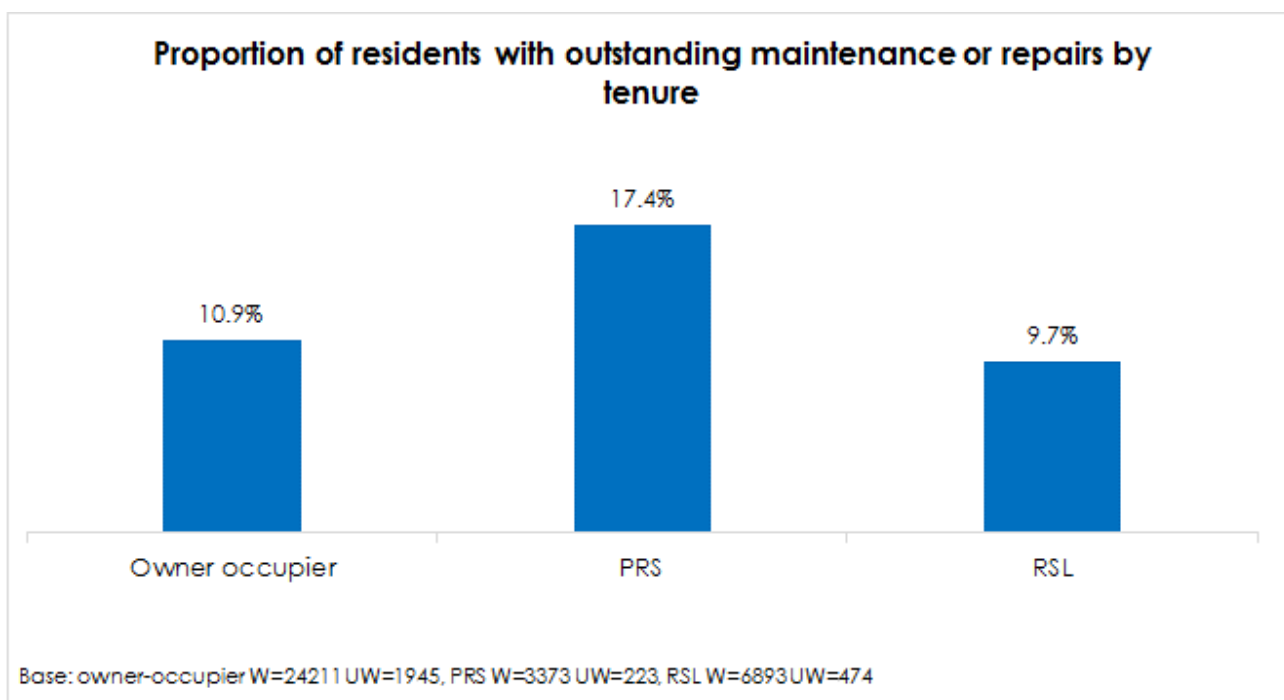

## 4. REPAIRS & PROPERTY CONDITION

### 4.1 Outstanding maintenance/ repairs

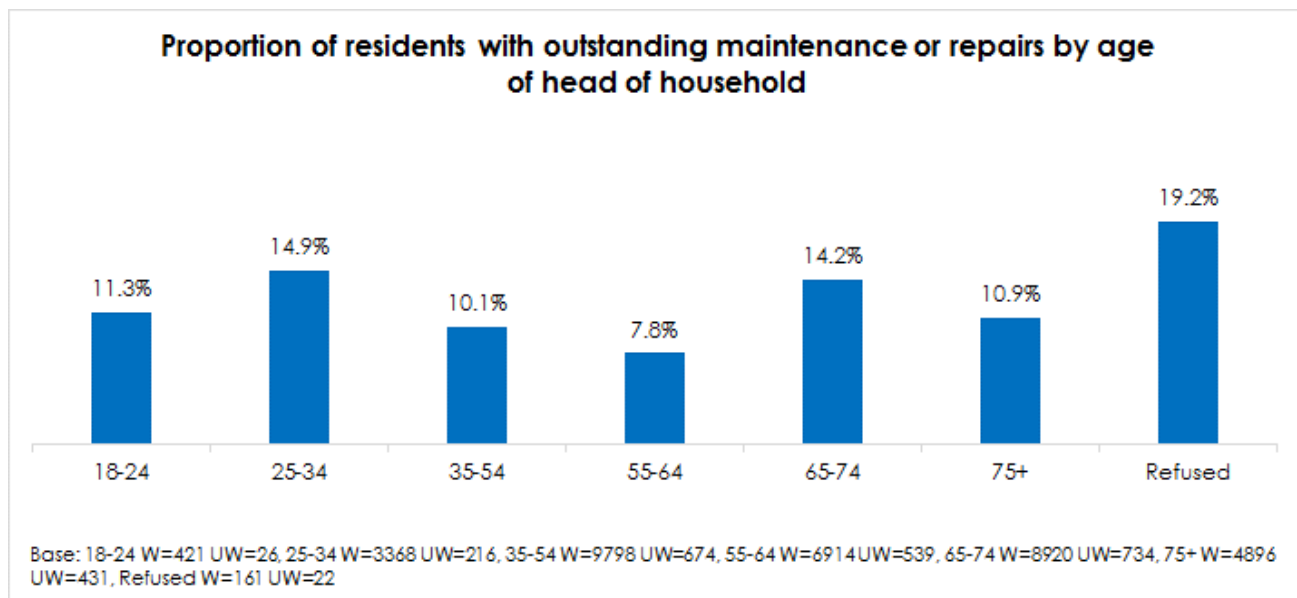

Just over 1 in 10 respondents (11%) stated that they have outstanding maintenance or repair jobs that need done in their home.

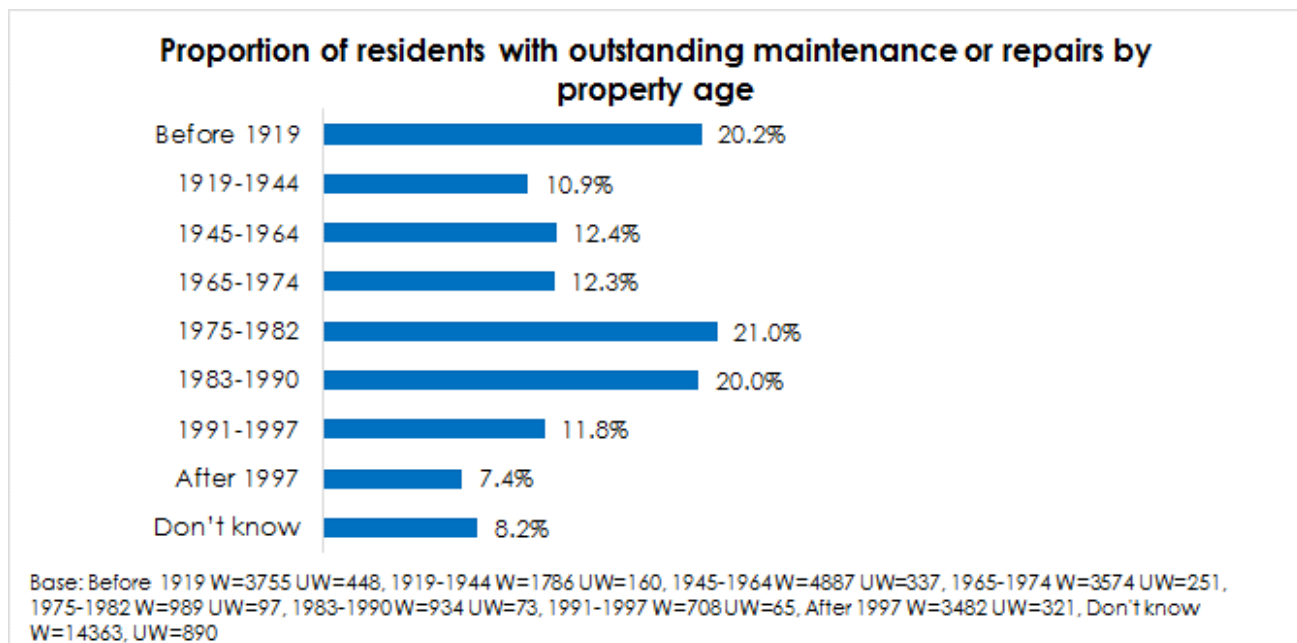

Residents who rent within the private sector (17%) were significantly more likely to have outstanding maintenance or repairs than owner-occupiers (11%) or those who rent from a registered social landlord (10%).

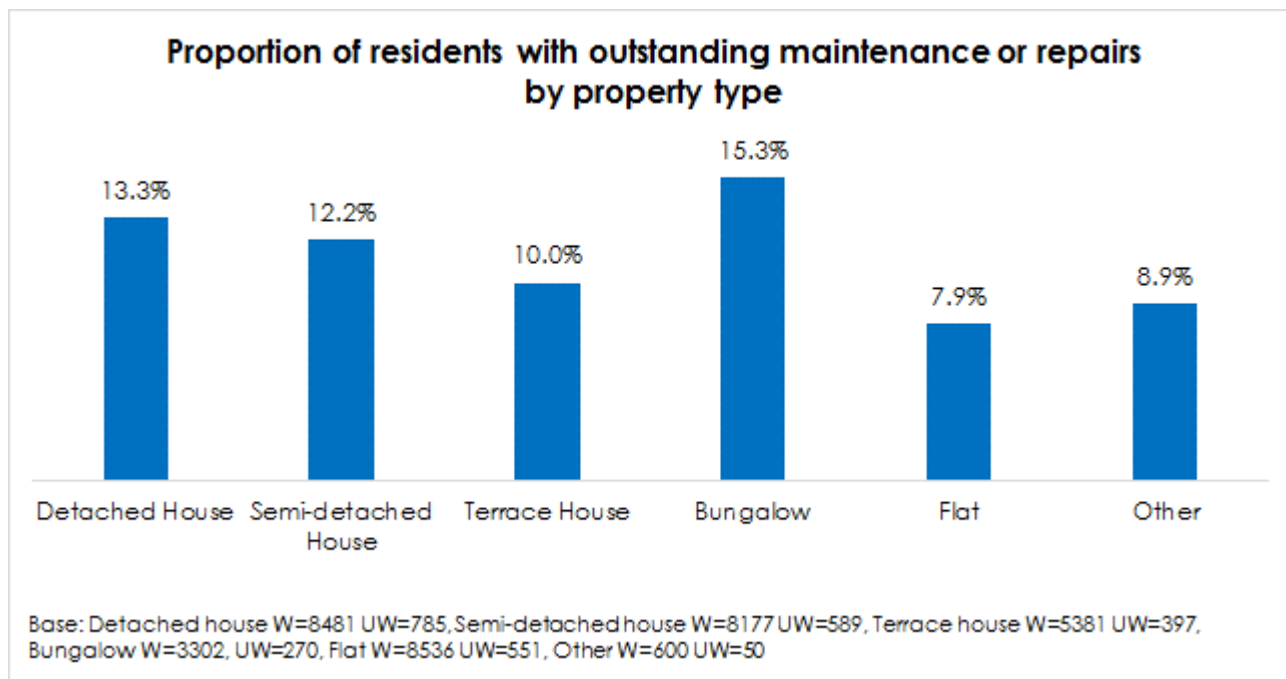

There is no apparent correlation between age of the head of household and outstanding maintenance or repairs. Respondents aged 25-34 (15%) were most likely to have outstanding maintenance and repairs on their property while respondents aged 55-64 (8%) were the least likely.

The most common property age with outstanding maintenance or repairs was properties built between 1975 to 1982 (21%) followed by properties built before 1919 (20%) and built between 1983 to 1990 (20%).

Residents with outstanding maintenance and repairs were most likely to live in a bungalow (15%) followed by a detached house (13%) and semi-detached house (13%).

## 4.2 Upgrades and improvements

Respondents were then asked to choose from a list of upgrades and improvements they may require in their property. Just under 9 in 10 respondents (89%) said they already had all of the items listed. Where respondents did choose an upgrade or improvement required, the most common chosen were:

- Double glazing (46%)
- Full central heating (37%)
- Cavity wall insulation (if there is a cavity) (16%)

<b>Q27 Looking at this card, does your property require any of the following upgrades or improvements?</b>	
	<b>All who require an upgrade or improvement</b>
<i>Unweighted</i>	387
<i>Weighted</i>	3704
Double glazing	46.2%
Full central heating	37.3%
Cavity wall insulation (if there is a cavity)	15.6%
Loft insulation (if there is a loft)	13.0%
Satisfactory thermal insulation	11.0%
Safe Electrical Wiring	8.2%
An effective system for the drainage and disposal of foul and surface water	4.5%
A bath or shower	3.6%
Satisfactory heating, lighting and ventilation	3.4%
Fire/smoke alarms	1.0%
Hot and cold water supply to the wash hand basin	0.6%
Hot and cold water supply to the bath or shower	0.3%
Satisfactory access to the building	0.3%
Supply of electricity	0.2%

Residents living in a bungalow (84%) were the least likely to say they had all of the above upgrades and improvements while those living in a flat (92%) and terrace house (92%) were most likely.

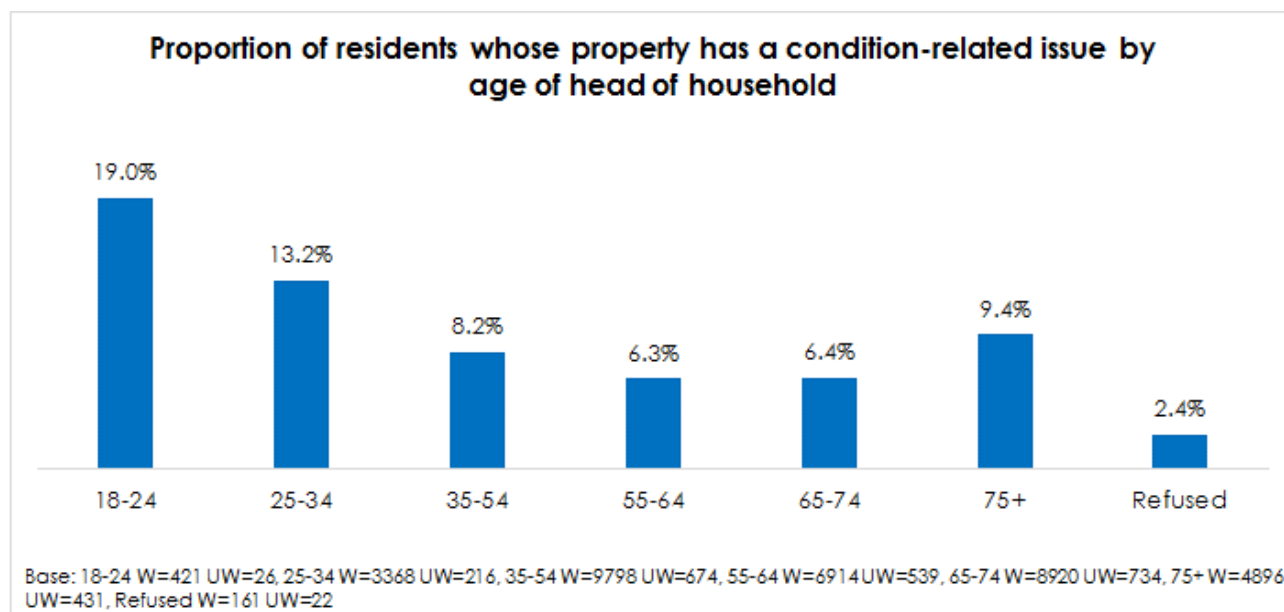

Properties built before 1919 (77%) were the least likely to have all of the above upgrades and improvements with 14% of these properties requiring double glazing and 9% requiring full central heating.

### 4.3 Condition related issues

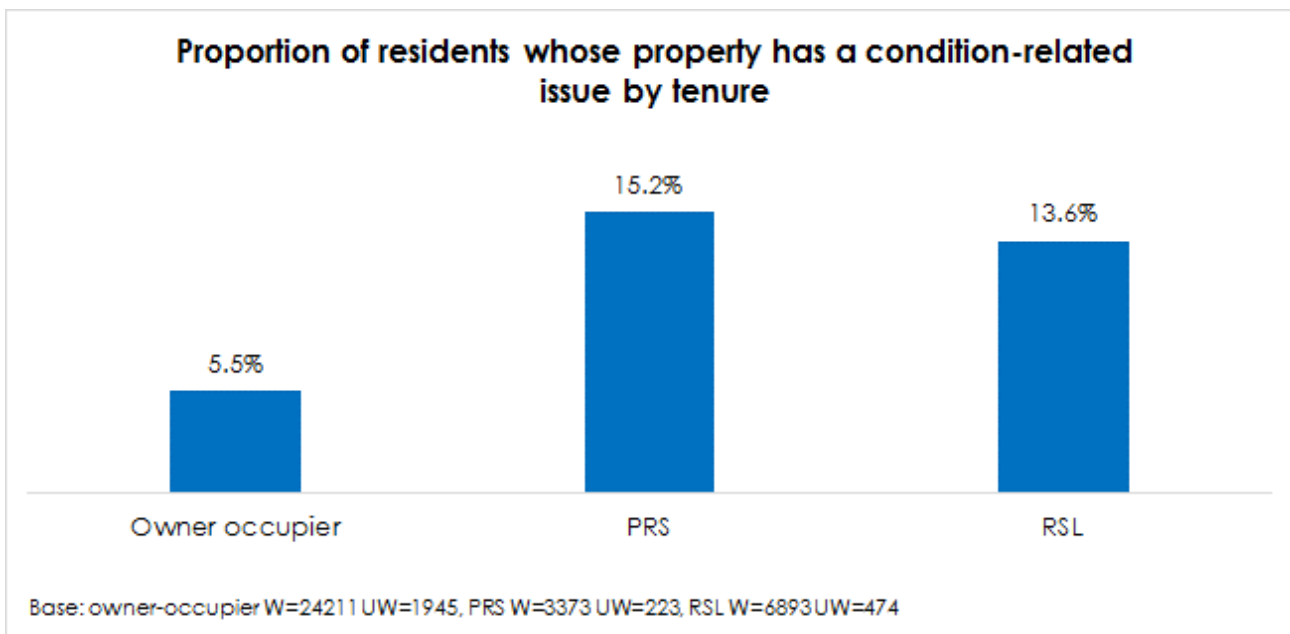

All respondents were asked if their property had any condition related issues. 11% of all respondents believed that their property did have a condition related issue. Of those with a condition related issue, the most commonly noted issues were condensation (63%) and significant dampness (55%).

Q28 Does your property have any of the following condition-related issues?	
	All who have a condition-related issue
Unweighted	260
Weighted	2769
Has significant dampness (e.g. rising or penetrating dampness)	54.8%
Has condensation	63.1%
Requires major structural repairs	12.3%
Has non mains water supply	1.8%
Lacks a bathroom	-
Lacks a kitchen	0.1%
Lacks an inside toilet	0.2%

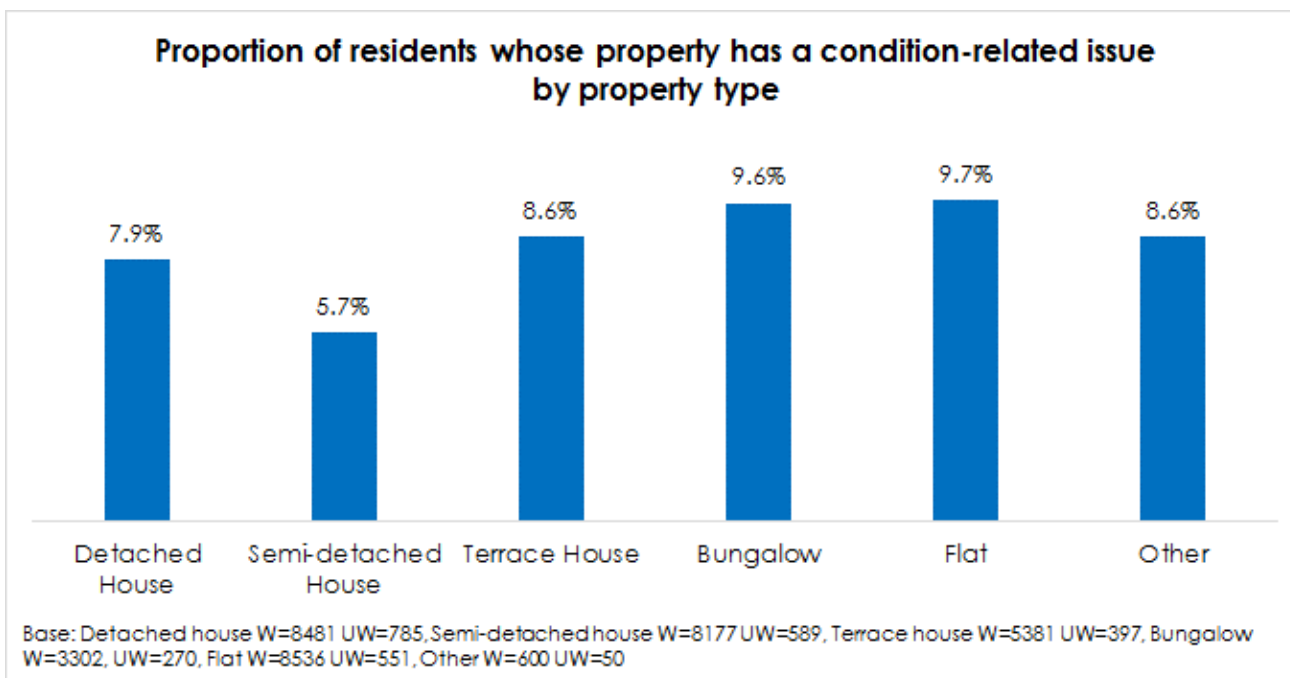

Younger residents aged 18-24 (19%) and 25-34 (13%) were the most likely to live in a household with a condition-related issue.

More than one in ten residents who rent within the private sector (15%) or from a registered social landlord (14%) live in a property with a condition-related issue. Residents who rent their property are more than twice as likely to live in a property with a condition-related issue than owner-occupiers (6%).

One in ten residents living in a bungalow (10%) or flat (10%) have a condition-related issue in their property. Residents living in a semi-detached house (6%) were the least likely to have a condition-related issue with their property.

#### 4.4 Ability to carry out repairs

Just under one third of respondents (32%) said they were unable to carry out repairs needed on their home.

Those who were not able to carry out the repairs required were asked why they were unable. The main reasons given were the fact that repairs were the responsibility of the landlord (71%), that they cannot physically manage (15%) and a requirement to find a reliable builder or contractor (11%).

<b>Q30 If you are unable to carry out repairs on your home, is this because:</b>	
	<b>All those unable to carry out repairs</b>
<i>Unweighted</i>	867
<i>Weighted</i>	11089
Repairs are responsibility of landlord/ Council/Housing Association	70.8%
You cannot physically manage	14.5%
Require to find a reliable builder/other contractor	10.5%
Not stated	5.9%
Need DIY skills	3.1%
Repair problems are too severe	2.5%
You cannot afford to	2.3%
Unable to get a grant/assistance from the Council	0.8%
Availability of tradespersons/ difficult to find	0.7%
Require independent advice on what is needed	0.5%
Repairs are communal and can't get agreement to have them done	0.3%
Family members do repairs for me	0.3%
Don't know who to ask to repair things	0.2%
No time	0.1%

Analysis by tenure reveals the majority of residents renting from a registered social landlord (96%) or rent within the private sector (92%) said they were unable to carry out repairs in their home because repairs are the responsibility of their landlord/ Council or housing association. 5% of owner-occupiers also said they were unable to carry out repairs for this reason.

Analysis by age of head of household reveals more than one third (38%) of respondents aged 75 and over and 22% of respondents aged 65-74 said they were unable to carry out repairs on their home because they cannot physically manage. Inability to find a reliable builder or other contractor was of the most concern to residents aged 75 and over (27%).

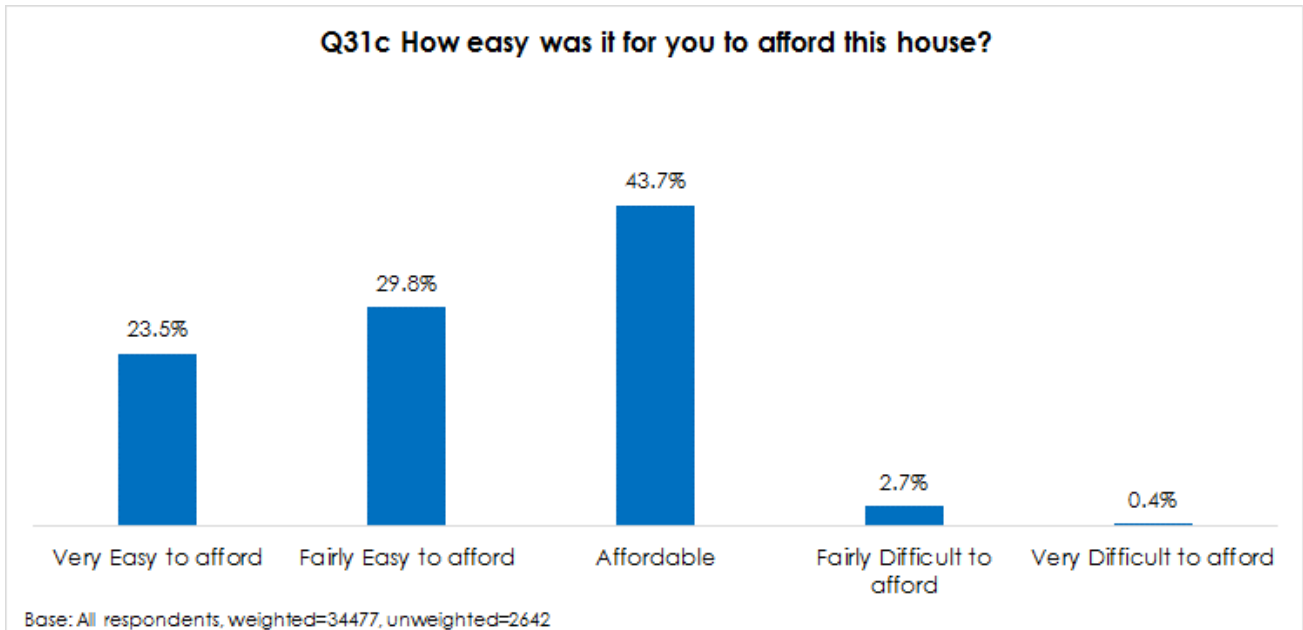

## 5. RECENT MOVING BEHAVIOUR

### 5.1 Profile of household when first moved in

When respondents first moved into their home, 14% were one person households, 43% two person households and 43% were households of three or more.

Just over half of respondents (53%) said they found it very or fairly easy to afford their house, compared to 44% who said it was affordable and 3% who said it was fairly or very difficult to afford.

Owner-occupiers (55%) and those renting from a registered social landlord (52%) were significantly more likely to say their home was very or fairly easy to afford compared to those renting within the private sector (44%).

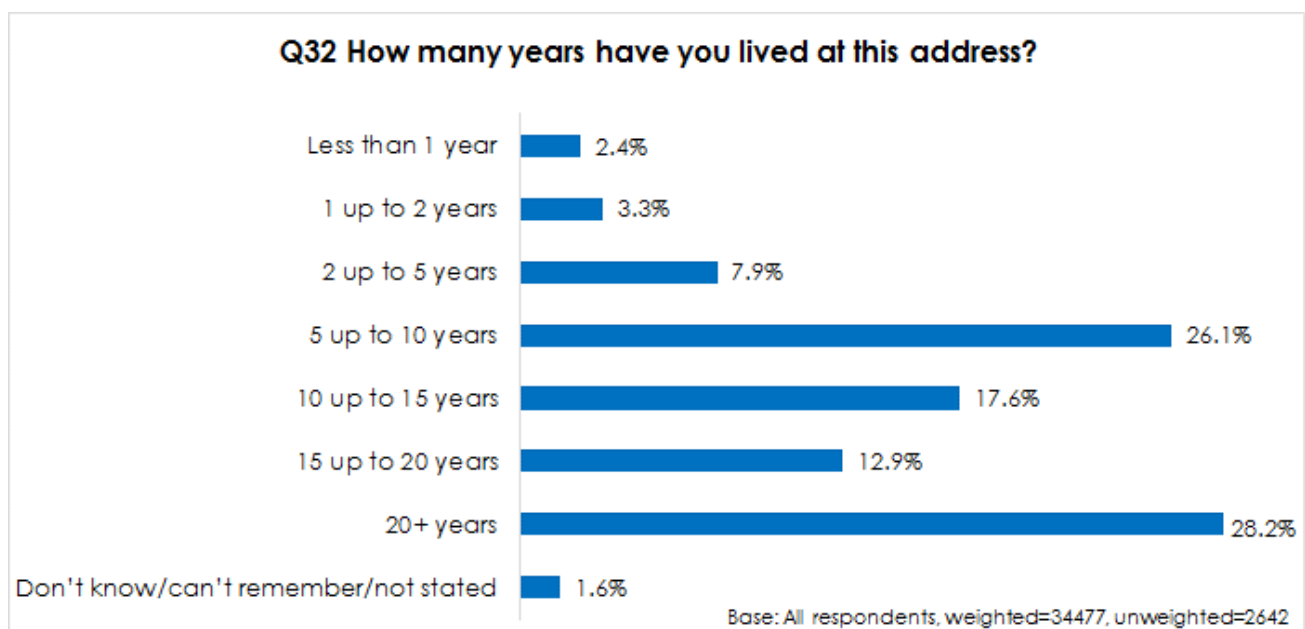

Residents who had lived at their property for between five to fifteen years (55%) and for more than fifteen years (55%) were significantly more likely to say their home was very or fairly easy to afford than residents who had lived at their property for less than five years (39%).

## 5.2 Length of time at current address

14% of respondents have lived at their current address for less than 5 years, compared to 44% who said between 5 and 15 years and 41% for more than 15 years.

Owner-occupiers (50%) were the most likely to have lived at their current address for more than fifteen years while those renting within the private sector (33%) were the most likely to have lived at their current address for less than five years.

### 5.3 Moving behaviour in the last five years

Those who had moved within the last 5 years were asked how many different addresses they have lived at in the last 5 years. The majority who had moved within the last 5 years had lived in just one other address (96%).

Residents living in Islay, Jura and Colonsay (84%) and Lorn (81%) were the most likely to have moved address within the same area. Kintyre residents (79%) were the most likely to have moved to their current address from elsewhere in Argyll and Bute while the area with the highest proportion of residents who moved to their current address from out with Argyll and Bute was Coll and Tiree (56%).

Area profile for all moves made in the last five years								
	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull and Iona	Lorn
Unweighted	34	21	72	38	38	27	38	62
Weighted	438	63	1735	232	471	406	237	1365
Same area	53.2%	46.0%	28.3%	83.6%	18.3%	29.3%	64.6%	81.2%
Elsewhere in Argyll & Bute	2.7%	-	36.4%	-	79.0%	40.6%	8.9%	15.8%
Out with Argyll & Bute	43.8%	55.6%	26.3%	13.8%	3.0%	30.0%	26.6%	3.1%
Don't know	-	-	8.8%	2.2%	-	-	-	-

Analysis by tenure shows that owner occupiers were slightly less likely to have moved to more than one address with 98% having lived in just one address in the last 5 years, compared to 96% who are renting from an RSL and 93% renting from a private landlord.

Owner-occupiers (69%) were the most likely to stay within the same tenure, followed by those renting from a private landlord (57%) and those renting from an RSL (44%).

More than one in ten residents (16%) who were previously owner-occupiers are now renting within the private sector while 8% have changed tenure from owner-occupier to renting from an RSL.

Just under three in ten respondents (28%) who previously lived with their parents or other relatives now rent from an RSL.

Tenure profile for all moves made in the last five years			
Previous tenure	Current tenure		
	Owner-occupier	PRS	RSL
<i>Unweighted</i>	157	75	98
<i>Weighted</i>	2105	1241	1600
Owner-occupier	69.0%	16.4%	8.3%
RSL	6.9%	3.5%	44.1%
PRS	8.5%	56.5%	16.1%
Lived with parents/relatives	12.9%	19.3%	27.8%
Other	2.8%	4.3%	3.4%

The main reasons provided for moving from their previous address was because residents wanted their own home (16%) and wanted a larger property or garden (12%).

## 5.4 Reason for moving to current home

The main reasons given for moving to their current home were the size of properties available (43%), a good general location (38%) and the type of properties available (32%).

Q34 What was the main reason why you decided to move into your current home?	
	All respondents
Unweighted	2642
Weighted	34477
Size of properties available	43.1%
Good general location	38.4%
Type of properties available	31.6%
Quiet/peaceful	29.2%
Always lived in this area/settled here	26.9%
Employment	26.2%
Good outlook/view	24.3%
Good value for money/property cost	20.7%
Safe area/low crime	17.9%
Nicely landscaped/ good open spaces	17.0%
Friends and family	15.9%
Permanent accommodation	7.3%
No choice/only place housing available	6.8%
Local services	5.6%
Good local schools	5.5%
Security of tenure	5.5%
Good facilities for children	4.7%
Other	4.5%
Good local leisure facilities	4.4%
Local shops	3.3%
Access to health/ social care services or facilities	2.5%
Had second/holiday home here	2.1%
Transport/accessibility	1.7%

Housing Association tenants were most likely to state that the reason they had moved into their current home was due to the type of properties available (31%) whereas the most common reason for those in private rented or rent free accommodation was 'employment' (43%).

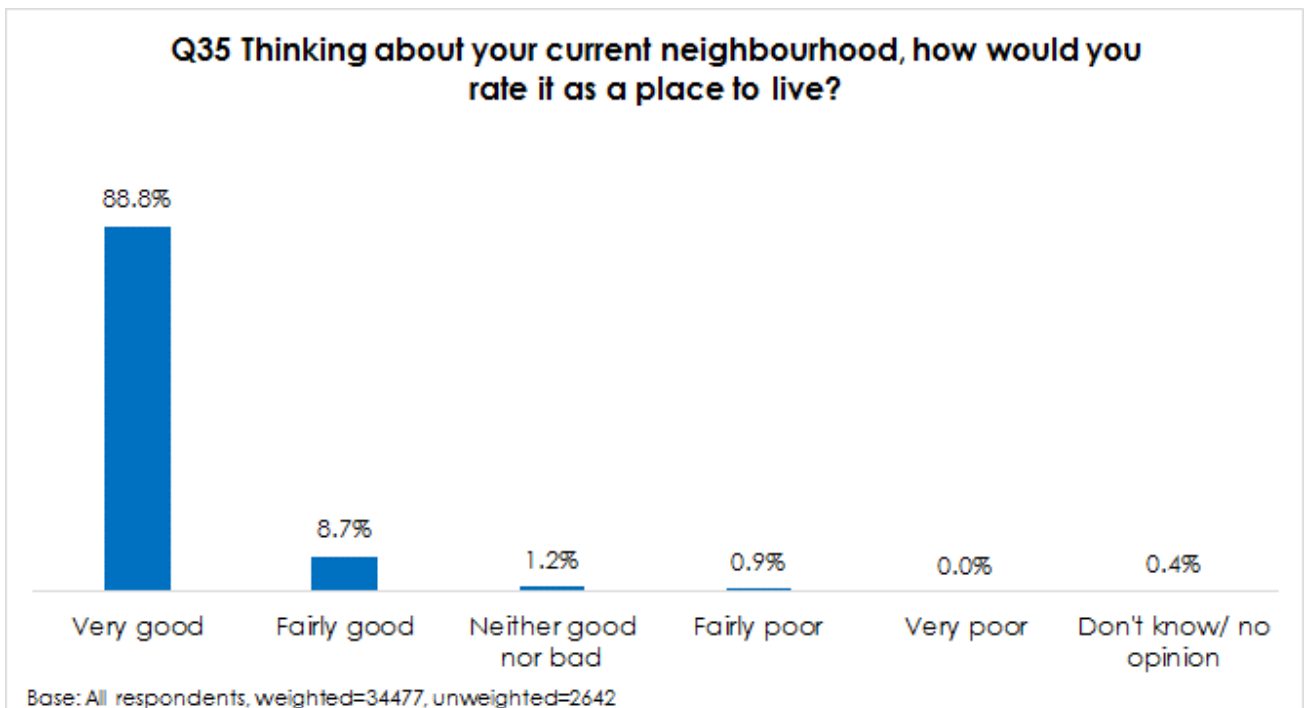

For owner occupiers, the main reasons were the fact that the general location was good (43%) and also due to the size of properties available (45%).

Analysis by age revealed the following:

- The size of properties available was important for all age groups, however more so for residents aged 35 to 54 (49%) than those aged 75 and over (37%).
- Moving for employment was cited as a reason for moving by 43% of 18 to 24 year olds, more than any other age group.
- One quarter of residents aged 35 to 54 (25%) said they moved due to good value for money and property cost compared to 16% aged 75 and over.
- Just under one third of respondents (30%) aged 18 to 24 said they moved to their current home because they had no choice or it was the only housing available.

### 5.5 Current neighbourhood

Almost all respondents (98%) rated their current neighbourhood as a very or fairly good place to live, compared to 1% who said neither good nor bad and 1% who said fairly poor.

Owner-occupiers (91%) were significantly more likely to rate their current neighbourhood as very good than those renting from a PRS (78%).

Respondents who had rated their neighbourhood as a poor place to live were most likely to do so due to problems with neighbours (55%), issues of drug abuse in the area (22%) and poor local leisure facilities (19%). Please note that respondents gave multiple responses to this question.

<b>Q36 Why do you say it is poor?</b>	
	<b>All who think neighbourhood is poor</b>
<i>Unweighted</i>	24
<i>Weighted</i>	327
Problem with neighbours	55.1%
Drug abuse	22.3%
Poor local leisure facilities	19.2%
Young people hanging about/ nothing for young people to do	14.9%
Poor local shops	11.8%
Alcohol abuse	9.2%
Don't feel part of the community	7.8%
Poor outlook/view	7.5%
Not stated	6.3%
Other (Please State	5.5%
Poor public transport	4.7%
Area poorly maintained/run down	3.7%
Too much traffic	2.5%
Fast/speeding traffic	2.5%
Poor local schools	1.8%
Unsafe area/ crime	1.2%
Vandalism	1.2%

## 6. FUTURE HOUSEHOLD FORMATION

### 6.1 Future household formation

When asked if there was anyone currently living in the household that would like to move into separate accommodation within the next few years, 5% of respondents said yes they would like to move in the next 2 years while 5% said they would like to move in the next 2 to 7 years. 6% of respondents answered don't know to this question.

The individuals who were likely to move into separate accommodation were almost exclusively children of the respondent.

When asked how many different properties were they likely to need, 82% said they would need one property while 18% said two.

The majority of future households likely to form (91%) will consist of single adults under the age of 60 years old.

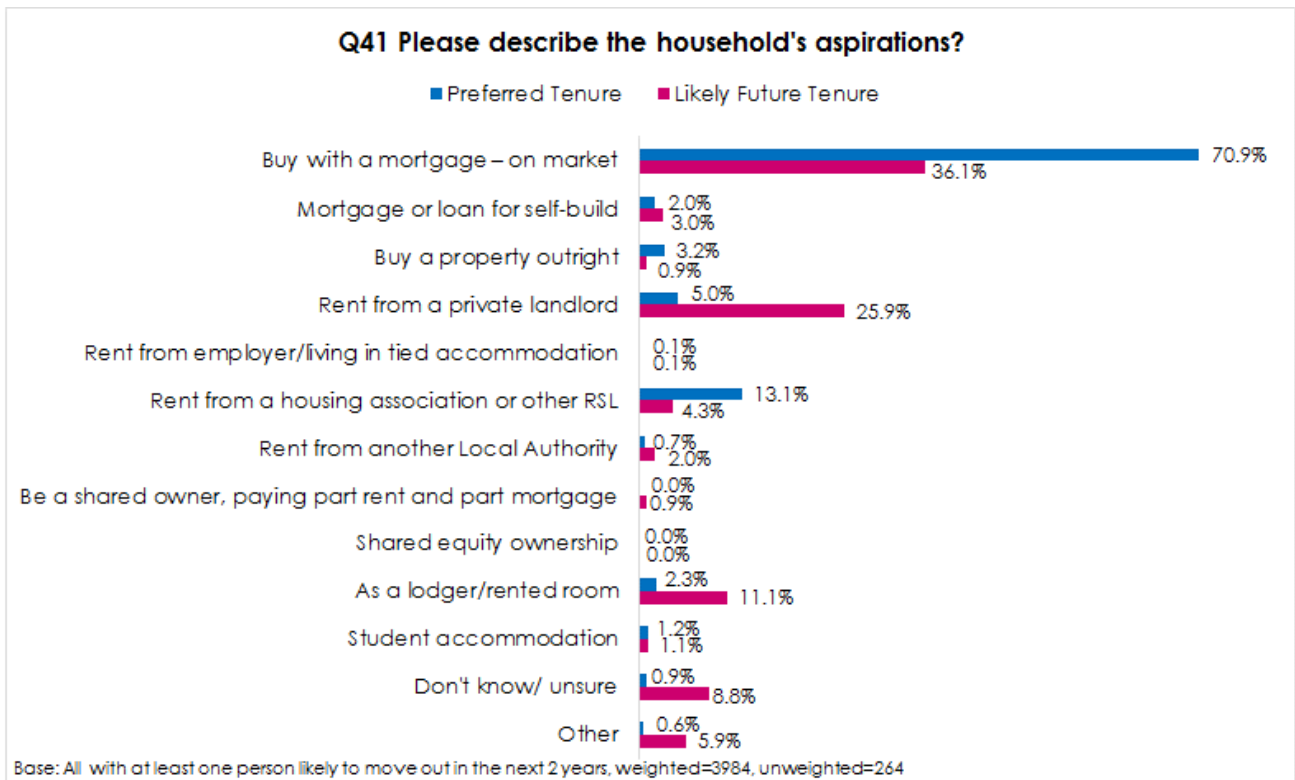

Q40 Please describe the households likely to form	
	All with someone likely to move out
Unweighted	264
Weighted	3984
Single Adult Under 60yrs	91.3%
Single Adult 60yrs+	0.6%
Two Adult Under 60yrs	2.4%
Two Adults (One Under 60yrs)	-
3+ Adults All over 16yrs	0.5%
1 Parent Family	1.6%
2 Parent Family	0.7%
Other	0.1%
Don't Know	2.7%

## 6.2 Future household aspirations

Analysis of household aspirations with regards to tenure reveals great disparities between preferred tenure and likely future tenure in the following ways:

- While more than 7 in 10 individuals (71%) likely to move would prefer to buy with a mortgage on the market, only 36% said this was likely to be their future tenure indicating the ability do so is not possible for nearly half of these individuals.
- More than 1 in 10 individuals would prefer to rent from a housing association or other registered social landlord, only 4% said this would be their likely future tenure.
- While only 5% said their preferred tenure would be renting from a private landlord, 25% said this was likely to be their future tenure.
- Becoming a lodger or renting a room in a property was cited as preferred tenure by 2% of respondents, yet more than five times this amount (11%) said it was likely to be their future tenure.

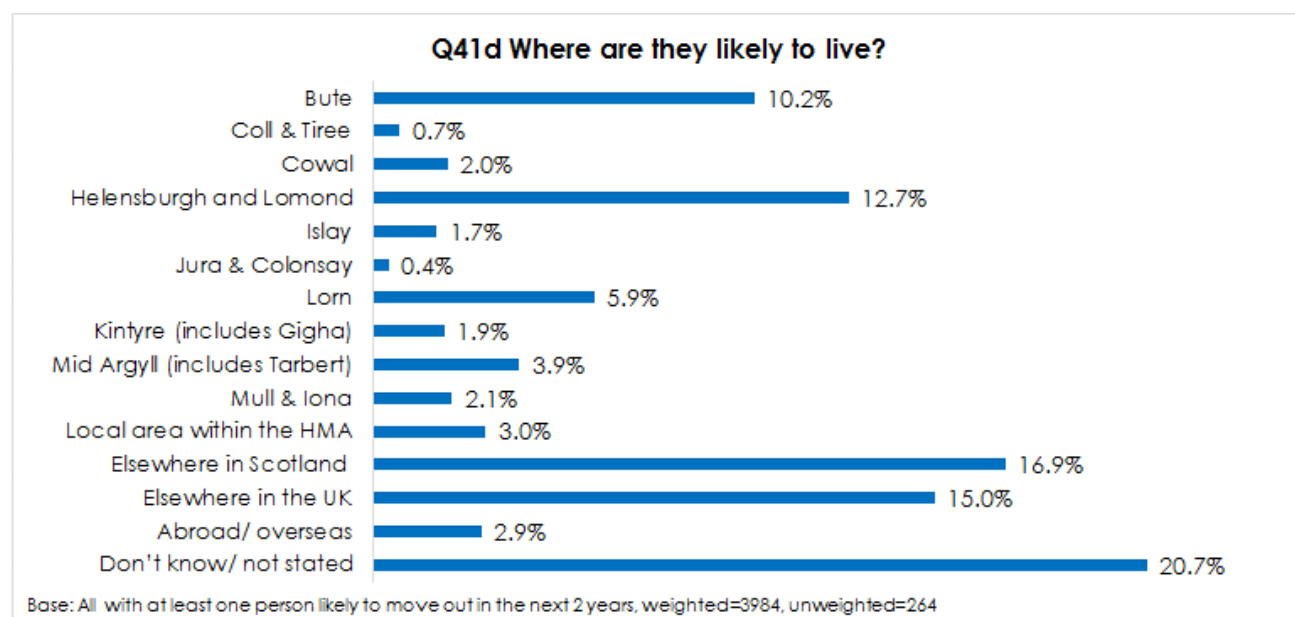

Further analysis into preferred tenure reveals residents who currently live in an owner-occupied property were the most likely to want to stay within the same tenure (87%). Residents currently living in an RSL property were split equally between owning their future property (45%) and renting from an RSL (45%). Residents currently living in a home that is privately rented were the least likely to prefer to remain within the same tenure (10%).

Tenure profile for future household formation in the next 2 years			
Preferred tenure	Current household tenure		
	Owner-occupier	PRS	RSL
Unweighted	207	29	28
Weighted	3037	481	466
Own property	87.0%	37.6%	45.3%
Rent from a private landlord	4.4%	10.0%	3.2%
Rent from RSL/ Council/ Housing Association	3.6%	48.2%	44.6%
Other	4.9%	4.2%	6.9%

More than 1 in 10 individuals (12%) likely to move out in the next 2 years are currently on a waiting list.

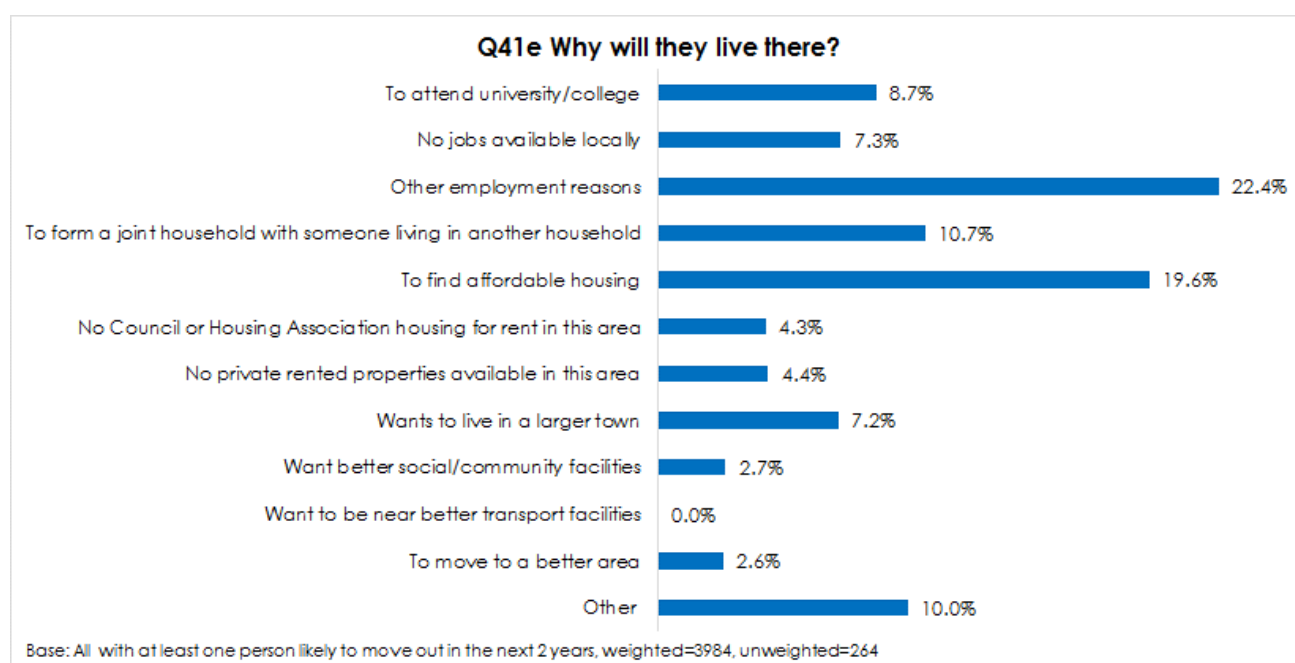

Just over one fifth (21%) of individuals were unsure where they are likely to live while just under one third (32%) are likely to move out with Argyll in Bute to elsewhere in Scotland or the U.K.

Mull and Iona residents (61%) are the most likely to move within the same area while Lorn residents (9%) are the least likely. Bute (75%) and Coll & Tiree (71%) residents are the most likely to move out with Argyll and Bute.

Area profile for future household formation in the next 2 years								
	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull and Iona	Lorn
Unweighted	8	10	16	29	37	48	23	93
Weighted	99	38	360	150	443	718	137	2040
Same area	25.3%	21.1%	15.6%	44.0%	11.5%	12.3%	61.3%	8.5%
Elsewhere in Argyll & Bute	-	-	46.1%	-	18.3%	18.8%	4.4%	40.8%
Out with Argyll & Bute	74.7%	71.1%	38.3%	31.3%	37.7%	30.9%	33.6%	32.6%
Don't know	-	10.5%	-	24.7%	32.5%	37.7%	-	18.0%

The main reason given for the desire to move was for employment related issues, either because there are no jobs available locally (7%) or for other employment reasons (22%). This was followed by moving to find affordable housing (20%).

### 6.3 Barriers to forming new households

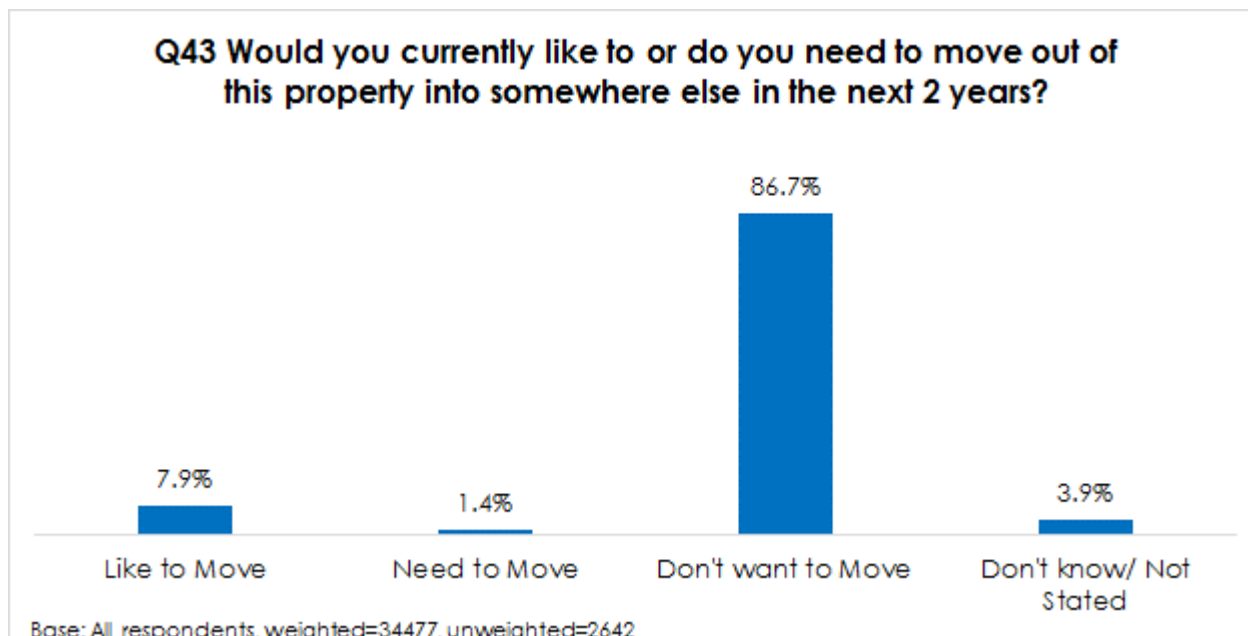

When asked what might prevent the person(s) concerned from moving out of their current property, 21% said there was nothing that would prevent them moving.

Where a barrier was present, 50% said this was due to financial constraints while 23% said there was a lack of availability in their area of choice. 2% said they might be restricted as they require specialist accommodation or support that is not available.

## 7. FUTURE INTENTIONS OF CURRENT HOUSEHOLDS

### 7.1 Current household moving intentions

Just 8% of households surveyed stated that they would like to move in the next 2 years and a further 1% stated that they need to move.

The proportion of individuals who said they would like to move was significantly higher for those in the privately rented sector (28%) than it was for owner-occupiers (6%) and registered social landlord tenants (6%).

Residents in the privately rented sector (55%) were also significantly less likely to say that they did not want to move compared to owner-occupiers (90%) and registered social landlord tenants (90%).

Respondents who said they did not want to move in the next 2 years were asked how they felt about moving from their current home. The majority (91%) said they had no plans to move at all, while 1% said they are planning on moving in the next 2 to 7 years and a further 4% said they may possibly move but not for more than 7 years.

Analysis by tenure reveals RSL tenants were the least likely to say they are planning to move in the next 2 to 7 years (0%) and also the least likely to say they will possibly move but not for more than 7 years (1%). Residents in the privately rented sector were the most likely to say they were planning on moving in the next 2 to 7 years (8%) and also the most likely to say they will possibly move but not for more than 7 years (7%).

### Which of the following best describes how you feel about moving from this your current home by tenure

■ I am planning on moving in the next 2 to 7 years ■ I will possibly move but not for more than 7 years

Base: owner-occupier W=22466 UW=1810, PRS W=2334 UW=158, RSL W=6445 UW=437

## 7.2 Future housing options

The most common housing option that respondents said they would like or need was to be an owner-occupier on the open market (61%) followed by renting from a Housing Association (26%).

### Q45 To which of the following housing options would you like or need?

Base: All who would like or need to move, weighted=4723, unweighted=330

### 7.3 Reasons for moving

The most common reasons provided for respondents wanting or needing to move were for a smaller home (30%), to reduce housing costs (24%) and to move to a different kind of environment (23%).

Q47 What are the main reasons why you would like OR need to move at present?	
	All who would like or need to move
Unweighted	330
Weighted	4723
Smaller home	30.2%
Reduce housing costs	23.6%
Different kind of environment	23.3%
Bigger home	16.8%
Change of job	13.0%
Retirement	12.4%
More permanent accommodation?	11.7%
Garden/larger garden	9.9%
To be nearer family/friends	9.8%
Better access to health or social care facilities	9.1%
Illness/disability	8.8%
Children left home	8.5%
Better neighbourhood	7.3%
Don't know/ not stated	6.7%
Addition to family	5.4%
Start/increase housing investment	4.9%
Other housing reasons	4.1%
New relationship/marriage	3.2%
Other non-housing reasons	2.9%
Death of member of family	2.7%
Nearer current work place	2.0%
Relationship breakdown/divorce/separation	1.9%
Need some form of specialist accommodation e.g. Sheltered/supported accommodation	1.3%
For better services/facilities	0.8%

Analysis by tenure reveals significant variances with regards to the main reasons for moving in the following ways:

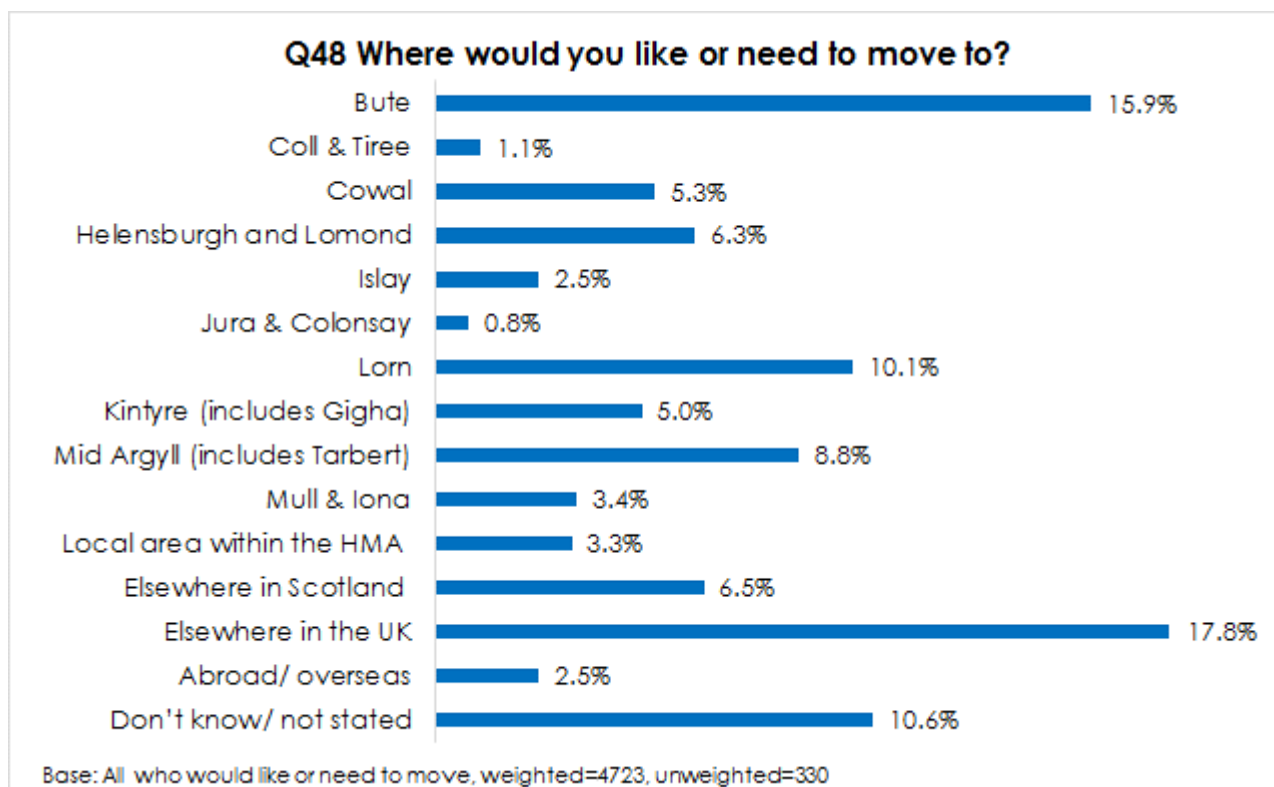

- A change of job was provided as a reason for moving by PRS tenants (25%) more so than owner-occupiers (8%) or RSL tenants (7%).
- Moving due to children leaving the home was of more concern to owner-occupiers (13%) than PRS tenants (1%).
- A bigger home was of the most concern to RSL tenants (28%) while a smaller home was of the most concern to owner-occupiers (45%).

- Just under three in ten (29%) RSL tenants who would like or need to move would do so to have a garden or larger garden than they currently have. This is compared to 8% of owner-occupiers and 7% of PRS tenants.
- Moving to reduce housing costs was the biggest concern for PRS tenants (39%), followed by owner-occupiers (19%) and RSL tenants (7%).
- Moving for more permanent accommodation was cited as a reason for moving by more than a third of PRS tenants (38%) which is significantly higher than owner-occupiers (1%) and RSL tenants (3%).

<b>Q47 What are the main reasons why you would like OR need to move at present by tenure</b>			
	<b>Owner-occupier</b>	<b>PRS</b>	<b>RSL</b>
<i>Unweighted</i>	205	82	43
<i>Weighted</i>	2810	1371	542
Change of job	8.2%	25.2%	6.9%

Don't know/not stated	10.2%	-	5.5%

## 7.4 Housing aspirations

Just under one quarter of respondents (24%) said they would like or need to move from Argyll and Bute to elsewhere in Scotland or the U.K. The most popular areas to move to within Argyll and Bute are Bute (16%) and Lorn (10%). More than one in ten respondents who said they would like or need to move (11%) said they did not know where they would move to or did not provide an answer to this question.

Just under one quarter (24%) of owner-occupiers who said they would like or need to move said they would move to elsewhere in the U.K. Owner-occupiers were more than twice as likely to choose this option than PRS tenants (11%) and almost five times more likely than RSL tenants (5%).

The most popular areas for PRS tenants who would like or need to move were Bute (15%) and Lorn (15%).

Just under three in ten RSL tenants (29%) who would like or need to move would choose to move to Bute while one fifth (20%) would choose Mid Argyll.

<b>Q48 Where would you like or need to move to by tenure</b>			
	<b>Owner-occupier</b>	<b>PRS</b>	<b>RSL</b>
<i>Unweighted</i>	205	82	43
<i>Weighted</i>	2810	1371	542
Bute	14.0%	14.7%	28.9%
Coll & Tiree	1.0%	1.8%	0.4%
Cowal	2.3%	10.2%	9.0%
Helensburgh and Lomond	6.4%	7.9%	2.1%
Islay	2.7%	0.7%	6.1%
Jura & Colonsay	0.2%	1.8%	1.5%
Lorn	9.9%	14.7%	-
Kintyre (includes Gigha)	4.7%	5.1%	6.2%
Mid Argyll (includes Tarbert)	6.9%	8.3%	19.5%
Mull & Iona	3.0%	3.3%	5.8%
Local area within the HMA	3.4%	4.5%	-
Elsewhere in Scotland	5.6%	7.3%	9.1%
Elsewhere in the UK	23.6%	11.2%	4.9%
Abroad/ overseas	4.2%	-	-
Don't know/ not stated	12.3%	8.6%	6.4%

The most common reasons provided for moving to their chosen area was to be closer to family and friends (33%), followed by a greater variety of housing choices (30%), for more affordable housing (21%), for more employment opportunities (20%) and for a better quality of life (20%).

<b>Q49 Please could you provide reasons as to why you would like or need to move there?</b>	
	<b>All who would like or need to move</b>
<i>Unweighted</i>	330
<i>Weighted</i>	4723
Closer to Family/Friends	32.8%
Greater variety of housing choices	30.0%
More Affordable Housing	21.0%
More Employment Opportunities	20.1%
Better Quality of Life	19.7%
Access to health and social care facilities/ services	10.8%
Other	10.0%
Don't know/not stated	7.8%
Move nearer to place of employment	4.1%
Schooling	3.8%

Analysis by tenure reveals the following:

- Moving for more affordable housing was of most concern for PRS tenants (40%). PRS tenants were more than three times as likely to cite affordable housing as a reason to move than owner-occupiers (13%) and more than twice as likely than RSL tenants (15%).
- More than one third of owner-occupiers (34%) who would like or need to move would do so for a greater variety of housing choice, compared to 18% of RSL tenants.
- Employment opportunities were cited as a reason to move by 38% of PRS tenants which is significantly higher than owner-occupiers (13%) or RSL tenants (16%).
- Moving to achieve a better quality of life was of most concern for RSL tenants (30%) and of least concern to owner-occupiers (17%).

<b>Q49 Please could you provide reasons as to why you would like or need to move there by tenure</b>			
	<b>Owner-occupier</b>	<b>PRS</b>	<b>RSL</b>

£1,000 or more	0.4%
Don't know/not stated/Refused	48.6%

## 7.6 Likelihood of moving

Those who would either like or need to move were asked how likely they were to move into somewhere else within the next 2 to 7 years. Respondents who need to move (79%) are much more likely to say that they will move compared to those who would like to move (65%).

Analysis by tenure revealed:

- PRS tenants (61%) were the most likely to say they were very or fairly likely to move within the next 2 to 7 years, followed by owner-occupiers (60%) and RSL tenants (57%).
- PRS tenants (31%) were also the most likely to say they were not very or not at all likely to move within the next 2 to 7 years. This is compared to 24% of RSL tenants and 21% of owner-occupiers.
- Owner-occupiers (20%) and RSL tenants (19%) were more than twice as likely as PRS tenants (8%) to say that they did not know how likely they were to move out of their property in the next 2 to 7 years.

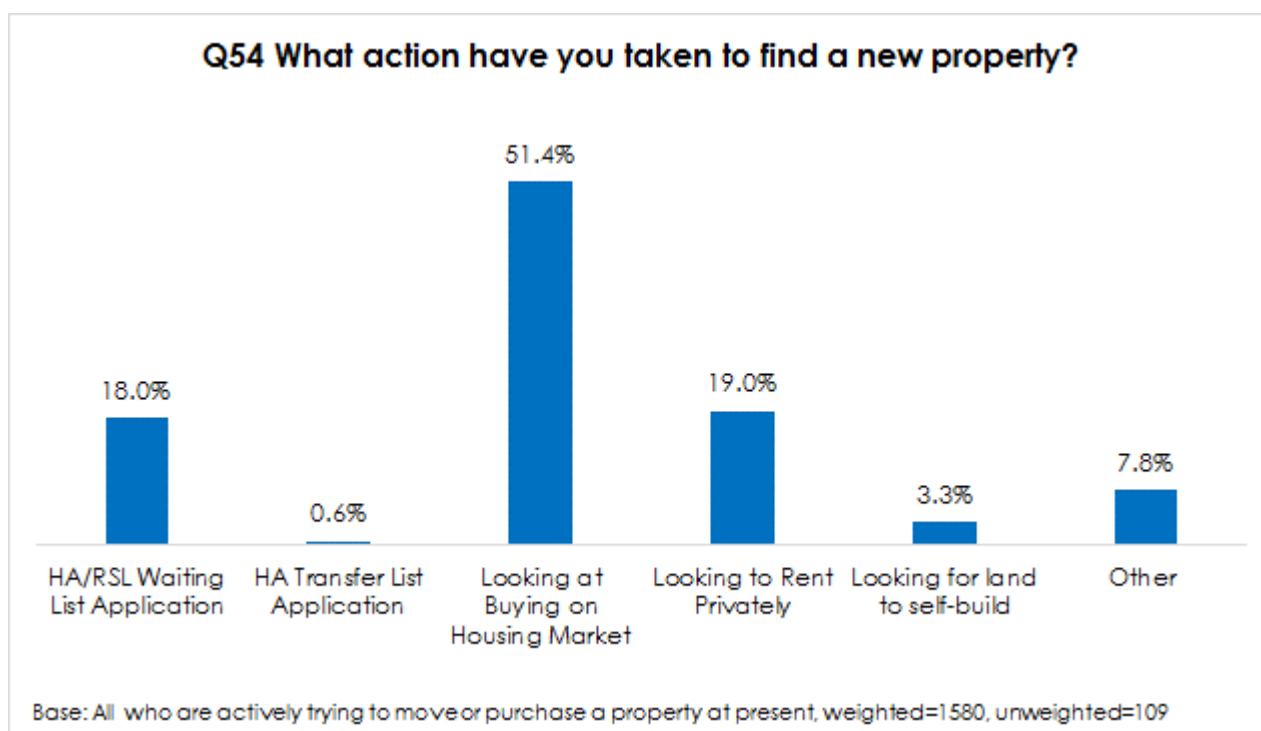

Analysis by age of head of household revealed residents aged 75 and over were the most confident about their likelihood of moving from their property within the next 2 to 7 years. 83% stated they were likely to move, compared to only 5% who stated they were unlikely to move and 12% who stated they did not know.

Respondents aged 35 to 54 were the most unsure, with 50% stating they were likely to move, 35% stating they were unlikely to move and 15% stating they did not know.

More than half of respondents (56%) who said they were very or fairly likely to move in the next 2 to 7 years said they were actively trying to move or purchase a property at present.

Respondents who said they would like to move (75%) were significantly more likely to say they were actively trying to move or purchase a property at present compared to respondents who said they need to move (16%).

Just over half (51%) of respondents who are actively trying to move or purchase a property at present are looking at buying on the housing market, while 19% are looking to rent privately and 18% are on the waiting list with a Housing Association or other registered social landlord.

Respondents who said they would like to or need to move but who also said they were not likely or not actively trying to move were asked why this was. The most common reasons provided were financial constraints (42%), housing is too expensive (29%) and lack of available property in the area (34%).

<b>Q55 If you are not likely to move or not actively trying to move, why?</b>	
	<b>All who would like or need to move but not likely to</b>
<i>Unweighted</i>	217
<i>Weighted</i>	3122
Financial Constraints	42.3%
Housing too Expensive	28.9%
Lack of available property in area	33.9%
Lack of suitable property	25.1%
Lack of specialist accommodation e.g. sheltered or supported	1.4%
Would prefer to receive care or support in my current home	5.9%
Lack of support to move	0.7%
Lack of information and advice on options available	0.6%
Still undecided	3.2%
Not ready to move	8.6%
Not stated/ refused	4.2%
Waiting for children to move out	1.8%
Other	6.9%

Households made up of two adults (both under 65) (65%) were the most likely to cite financial constraints as a barrier towards moving, followed by two parent families (54%) single adults (under 65) (52%) and one parent families (51%).

<b>Financial constraints by household composition</b>	
	<b>All who would like or need to move but not likely</b>
<i>Unweighted</i>	217
<i>Weighted</i>	3122
2 adults (both under 65)	64.8%
2 parent family	54.1%
Single adult (under 65)	51.8%
1 parent family	51.3%
3+ adults / other/ refused	19.1%
2 adults (at least one 65 and over)	13.4%
Single adult (65 and over)	0.0%

More than two thirds of PRS tenants (69%) who would like or need to move but aren't likely to cited financial constraints as a barrier towards moving.

Financial constraints by tenure	
	All who would like or need to move but not likely
<i>Unweighted</i>	217
<i>Weighted</i>	3122
PRS	68.6%
RSL	45.5%
Owner-occupier	28.4%

Households made up of two adults (both under 65) (42%) were the most likely to cite housing being too expensive as a barrier towards moving, followed by two parent families (40%) single adults (under 65) (34%) and one parent families (30%).

Housing too expensive by household composition

Semi-detached House	19.9%
Other	18.3%

## 7.7 Do not want or need to move

Those who did not want or need to move stated that this was generally due to the fact that they were:

- happy where they were (87%),
- happy with their home (64%),
- like the area (49%),
- quiet/ peaceful (34%), and
- nice neighbours (28%).

Respondents who said they did not or want or need to move were then asked if their housing circumstances were to change in the future, what housing options would they consider to meet their needs. Just over half of these respondents (53%) said being an owner-occupier on the open market would meet their needs, while 22% said renting from a housing association. Just over one fifth (21%) said they did not know.

The table below shows preferred housing options by age of the head of household. Younger residents aged 18-24 (80%) were the most likely to prefer to rent from a housing association if their housing circumstances were to change and were the least likely to prefer to become an owner-occupier on the open market (7%). Older residents aged 65-74 (28%) and aged 75 and over (41%) were the most likely to answer don't know to this question.

<b>Q57 If your housing circumstances were to change in the future, which of the following options would you consider to meet your needs?</b>							
	<b>18-24</b>	<b>25-34</b>	<b>35-54</b>	<b>55-64</b>	<b>65-74</b>	<b>75+</b>	<b>Refused</b>

## 8. INDIVIDUAL NEEDS

### 8.1 Health conditions

One quarter of respondents (25%) said someone in their household has a long-term illness, health problem or disability, which limits their daily activities or the work they can do. This included problems relating to old age.

More than seven in ten respondents (71%) said there was no one in their household who suffered from any illness or health issue. The most commonly cited health issue was a mobility/ physical health problem (15%) followed by frailty due to old age (5%).

Q60 Is there anyone in the household who suffers from any of the following?	
	All respondents
<i>Unweighted</i>	2642
<i>Weighted</i>	34477
None of these	71.3%
Mobility/Physical health problem	14.8%
Being frail due to old age	4.7%
A chronic disease (such as cancer, HIV, diabetes, heart disease or epilepsy)	3.5%
Difficulties with hearing	3.3%
Don't know/Refused	2.8%
Mental ill health	2.5%
Difficulties with sight	1.6%
Learning difficulties	1.1%
Dementia	1.0%
Developmental disorder	0.5%
Other	0.4%
Drug/Alcohol dependency	0.0%

Analysis by age reveals:

- Those aged 25-34 (92%) were the most likely to say there was no one in their household who suffered from any illness or health issue while those aged 75 and over (38%) were the least likely.
- Respondents aged 75 and over (37%) were most likely to suffer from, or live with someone who suffers from a mobility/ physical health problem
- Younger respondents aged 18-24 (6%) were most likely to suffer from, or live with someone who suffers from mental ill health
- Respondents aged 75 and over were most likely to suffer from, or live with someone who suffers from difficulties with sight (6%) and hearing (9%)
- More than one fifth (21%) of respondents aged 75 and over suffer with, or live with someone who suffers with being frail due to old age.
- Respondents aged 65-74 (7%) were most likely to suffer from, or live with someone who suffers from a chronic disease.

<b>Q60 Is there anyone in the household who suffers from any of the following by age of head of household</b>							
	<b>18-24</b>	<b>25-34</b>	<b>35-54</b>	<b>55-64</b>	<b>65-74</b>	<b>75+</b>	<b>Refused</b>

Other	0.5%	0.3%	0.0%

## 8.2 Current needs

Almost all respondents (97%) with someone who suffers from a health condition in their household said their current housing meets their needs very or fairly well.

The vast majority (97%) of respondents said there was no one in their household with any unmet needs with regards to special forms of housing.

<b>Q62 Do you or anyone in your household have an UNMET NEED for any of the following SPECIAL FORMS OF HOUSING?</b>	
	<b>All with someone who suffers</b>
<i>Unweighted</i>	708
<i>Weighted</i>	8915
None	96.8%
Accommodation without stairs	1.0%
Sheltered housing (with warden)	0.9%
Retirement/ older persons housing	0.7%
Residential care/ nursing home	0.4%
Accommodation suitable for a wheelchair	0.3%
Very Sheltered/ Extra care housing	0.3%

While the majority of respondents said no one in their household needs any special forms of support, 1% said they need regular contact with social services, health or other caring organisations but do not receive this support and 1% said they need further support but less than 24-hour support from social services, health or other caring organisation but do not receive this.

<b>Q63 Do you or anyone in your household need any of the special forms of support?</b>			
<b>Base: All with someone who suffers, weighted = 8915, unweighted =708</b>	<b>Need and receive</b>	<b>Need but don't receive</b>	<b>Don't need</b>
Regular contact with social services, health or other caring organisations	35.5%	0.8%	63.6%
Further support but less than 24-hour support from social services, health or other caring organisation	11.6%	0.5%	87.9%
24-hour support from other caring organisations	1.6%	0.1%	98.3%
Shared housing with support from other residents and caring organisations	0.5%	0.1%	99.3%

With regards to special forms of adaption, 3% said they need but don't have level access showers while 2% said they need but do not have handrails.

<b>Q64 Do you or anyone in your household have any of the following special forms of adaption?</b>			
<b>Base: All with someone who suffers, weighted =708, unweighted =8915</b>	<b>Have</b>	<b>Need but don't have</b>	<b>Do not need</b>
Door widening	2.3%	0.3%	97.4%
Ramps	6.9%	0.3%	92.8%
Stairlift	3.0%	0.8%	96.2%
Through floor lift	0.7%	-	99.3%
Accommodation with emergency/alarm call system	10.1%	0.1%	89.8%
Door entry system	5.3%	0.1%	94.6%
Relocated light switches and power points	1.2%	0.1%	98.7%
Equipment to help get in and out of bed	4.4%	0.3%	95.3%
Handrails	39.9%	1.5%	58.6%
Hoists	1.7%	-	98.3%
Bath/shower seat	27.6%	1.1%	71.3%
Level access showers	29.6%	2.9%	67.4%
Adapted toilet seat	14.7%	0.5%	84.8%
Adapted kitchen	0.5%	0.3%	99.3%
Special furniture	1.4%	0.1%	98.5%

One fifth of respondents (20%) who said their home required adaptations said they have not taken action to access the adaptations they currently need as they require more information and advice. 17% said they have already contacted social services while 14% plan to install them themselves.

### 8.3 Care and support services

When asked if there was anyone in the household who required care and support services the majority of respondents stated these services were not required.

In terms of current services already in place, the most common involved home care and home help with 5% receiving this service and 4% who currently receive help with their shopping.

<b>Q66 In terms of care/ support provided, do you or anyone in your household currently receive or need these services?</b>			
<b>Base: All respondents, weighted=34477, unweighted=2642</b>	<b>Current Services</b>	<b>Services Required</b>	<b>Services not required</b>
Home care/ home help (helping with housework, cooking, cleaning)	4.8%	0.3%	94.9%
Home care (helping with washing/ bathing, dressing, toilet)	1.7%	0.0%	98.2%
Meals delivered to home/ meals on wheels	0.7%	0.1%	99.1%
Day care/ day centre (in hospital, residential home or other organisation)	0.7%	0.0%	99.3%
Respite/ short term care in residential/ nursing home	0.5%	0.0%	99.5%
Occupational therapy/ physiotherapy	2.5%	0.1%	97.4%
Help with shopping	3.9%	0.1%	96.0%
Night care (someone present at night only)	0.2%	0.0%	99.8%
Technology enabled care	0.5%	0.0%	99.4%
Support from local voluntary & community organisations	1.7%	0.0%	98.3%
Carers Support	1.4%	0.1%	98.5%
Other	0.0%	0.0%	100.0%

Just under one third (30%) of care and support services already in place are provided by the Council, while 27% are provided by a relative who does not stay in the same household. Just under one fifth (19%) are provided by a private organisation.

<b>Q67a Who is the carer?</b>	
	<b>All respondents who currently receive care or support services</b>
<i>Unweighted</i>	460
<i>Weighted</i>	6405
Provided by Council	29.9%
Other Relative	27.1%
Private Organisation	19.1%
Provided by voluntary organisation	8.5%
Other Household Member	6.6%
Other	3.2%
Don't know/not stated	3.0%
Friend	1.7%
Neighbour	0.9%

One quarter of carers (25%) are between 1 to 5 miles away from the resident while 20% are 5 to 10 miles away. 1 in 10 residents (10%) receive care from someone at the same address or building.

<b>Q67b Distance?</b>	
	<b>All respondents who currently receive care or support services</b>
<i>Unweighted</i>	460
<i>Weighted</i>	6405
Same address/ building	10.4%
Neighbouring/in neighbourhood	13.8%
Up to 1 mile away	10.9%
Over 1 up to 5 miles away	24.7%
Over 5 up to 10 miles away	19.9%
Over 10 up to 20 miles away	5.8%
Over 20 miles away	2.0%
Don't know / not stated	12.4%

Just under one third of residents (30%) receive care and support services for 2 to 4 hours per week while 17% said it varies, 16% said between 5 to 10 hours per week and 16% for less than two hours per week.

<b>Q67c How many hours per week?</b>	
	<b>All respondents who currently receive care or support services</b>
<i>Unweighted</i>	460
<i>Weighted</i>	6405
Less than 2 hrs p/wk	15.7%
2-4 hours p/wk	30.0%
5-10 hours p/wk	16.3%
11-19 hours p/wk	4.8%
20-49 hours p/wk	3.5%
50 or more hours p/wk	0.6%
Continuous care	9.2%
It varies	16.6%
Don't know/ Not stated	3.3%

Overall, two thirds (69%) of care and support services are not paid, while 31% are paid. Services which are most likely to be paid include technology enabled care (89%), home care that includes helping with housework, cooking and cleaning (51%) and meals that are delivered to the home (51%).

<b>Q67d Paid care?</b>			
	<b>Base</b>	<b>Yes</b>	<b>No</b>
Home care/ home help (helping with housework, cooking, cleaning)	Weighted=1638	51.1%	48.9%

	Unweighted=1		

## 9. HOUSEHOLD INCOME

### 9.1 Household income

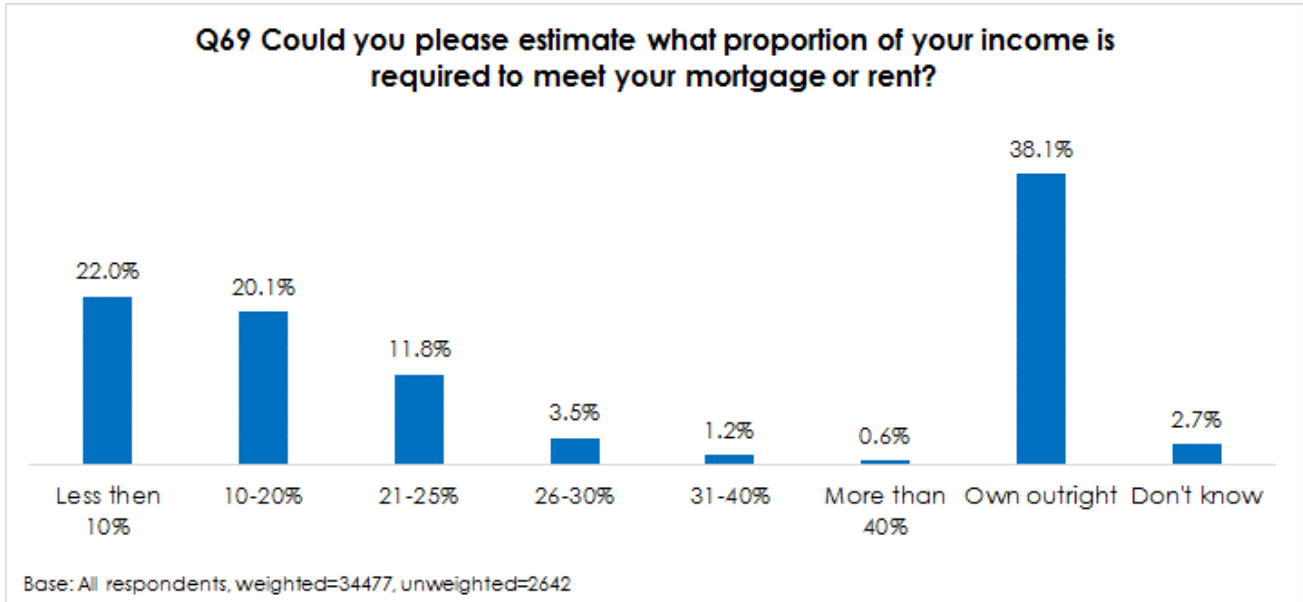

Just over half of respondents (53%) refused to provide an answer when asked for a combined total gross income for themselves and their partner. Where an answer was provided, 19% said their total gross income was under £25,000 while 28% said it was over £25,000.

When asked to provide an estimate of the total gross income of all other adults aged 16 and over in the household, 85% refused to provide an answer. Where an answer was provided, 13% said the total gross income for other adults in the household was under £25,000 while 1% said it was over £25,000.

Q68 What is the total gross income for:		
	Respondent & Partner	Other HH Adult/s
Unweighted	2642	829
Weighted	34477	11871
Under £4,500	0.2%	0.5%
£4,500-£6,499	0.5%	1.5%
£6,500-£7,499	0.9%	0.1%
£7,500-£9,499	1.3%	0.8%
£9,500-£11,499	1.6%	0.8%
£11,500-£13,499	2.1%	1.2%
£13,500-£15,499	2.2%	0.3%
£15,500-£17,499	3.2%	1.2%
£17,500-£24,999	6.5%	1.0%
£25,000-£29,999	5.9%	0.8%
£30,000-£39,999	9.4%	0.0%
£40,000-£49,999	5.9%	0.0%
£50,000-£74,999	5.2%	0.2%
£75,000-£99,999	0.5%	-
£100,000 or over	0.7%	0.1%
Don't know/not stated/ Refused	53.4%	85.3%
Nothing	0.5%	6.0%

## 9.2 Housing payments

More than one third of respondents (38%) own their property outright and therefore do not pay a portion of their income towards rent or mortgage payments. 24% pay less than 10% of their income towards their mortgage and rent payments, 20% pay between 10-20% and 17% pay more than 20%.

Analysis by age reveals younger respondents aged 18-24 (40%), 25-34 (44%) and 35-54 (27%) were significantly more likely to pay more than 20% of their income towards rent or mortgage payments than older respondents aged 55-64 (15%), 65-74 (4%) and 75 and over (5%).

Analysis by tenure reveals PRS tenants (39%) were significantly more likely to pay more than 20% of their income towards rent or mortgage payments than RSL tenants (23%) and owner-occupiers (13%).

Respondents were then asked if there was any reason why they might experience difficulties in keeping up with their housing payments. The majority of respondents (87%) said they are not having any difficulties in meeting their housing payments. The most commonly cited reason for having difficulties was unexpected high bills (4%).

<b>Q70 The following lists various reasons why some people experience difficulties in keeping up with housing payments. Do any of them apply to this household?</b>	
	<b>All respondents</b>
<i>Unweighted</i>	2642
<i>Weighted</i>	34477
No, not having any difficulties meeting housing payments	87.2%
Don't know/not stated/refused	3.9%
Unexpected high bills	3.6%
Increase in rent/mortgage payments	2.3%
Cost of heating home too expensive	2.3%
Illness/disability of self/partner	1.7%
Other (Please State)	1.6%
Loss of job	1.3%
Death of partner or someone else in household	1.0%
Divorce/separation or some other reason for household splitting	0.8%
Loss of partner's job	0.7%
Reduced benefits	0.4%
Supporting unemployed 16-17 year-olds	0.4%
Failure of business	0.3%
Baby born or someone else joining household	0.3%
Interest rate rises	0.1%
Supporting full-time students	0.1%
Delay in Housing Benefit/Income Support payments	0.0%
Administrative error at bank/building society	0.0%

### 9.3 Housing circumstances

Respondents were then read a list of potential household problems and asked to state whether each was 'not a problem', a 'slight problem' or a 'serious problem' for them. As shown below, the most common issues to be seen as a problem was accommodation being too expensive (4% stating a serious or slight problem) and difficulty maintaining the home (4% stating a serious or slight problem).

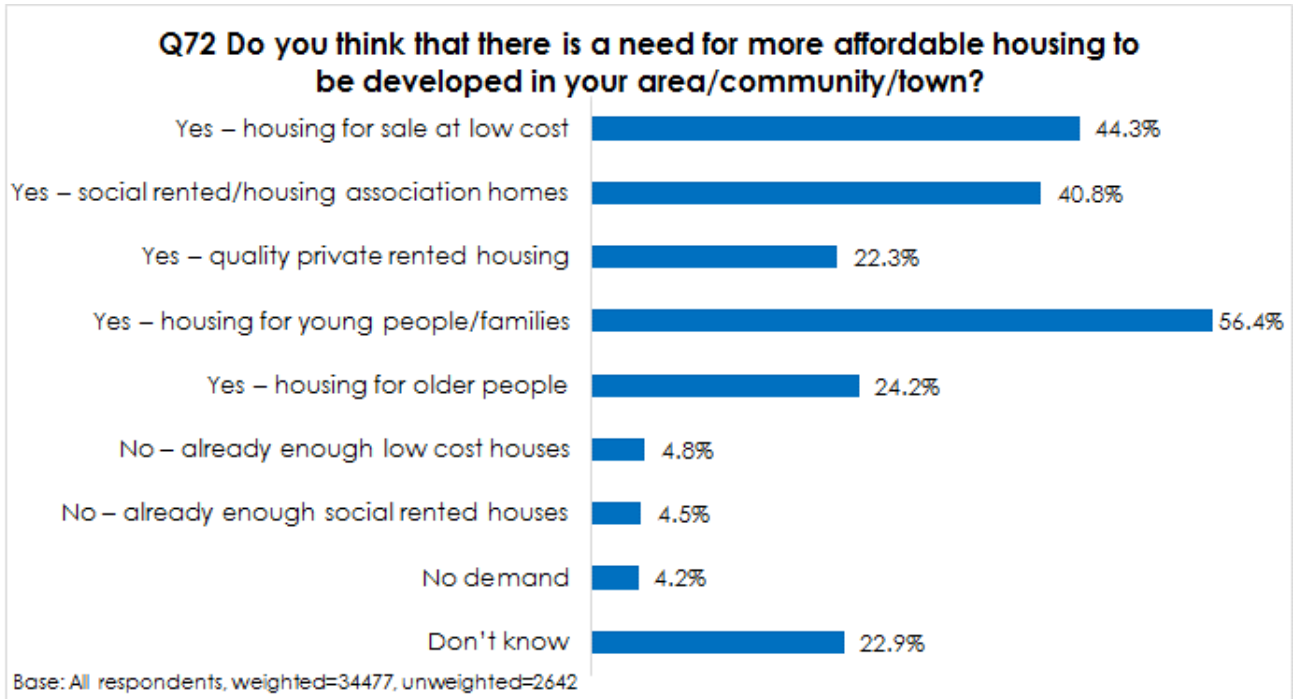

<b>Q71 Please indicate for each of the following if it is not a problem/ not applicable; a slight problem; or a serious problem for your household?</b>			
<b>Base: All respondents, weighted =34477, unweighted=2642</b>	<b>A serious problem</b>	<b>Slight Problem</b>	<b>Not a problem</b>
Your accommodation is too expensive	1.0%	3.4%	95.5%
You are under notice of eviction/repossession, real threat of notice or your lease is coming to an end (i.e. insecure tenure/temporary accommodation/ threatened with homelessness etc)	0.2%	0.2%	99.6%
Someone in the household is suffering harassment or threats of harassment from neighbours or others in the area	0.3%	0.1%	99.6%
The health of a household member is suffering because of the condition of the home	0.4%	0.2%	99.4%
Your home is subject to major disrepair or unfitness	0.5%	0.2%	99.3%
You have difficulty maintaining your home	0.7%	3.0%	96.3%
You have to share a bathroom/toilet/kitchen with another household	0.2%	0.3%	99.5%
You lack basic facilities (such as bathroom/toilet/ kitchen)	0.2%	0.0%	99.8%
A household member has difficulty using the stairs and /or lifts to or within your home	0.2%	2.0%	97.8%
You need to be close to a relative/friend to give care	0.3%	1.4%	98.4%
You need to be close to a relative/friend to receive care	0.5%	1.6%	97.9%
You need to be closer to employment and /or other essential facilities	0.2%	1.3%	98.5%
The property is overcrowded and contains a secondary or latent household (e.g. adult child or elderly relative) which in ideal circumstances would prefer to live independently	0.3%	0.2%	99.5%

Analysis by tenure reveals:

- PRS tenants (25%) were significantly more likely to cite their accommodation being too expensive as a problem than RSL tenants (5%) and owner-occupiers (2%).
- Difficulty maintaining their home was of most concern to PRS tenants (5%) followed by owner-occupiers (4%) and RSL tenants (3%).
- PRS tenants (9%) were more likely to say they need to be closer to employment and /or other essential facilities than RSL tenants (1%) and owner-occupiers (1%).

## 9.4 Need for affordable housing

When asked about the need for more affordable housing, respondents were most likely to say there was a need for affordable housing for young people and families (56%) followed by a need for housing for sale at a low cost (44%) and a need for social rented / housing association homes (41%). Only 4% of respondents said there was no demand for more affordable housing. Please note respondents provided multiple responses for this question.

## 9.5 Additional comments

Finally, all respondents were given the opportunity to provide any additional comments they may have about housing need and demand in Argyll and Bute. More than one fifth (22%) of respondents who provided a comment did so in reference to a lack of affordable housing for young people and locals who they felt were priced out of the housing market. 18% made reference to expensive housing prices and a shortage of affordable homes while 16% said there were too many holiday homes in their area.

<b>Q73 Do you have any additional comments you wish to make about housing need and demand in Argyll and Bute?</b>	
	<b>Respondents who provided a response</b>
<i>Unweighted</i>	1004
<i>Weighted</i>	10666
Lack of affordable housing for young people and locals/ priced out of the market	22.1%
House prices are too expensive/ shortage of affordable houses	18.1%
Shortage of suitable/ affordable homes for families	15.8%
Too many holiday/ second homes	12.6%
More should be done to encourage more young people to the island/ area and stop them leaving	12.2%
Other	9.8%
More houses need to be built	7.7%
Shortage of social/ Council housing	7.6%
Improvements needed to infrastructure e.g. roads, pavements, broadband	7.5%
Accommodation is very expensive e.g. council tax, rent, utilities	4.9%
More appropriate housing for elderly and disabled i.e. smaller, access level	4.8%
Lack of accommodation for workers i.e. doctors, nurses, teachers, seasonal staff	4.7%
There is already enough housing/ I don't want them to build anymore	4.6%
Shortage of sheltered accommodation	4.5%
Shortage of rental accommodation	4.3%
More one bedroom homes for single people/ couples	3.4%
Too many empty houses	2.5%
Restrictions on self-builds and sale of land are too strict	1.1%
There is a need for more jobs	1.0%
Council should focus on upgrading existing properties	0.9%
Parking is too expensive	0.8%
There isn't enough land to build more houses	0.6%
Housing need fluctuates with season	0.6%

## 10. AREA ANALYSIS

### 10.1 Household composition

Bute (43%) has the highest proportion of single adult households while Lorn (14%) has the lowest. Mid Argyll (53%) has the highest proportion of two person households while Kintyre (36%) has the lowest. The area that has the highest proportion of households with three or more people is Lorn (45%) while Bute (16%) has the lowest.

Q3 How many people currently live at this address, including yourself, any other adults and children?								
	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull and Iona	Lorn
Unweighted	348	192	365	363	344	353	305	372
Weighted	4352	685	8102	1930	4096	5278	1837	8197
1	43.1%	30.1%	33.2%	34.3%	26.7%	16.4%	32.7%	13.9%
2	41.2%	48.7%	43.4%	45.7%	36.4%	52.8%	44.2%	41.0%
3	11.7%	6.4%	13.1%	13.1%	19.9%	14.7%	10.4%	22.4%
4	4.0%	10.0%	7.9%	4.6%	11.5%	12.4%	8.1%	18.3%
5	-	4.7%	2.0%	2.0%	5.2%	3.6%	3.6%	4.0%
6	-	-	0.3%	0.2%	0.3%	-	0.9%	0.3%

Household composition by area reveals:

- Bute (18%) had the highest proportion of single adults under 65 while Mull & Iona (6%) had the lowest.
- More than one quarter of households in Mull & Iona (27%) were made up of single adults over the age of 65, this is more than three times the proportion found in Lorn (8%).
- Mid Argyll (29%) has the most households made up of 2 adults under 65, while Mull & Iona had the least (10%).
- More than one third of households in Mull & Iona (34%) and Islay, Jura and Colonsay (34%) are made up of 2 adults with at least one person aged 65 and over, this is more than double the amount found in Kintyre (15%)
- Kintyre (26%) and Lorn (24%) had the most households that consisted of one or two parent families, while Islay, Jura and Colonsay (9%) had the least.

Household composition by area								
	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn
Unweighted	348	192	365	363	344	353	305	372
Weighted	4352	685	8102	1930	4096	5278	1837	8197
Single adult (under 65)	18.1%	9.5%	11.3%	7.8%	10.8%	7.2%	5.9%	6.3%
Single adult (65 and over)	25.0%	19.6%	21.9%	26.5%	15.9%	9.2%	26.8%	7.7%
2 adults (both under 65)	15.3%	13.4%	15.4%	11.4%	19.4%	28.7%	10.0%	18.2%
2 adults (at least one 65 and over)	22.8%	33.1%	26.5%	33.8%	14.7%	23.3%	33.9%	18.9%
1 parent family	5.5%	0.6%	4.3%	0.8%	7.6%	2.0%	-	7.8%
2 parent family	9.1%	12.0%	14.4%	8.2%	18.2%	18.3%	11.5%	16.5%
3+ adults / other / refused	4.3%	12.0%	6.2%	11.5%	13.4%	11.3%	11.8%	24.6%

## 10.2 Age and gender profile

Kintyre had the youngest age profile of all areas with 22% aged 17 and under and 21% aged 18-34. Lorn closely followed with 19% aged 17 and under and 22% aged 18-34. Mid Argyll (47%) and Lorn (41%) had the highest proportion of residents aged 35-64. One half of Islay, Jura and Colonsay (50%) residents were aged 65 and over which is the highest proportion across all areas. Lorn (18%), Kintyre (20%) and Mid Argyll (23%) had the lowest proportion of residents aged 65 and over. A full breakdown of the age profile can be found in Appendix 2.

Analysis of gender by area shows there are more females than males in every area surveyed.

Gender profile by area								
	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn
Unweighted	616	399	745	721	804	828	634	960
Weighted	7687	1442	16459	3764	9549	12355	3829	21173
Male	41%	48%	48%	46%	49%	47%	46%	45%
Female	59%	52%	52%	54%	51%	53%	54%	55%

Analysis of age of the head of household by area reveals:

- Kintyre (22%) had the high proportion of younger head of households aged 18-34 while Mull & Iona (2%) and Coll & Tiree (1%) had the least.
- More than one half of Mid Argyll (58%) and Lorn (58%) head of households were aged 35-54, compared to 36% in Islay, Jura and Colonsay.
- 61% of households in Islay, Jura and Colonsay and 60% of households in Mull & Iona had head of households who were aged 65 and over, more than double the amount recorded in Lorn (28%)

Age of head of household by area								
	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn
Unweighted	348	192	365	363	344	353	305	372
Weighted	4352	685	8102	1930	4096	5278	1837	8197
18-24	0.6%	0.3%	0.7%	-	2.8%	1.1%	0.3%	1.9%
25-34	10.2%	0.8%	6.9%	2.3%	18.9%	10.1%	1.7%	11.9%
35-54	24.3%	20.0%	24.7%	12.3%	31.2%	32.1%	19.5%	37.1%
55-64	18.6%	25.9%	17.8%	23.5%	16.6%	25.1%	17.4%	20.8%
65-74	36.8%	32.0%	26.7%	32.2%	16.1%	23.7%	34.6%	21.6%
75+	9.5%	15.9%	23.1%	28.6%	14.2%	7.4%	25.7%	6.2%
Refused	-	5.0%	-	1.2%	0.3%	0.6%	0.9%	0.5%

Females were most likely to be the head of household for every area surveyed.

Gender profile of head of household by area								
	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn
Unweighted	348	192	365	363	344	353	305	372
Weighted	4352	685	8102	1930	4096	5278	1837	8197
Male	44.0%	42.3%	47.4%	37.8%	44.3%	46.3%	39.3%	49.3%
Female	56.0%	57.7%	52.6%	62.2%	55.7%	53.7%	60.7%	50.7%

### 10.3 Economic activity

The gap between economically active and economically inactive residents was highest in Cowal (+24% economically inactive) and Bute (+20% economically inactive). Lorn (+3% economically active) and Mid Argyll (+1% economically active) were the only areas where more of their residents are economically active than inactive although the difference for each is not significant. A full breakdown of economic activity can be found in Appendix 2.

Lorn (60%), Mid Argyll (58%) and Kintyre (56%) are the only areas where the head of households are more likely to be economically active than inactive. The highest proportion of economically inactive heads of household was found in Islay, Jura and Colonsay (59%).

## 10.4 Current home

Coll & Tiree residents (93%) were the most likely to be owner-occupiers. Kintyre (26%), Bute (24%) and Islay, Jura and Colonsay (24%) had the highest proportion of residents renting from a registered social landlord. Lorn (11%), Mull & Iona (11%) and Mid Argyll (11%) had the highest proportion of residents who rent within the private sector.

The majority of households who rent across all areas have a long-term let (6+ months). More than one in ten (11%) households who rent in Kintyre have a short term let (up to 6 months) which is the highest proportion of areas surveyed.

Q10 Please describe the nature of your current let?								
	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn
<i>Unweighted</i>	117	24	83	85	119	99	54	110
<i>Weighted</i>	1491	47	2250	609	1399	1537	400	2473
Long Term Let (6 months +)	96.5%	95.7%	87.4%	97.8%	87.8%	90.9%	91.7%	92.5%
Short Term Let (up to 6 months)	3.5%	-	7.8%	2.2%	11.4%	1.1%	2.3%	3.3%
Seasonal Let (accommodation available for a number of weeks/months a year)	-	-	-	-	-	-	2.3%	-
Mid-Market Rent	-	-	1.1%	-	-	5.9%	-	-
Temporary Accommodation	-	-	1.1%	-	-	-	-	0.8%
Other	-	-	-	-	-	-	-	-
Don't Know	-	4.3%	2.6%	-	0.8%	2.1%	3.8%	3.3%

Property type by area analysis reveals:

- 72% of Coll & Tiree live in a detached house, which is significantly higher than the average of 25% for all areas surveyed
- More than one third of Mid Argyll residents (34%) live in a semi-detached home, while only 6% of Bute residents live in a semi-detached home
- A terrace house was more common in Kintyre (32%) than it was in Coll & Tiree (1%)
- Cowal (16%) and Mull & Iona (15%) residents are more likely to live in a bungalow than any other area surveyed
- More than two thirds of Bute residents (68%) live in a flat, which is more than double the average of 25% for all areas surveyed.

Q11 What type of housing is this property?									
	Average	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn
Unweighted	2642	348	192	365	363	344	353	305	372
Weighted	34477	4352	685	8102	1930	4096	5278	1837	8197
Detached House	24.6%	7.7%	72.1%	23.6%	36.1%	13.6%	20.4%	53.2%	29.7%
Semi-detached House	23.7%	5.7%	11.2%	25.1%	29.9%	24.2%	33.5%	18.8%	26.1%
Terrace House	15.6%	16.8%	0.6%	11.5%	15.8%	32.4%	17.2%	6.3%	13.0%
Bungalow	9.6%	1.4%	12.8%	15.5%	11.5%	6.4%	12.7%	15.4%	5.5%
Flat	24.8%	68.0%	0.6%	21.7%	2.7%	23.4%	15.4%	3.2%	23.6%
Other	1.7%	0.3%	2.8%	2.6%	4.0%	-	0.9%	3.1%	2.1%

NB. A full breakdown of property type can be found in Appendix 2 along with a breakdown of property age.

Number of bedrooms by area can be found in the table below. The most significant variances found were:

- Bute (59%) was the only area to have more 2 bedroom homes than the average of 40%.
- Bute (19%) had the lowest amount of 3 bedroom homes,
- Coll & Tiree (18%) had twice the amount of 3 bedroom homes than the average of 9%.

Q17 How many bedrooms do you have in your home?									
	Average	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn
Unweighted	2642	348	192	365	363	344	353	305	372
Weighted	34477	4352	685	8102	1930	4096	5278	1837	8197
0 (BEDSIT)	0.9%	0.6%	0.6%	0.3%	2.2%	-	1.8%	1.3%	1.0%
1	14.7%	18.9%	10.9%	13.0%	15.3%	19.2%	21.4%	14.2%	7.9%

6+	0.5%	-	1.7%	0.8%	0.3%	0.6%	0.3%	1.9%	0.3%

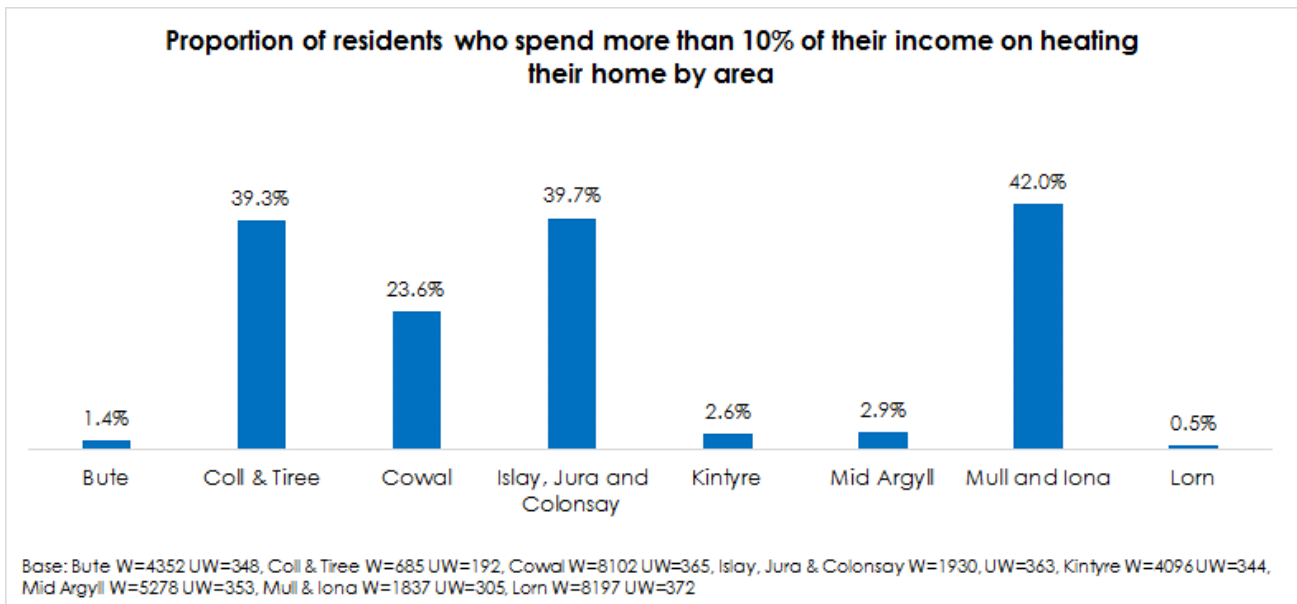

Cowal residents (17%) were the most likely to say they had too many bedrooms in their home, while Kintyre residents (5%) and Coll & Tiree residents were the most likely to say they had too few bedrooms in their home.

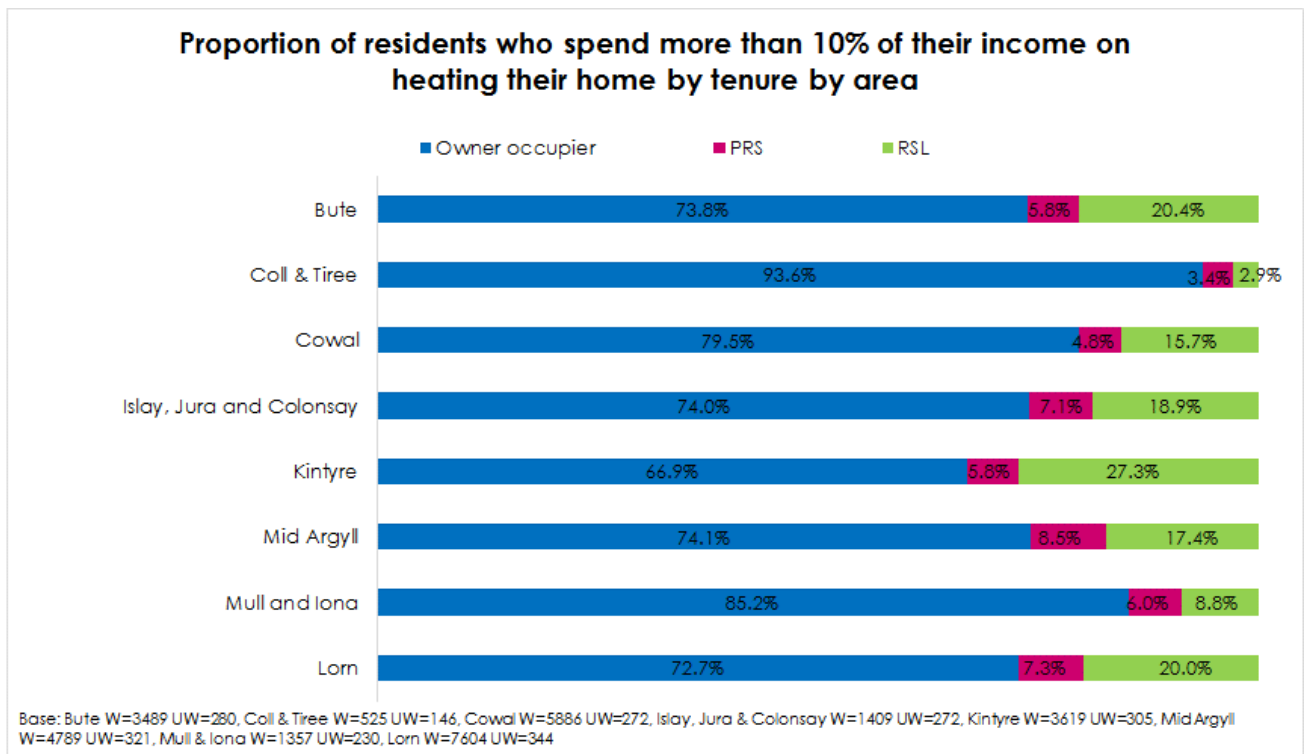

Overall, satisfaction with the home was high across all locations. Lorn (93%) and Mid Argyll (91%) residents were the mostly likely to say they were very satisfied with their home.

Q22 On the whole, how satisfied or dissatisfied are you with your home?									
	Average	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn
Unweighted	2642	348	192	365	363	344	353	305	372
Weighted	34477	4352	685	8102	1930	4096	5278	1837	8197
Very satisfied	83.2%	80.2%	76.6%	72.7%	73.0%	88.4%	90.7%	73.9%	92.8%
Fairly satisfied	13.3%	19.0%	18.4%	23.2%	21.3%	7.8%	7.5%	19.3%	3.4%
Neither satisfied nor dissatisfied	1.7%	0.6%	1.1%	2.1%	1.2%	0.9%	1.5%	1.7%	2.8%
Fairly dissatisfied	1.3%	0.3%	2.5%	1.7%	3.7%	1.5%	0.3%	4.6%	0.8%
Very dissatisfied	0.2%	-	1.4%	0.4%	0.8%	-	-	0.5%	-
No opinion	0.2%	-	-	-	-	1.5%	-	-	0.3%

Residents who live on the islands of Coll & Tiree (39%), Islay, Jura and Colonsay (40%) and Mull & Iona (42%) are significantly more likely to spend more than 10% of their income on heating their home than any other area surveyed in Argyll and Bute.

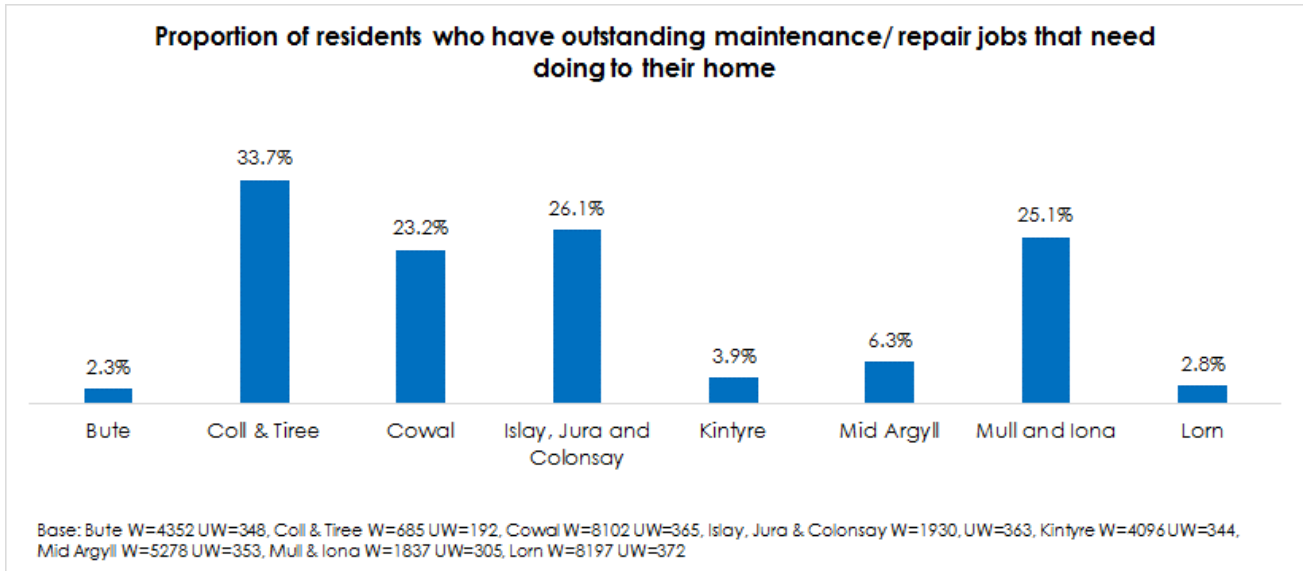

The majority of residents who spend more than 10% of their income on heating their home in each area are owner-occupiers. Mid Argyll (9%) has the largest proportion of PRS tenants who spend more than 10% of their income on heating their home while Kintyre (27%) has the proportion of RSL tenants who spend more than 10% of their income on heating their home.

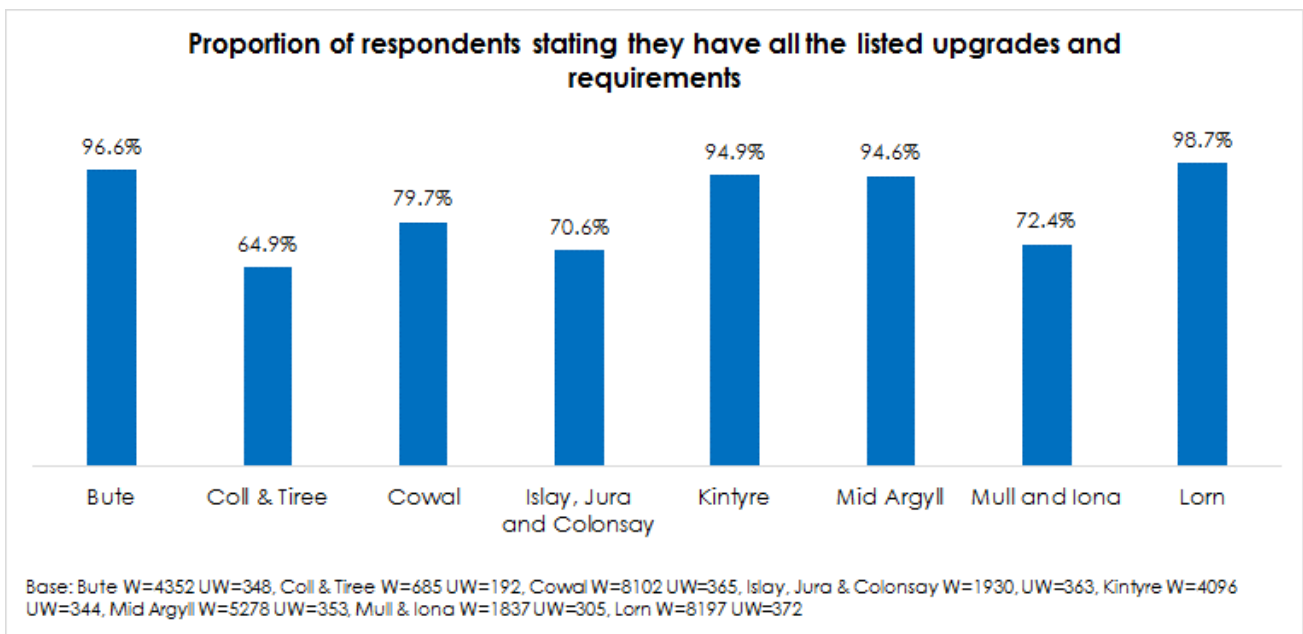

## 10.5 Repairs and property condition

Residents living in Coll & Tiree (34%) were the most likely to have outstanding maintenance or repair jobs that need doing in their home while Bute residents (2%) were the least likely. A full breakdown by tenure can be found in Appendix 2.

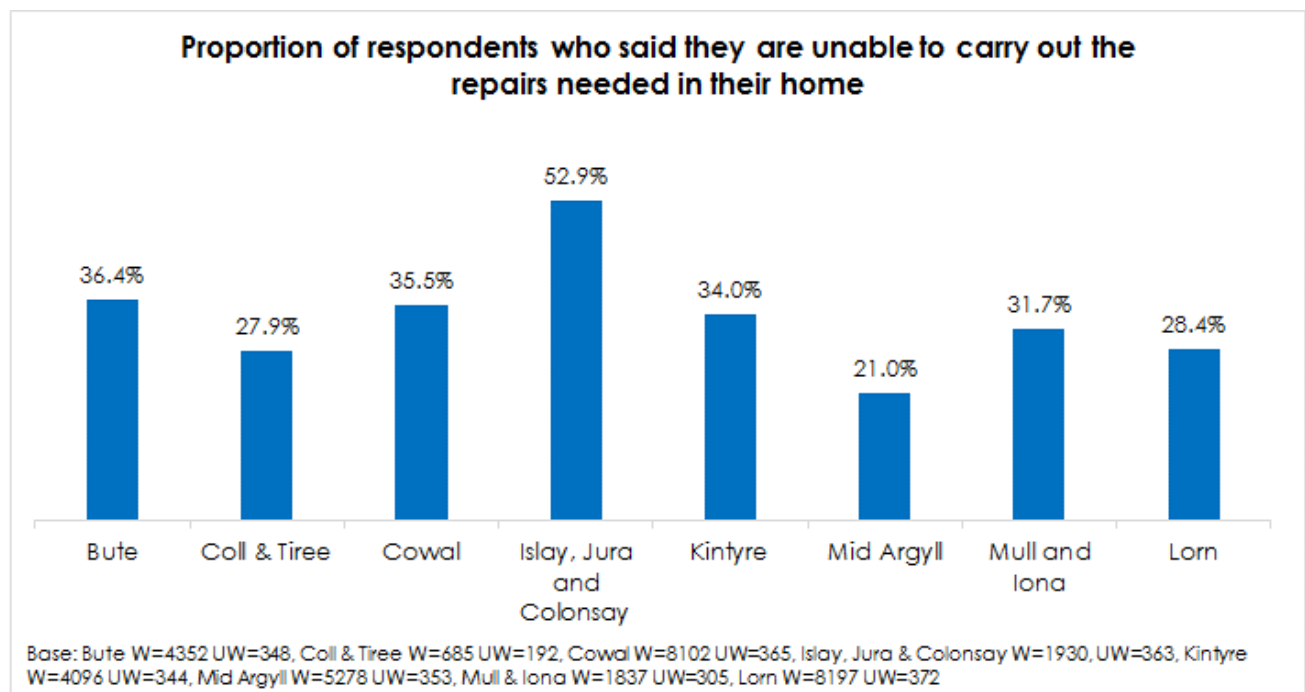

Almost all Lorn residents (99%) said their home has all the listed upgrades and requirements compared to just under two thirds of Coll & Tiree residents (65%). A full breakdown of all upgrades and requirements can be found in Appendix 2.

Residents living on the islands of Coll & Tiree (34%), Islay, Jura and Colonsay (29%) and Mull & Iona (20%) were the most likely to have a condition-related issue in their property. A full breakdown of condition-related issues by area and tenure can be found in Appendix 2.

Islay, Jura and Colonsay residents (53%) were the most likely to say they unable to carry out the repairs needed in their home while Mid Argyll residents (21%) were the least likely.

When asked why they weren't able to carry out repairs:

- Residents living on the islands of Coll & Tiree (15%), Islay, Jura and Colonsay (8%) and Mull & Iona (10%) were the most likely to say they could not afford to;
- The majority of Lorn residents (91%) said repairs were the responsibility of their landlord/ Council/Housing Association, compared to only 14% of Coll & Tiree residents;
- Residents living on the islands of Coll & Tiree (64%), Islay, Jura and Colonsay (40%) and Mull & Iona (44%) were the most likely to say they cannot physically manage to carry out repairs;
- Requirement to find a reliable builder or other contractor was of most concern to island residents of Coll & Tiree (42%), Islay, Jura and Colonsay (25%) and Mull & Iona (27%);
- More than one in ten (12%) Coll & Tiree residents said availability of a tradespersons was a barrier to them carrying out repairs in their home

Q30 If you are unable to carry out repairs on your home, is this because:								
	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn

Family members do repairs for me	-	2.0%	0.7%	0.5%	-	-	-	-

## 10.6 Recent moving behaviour

With regards to affordability, Mid Argyll (69%) were the most likely to say their home was very or fairly easy for them to afford, while Islay, Jura and Colonsay (33%) were the least likely. Mull & Iona (8%) were the most likely to say their home was fairly or very difficult for them to afford, while Bute residents (0%) were the least likely. A full breakdown by tenure can be found in Appendix 2.

Q31c How easy was it for you to afford this house?									
	Average	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn

Cowal residents were the most likely to have moved recently, with more than one fifth of households (21%) having moved to their current address in the last five years. Island residents of Coll & Tiree (54%), Islay, Jura and Colonsay (60%) and Mull & Iona (56%) were the most likely to have lived at their current address for more than fifteen years. A full breakdown of this analysis can be found in Appendix 2.

Mull & Iona (16%) and Kintyre residents (13%) were the most likely to have moved more than once in the last five years.

How many different addresses have you lived at in the last 5 years?								
	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn
Unweighted	34	21	70	35	31	27	33	60

The below table shows the area profile for all moves made by residents who have lived at their current address for less than 5 years. The proportion of residents who have moved within the same area is highlighted in blue. Islay, Jura and Colonsay (84%) residents were the most likely to move within the same area, while Coll & Tiree residents (56%) were the most likely to move out with Argyll and Bute.

Analysis of tenure mobility reveals:

- Bute had the highest proportion of residents changing tenure from owner to PRS (9%) and owner to RSL (8%);
- Coll & Tiree (18%) and Kintyre (18%) had the highest proportion of residents changing tenure from PRS to owner-occupiers;
- Islay, Jura and Colonsay (14%) had the highest proportion of residents changing tenure from PRS to RSL
- Coll & Tiree (13%) and Islay, Jura and Colonsay (12%) had the highest proportion of residents changing tenure from RSL to owner-occupiers;
- Mid Argyll had the highest proportion of residents who previously lived with their parents and are now owner-occupiers (15%) and also the highest proportion who now rent within the private sector (21%)
- Lorn (23%) had the highest proportion of residents who previously lived with their parents and now rent from an RSL

Analysis by area of the main reasons residents decided to move to their current home reveals:

- Bute (62%) and Lorn (62%) residents were the most likely to say they moved due to the size of properties available;
- Bute (53%) and Lorn (54%) residents were the most likely to say they moved for a good general location;
- Bute (54%) and Lorn (48%) residents were the most likely to say they moved because of the type of properties available;
- Mid Argyll (47%) and Lorn (55%) residents were the most likely to say they moved to their current home because it was quiet and peaceful;
- Bute (37%) and Mid Argyll (31%) residents were the most likely to say they moved to their current home because they have always lived in the area
- Mid Argyll (31%) and Lorn (40%) residents were the most likely to say they moved to their current home due to employment

Q34 What was the main reason why you decided to move into your current home?

Residents overall rating of their current neighbourhood was high across all areas, ranging from 99% in Bute and Lorn to 96% in Coll & Tiree, Cowal and Islay, Jura and Colonsay.

Q35 Thinking about your current neighbourhood, how would you rate it as a place to live?									
	Average	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn
Unweighted	2642	348	192	365	363	344	353	305	372
Weighted	34477	4352	685	8102	1930	4096	5278	1837	8197
Very good	88.8%	89.0%	83.0%	80.8%	85.3%	87.8%	91.7%	83.9%	97.6%
Fairly good	8.7%	9.6%	12.5%	15.0%	10.9%	8.7%	6.0%	14.2%	1.7%
Neither good nor bad	1.2%	0.6%	1.7%	1.3%	1.0%	2.7%	1.4%	0.9%	0.5%
Fairly poor	0.9%	-	1.7%	2.6%	2.1%	0.3%	0.3%	0.7%	0.3%
Very poor	0.0%	-	-	-	-	-	-	0.3%	-
Don't know/ no opinion	0.4%	0.9%	1.1%	0.3%	0.7%	0.6%	0.6%	-	-

A full breakdown of reasons why residents rated their neighbourhood as poor can be found in Appendix 2.

### 10.7 Future household formation

The following analysis will focus on new households likely to form within the next seven years. With the exception of Lorn, the proportion of residents who are likely to form a new household is very small and this analysis should therefore be treated with caution.

Lorn residents were the most likely to say they would like to move in the next two years (11%) and also the most likely to say they would like to move in the next two to seven years (11%). Bute residents were the least likely to say they would like to move in the next two years (1%) and also the least likely say they would like to move in the next two to seven years (1%).

Islay, Jura and Colonsay (4%) and Mid Argyll (3%) residents were the most likely to form more than two households in the next seven years.

Q39 How many separate households are they likely to form –how many different properties are they likely to need?								
	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn
Unweighted	7	8	14	26	32	36	18	80

Reasons why new households are likely to form varied by area, revealing:

- Just under one in ten (9%) Lorn residents said they were likely to form a new household because there are no jobs available locally;
- Half of Mid Argyll (50%) and Mull & Iona (50%) residents who are likely to form a new household said this was for employment reasons;
- One in three (30%) Lorn residents said they were likely to move to find affordable housing;
- 15% of Lorn residents likely to form a new household said there is not RSL or PRS properties available in this area

Q41e Why new households are likely to form								
	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn
<i>Unweighted</i>	8	10	16	29	37	48	23	93

Want better social/community facilities	24.2%	-	15.6%	3.3%	-	-	-	1.1%
Want to be near better transport facilities	-	-	-	-	-	-	-	-
To move to a better area	-	-	-	8.7%	2.7%	2.1%	-	3.1%
Other	12.1%	28.9%	32.8%	24.7%	14.0%	6.3%	33.6%	3.2%

Analysis of barriers to moving by area revealed:

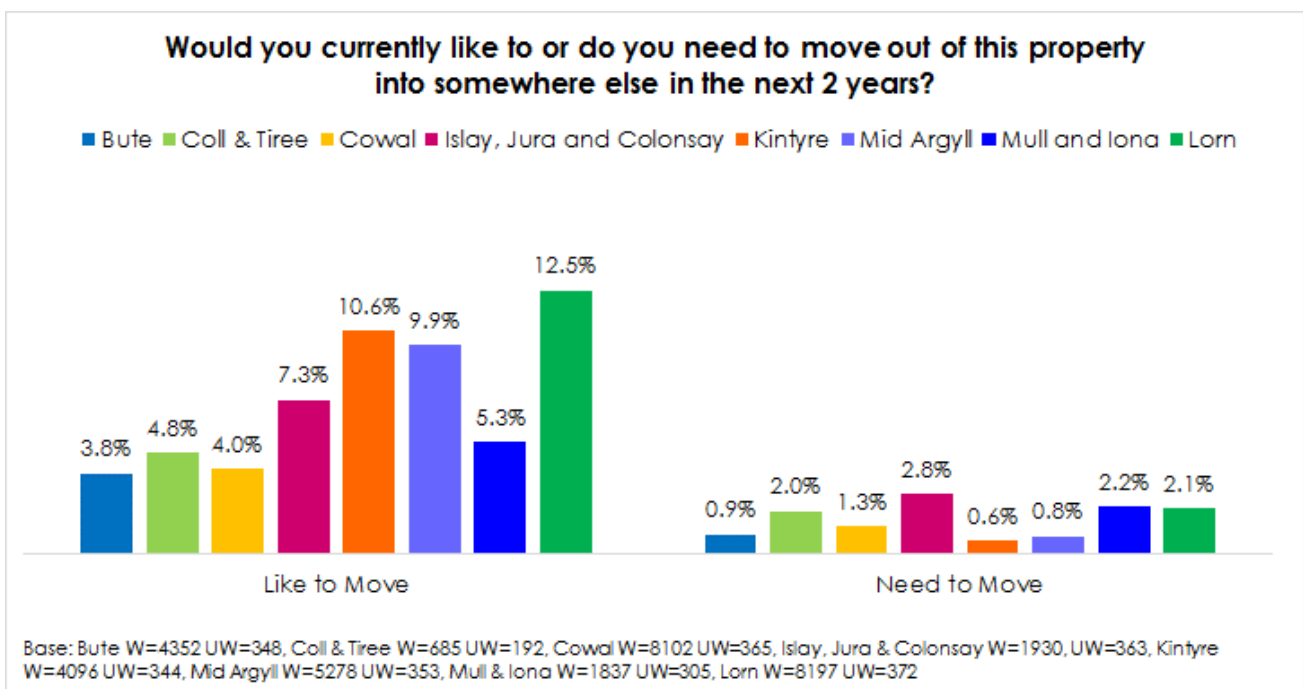

- Financial constraints were of most concern in Kintyre (69%) and Mid Argyll (61%);
- Lack of availability in the area of choice was more likely to be a barrier in Lorn (30%), Coll & Tiree (29%) and Islay, Jura and Colonsay (29%);
- Unavailability of specialist accommodation or support was a barrier for 6% of Islay, Jura and Colonsay residents likely to form a new household;
- Coll & Tiree (71%) residents were most likely to say there was nothing that would prevent them from moving while Kintyre residents (14%) were the least likely.

Q42 What might prevent the person(s) concerned from moving out of this property?								
	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn
Unweighted	9	10	17	31	42	49	29	98
Weighted	112	38	381	163	503	733	173	2146
Financial Constraints	43.8%	-	36.2%	22.7%	68.6%	61.0%	42.8%	49.3%
Lack of availability in area of choice	10.7%	28.9%	10.8%	28.8%	17.1%	16.8%	23.1%	29.5%
Requires specialist accommodation or support that is not available	-	-	-	6.1%	-	4.1%	3.5%	2.1%
Other	-	-	-	22.1%	-	-	3.5%	3.9%
Nothing would prevent them moving	43.8%	71.1%	52.8%	20.9%	14.3%	18.3%	32.4%	15.3%

N.B. Please note the base for this analysis is more than the number of households as some new households likely to form will consist of more than one person.

### 10.8 Future intentions of current households

All households were asked if they would like or need to move out of their property in the next 2 years. Lorn residents (13%) were the most likely to say they would like to move while Islay, Jura and Colonsay residents (3%) were the most likely to say they need to move.

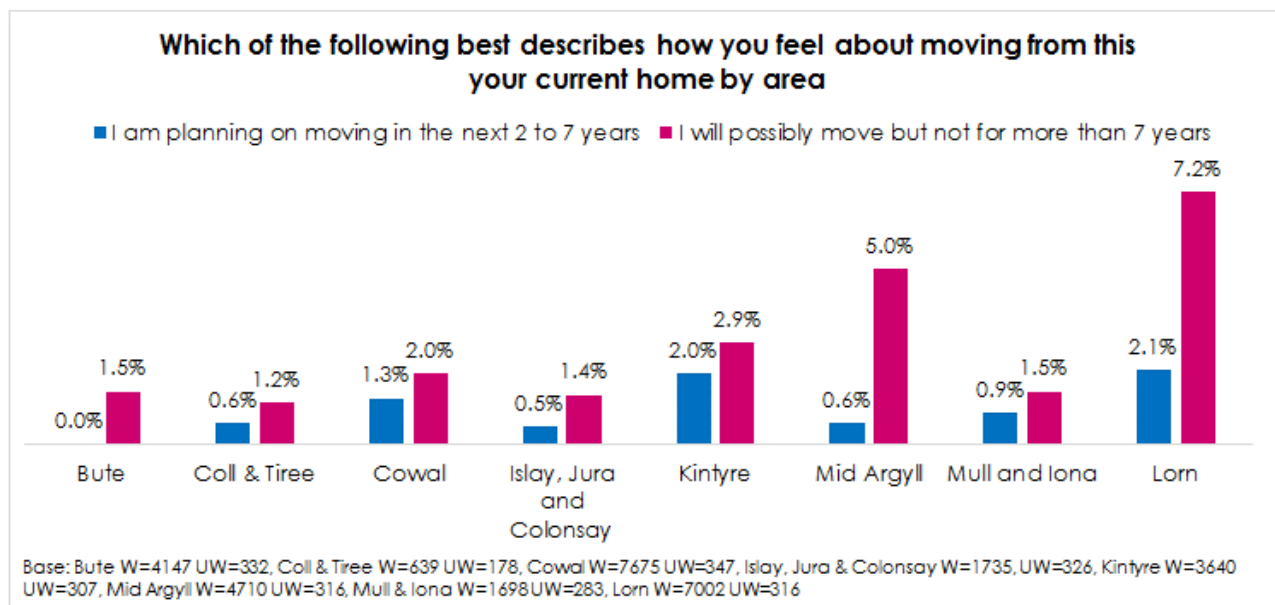

Analysis by tenure reveals:

- Owner-occupiers in Lorn (11%) were the most likely to say they would like to move while Islay, Jura and Colonsay (3%) were the most likely to say they need to move;
- PRS tenants in Lorn (43%) were the most likely to say they would like to move while Coll & Tiree (8%) PRS tenants were the most likely to say they need to move;
- RSL tenants in Mid Argyll (11%) were the most likely to say they would like to move while Mull & Iona (6%) RSL tenants were the most likely to say they need to move.

<b>Q43 Would you currently like to or do you need to move out of this property into somewhere else in the next 2 years?</b>						
	<b>Owner occupier</b>		<b>PRS</b>		<b>RSL</b>	
<i>Unweighted</i>	1945		223		474	
<i>Weighted</i>	24211		3373		6893

Further analysis of preferred housing options, reasons for moving, preferred location, reasons for preferred location, property type and preferred expenditure can be found in Appendix 2.

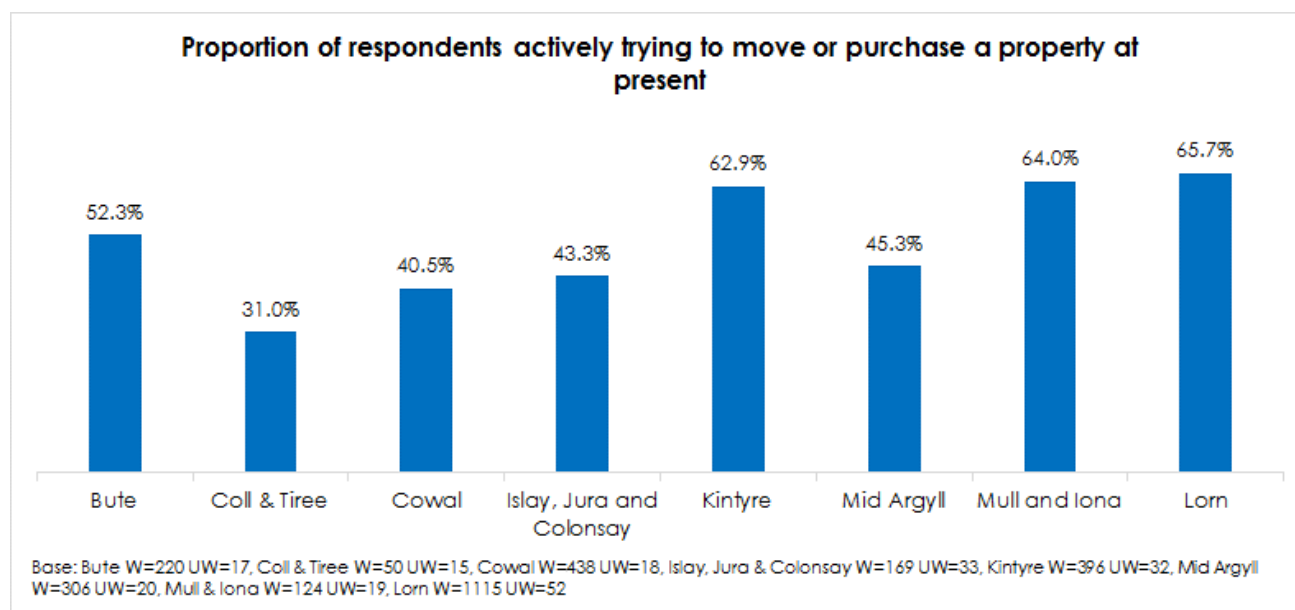

Residents who said they did not want to move in the next two years were then asked how they feel about moving from their current home. Lorn (2%) and Kintyre (2%) residents were the most likely to say they are planning on moving in the next two to seven years. Lorn (7%) and Mid Argyll (5%) residents were the most likely to say they may possibly move but not for more than seven years.

Mull & Iona residents (43%) were the most likely to say they were very likely to move out of their property into somewhere else within the next two to seven years while 16% of Mid Argyll residents who said they would like or need to move said they were not at all likely to move within the next two to seven years.

Q52 How likely are you to move out of this property into somewhere else within the next 2 to 7 years?									
	Average	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn
Unweighted	330	21	17	27	44	52	55	28	86
Weighted	4723	270	57	675	229	635	834	180	1844

Not very likely	13.5%	4.6%	-	11.9%	12.1%	9.2%	22.0%	11.4%	13.9%
Not at all likely	10.4%	4.6%	6.6%	6.1%	4.3%	15.8%	14.5%	7.0%	10.3%
Don't know/ not stated	16.4%	9.2%	6.6%	17.1%	10.0%	12.7%	26.7%	12.7%	15.3%

Residents who said they were very or fairly likely to move were then asked if they were actively trying to move or purchase a property at present. Lorn (66%), Mull & Iona (64%) and Kintyre (63%) residents were the most likely to say they were actively looking to move or purchase a property at present. Further analysis of action taken can be found in Appendix 2.

Analysis of barriers to moving by area reveals:

- Financial constraints were of most concern in Kintyre (54%) and least concern in Islay, Jura and Colonsay (10%);
- Lack of available property in the area was of most concern in Lorn (46%) and Mid Argyll (42%) and of least concern in Coll & Tiree (0%);
- Housing being too expensive was more of a concern for Mid Argyll residents (52%) than Bute (0%) or Cowal (0%) residents;
- Lack of suitable property was of more concern to Lorn (37%) residents than it was for Coll & Tiree (0%) or Mull & Iona (0%) residents.

<b>Q55 If you are not likely to move or not actively trying to move, why? (all who would like OR need to move but not likely to)</b>

Further analysis of preferred housing options if circumstances were to change can be found in Appendix 2.

## 10.9 Individual needs

More than one third of Islay, Jura and Colonsay (34%) and Mull & Iona (35%) residents said someone in their household has a long-term illness, health problem or disability which limits their daily activities, more than twice the amount reported in Bute (15%).

Analysis of health conditions by area reveals:

- Bute residents (83%) were the most likely to report no one in their household suffered from a health condition while Islay, Jura and Colonsay residents (59%) were the least likely;
- Mobility and physical health problems were more prevalent in Islay, Jura and Colonsay (24%), Mull & Iona (23%) and Cowal (21%) than they were in Lorn (8%);
- Frailty due to old age was reported more in Mull & Iona (16%) and Islay, Jura and Colonsay (14%) than it was anywhere else in Argyll and Bute;
- Islay, Jura and Colonsay (7%) had the highest proportion of households with someone suffering from a chronic disease, closely followed by Mull & Iona (6%).

Q60 Is there anyone in the household who suffers from any of the following?									
	Average	Bute	Coll & Tiree	Cowal	Islay, Jura and Colonsay	Kintyre	Mid Argyll	Mull & Iona	Lorn

All respondents were asked if they believed there was a need for more affordable housing to be developed in their area. The table below has highlighted in blue where more than 50% of residents have indicated there is a need for more affordable housing. This shows that island residents of Coll & Tiree, Islay, Jura and Colonsay and Mull & Iona were the most likely to say their area is in need of more affordable housing.

<b>Q72 Do you think that there is a need for more affordable housing to be developed in your area/community/town/?</b>								
	<b>Bute</b>	<b>Coll &amp; Tiree</b>	<b>Cowal</b>	<b>Islay, Jura and Colonsay</b>	<b>Kintyre</b>	<b>Mid Argyll</b>	<b>Mull &amp; Iona</b>	<b>Lorn</b>

Appendix 1:  
Survey Questionnaire

<b>Project number</b>	<b>P1015</b>
<b>Project name</b>	<b>Argyll and Bute HNDA Household Survey 2019</b>

**INTRODUCTION (Read out)** Good morning, afternoon, evening. My name is ..... from Research Resource, and we are carrying out an important survey on behalf of Argyll and Bute Council. Your address has been selected at random to participate. The survey is about your housing circumstances and will help the Council plan for the future of housing in Argyll and Bute, making sure it meets the needs of residents. The interview will take about 30 minutes. Can you spare the time to speak to me just now?

Can I assure you that all your answers will remain totally confidential and anonymous. Nobody at **Argyll and Bute Council** will know your individual answers without your permission. You do not need to answer any questions you don't want to and you have the right to end the interview at any time. This interview will be recorded for quality monitoring and training purposes. Can I confirm that you are happy to take part in the survey?

### HOUSEHOLD COMPOSITION

<b>Q1</b>	<b>Can I just check, are you the head of the household or their partner?</b> Base: All Respondents

## HOUSEHOLD INCOME

To look at how affordable housing is across the area, we need to collect information about how much people currently pay for their housing and how they pay for it. Can I remind you again that any information you give will be kept strictly confidential and will only be used to produce statistics. No one will see any information about you personally.

### ASK ALL RESPONDENTS

**Q68A** Could you please tell me in which category you would place your (and your spouse/partner's) current **TOTAL GROSS INCOME** from **ALL SOURCE BEFORE DEDUCTIONS, TAX AND NATIONAL INSURANCE** – that is **INCOME** from **WORK, PENSIONS, BENEFITS** and **INVESTMENTS**

**Q68B** Could you estimate the income of any/all other adults aged 16 and over in your household. I mean current **TOTAL GROSS INCOME** from **ALL SOURCE BEFORE DEDUCTIONS, TAX AND NATIONAL INSURANCE** – that is **INCOME** from **WORK, PENSIONS, BENEFITS** and **INVESTMENTS**

## Appendix 3:

### Technical Report Sheet

## TECHNICAL REPORT SHEET – QUANTITATIVE RESEARCH

Project number	<b>P1015</b>
Project name	<b>Argyll and Bute HNDA Household Survey 2019</b>
Objectives of the research	The purpose of this project was to identify housing need and demand within eight sub-areas (housing market areas) of Argyll and Bute. These sub-areas include Bute, Coll & Tiree, Cowal, Islay, Jura and Colonsay, Kintyre, Mid Argyll, Mull & Iona and Lorn. Argyll and Bute Council commissioned Research Resource to carry out this survey to provide sufficient disaggregated data to inform a robust and credible Housing Need and Development Assessment for the authority.
Target group	Argyll and Bute residents
Target sample size	The aim was to achieve data accurate to +/-5% within housing market sub areas.
Achieved sample size	A total of 2,651 interviews were achieved with residents.
Date of fieldwork	Interviewing took place between the 2 <sup>nd</sup> of July and the 12 <sup>th</sup> of September 2019.
Sampling method	<p>A total of 2,651 interviews were carried out with a sample of Argyll and Bute residents. Argyll and Bute has a population of 34,477 households, excluding second and holiday homes. Helensburgh and Lomond was excluded from this survey as a separate survey was carried out in this area in 2018. The sample size for Lorn however remained the same. A sample of 2,651 households therefore provides data accurate to +/-2% (based upon a 95% confidence level at the 50% estimate).</p> <p>This confidence level of +/-5% was achieved within each Argyll and Bute sub-area with the exception of Coll &amp; Tiree where a confidence level of +/-6% was achieved. As Coll &amp; Tiree has a very small population, a high proportion of interviews were required to achieve a data accuracy level of +/-5% which unfortunately was not possible. However, this study provides robust data at the overall Argyll and Bute level to +/-2%.</p>
Data collection method	Interviews were undertaken with the respondent on either a face to face basis or by telephone. All responses were recorded on a paper questionnaire and the data entered into a survey analysis package by a team of data processors.
Response rate and definition and method of how calculated	The survey was designed to achieve data accurate to +/- 5% within each housing market area.
Any incentives?	No
Number of interviewers	12 interviewers were working on this project.

Interview validation methods	10% of each interviewers work was back checked to ensure that interviews have been completed accurately and in line with ISO 20252 standards.
Showcards or any other materials used?	Showcards used as per instructions on questionnaire
Weighting procedures	Our analysis of the respondent profile compared to the profile of population illustrated that private rented households and social rented households were slightly under weighted in relation to the population and that owner-occupiers were slightly over represented. It was therefore agreed to weight on the basis of tenure to address this imbalance, at the same time as grossing up the responses to represent the full population of Argyll and Bute. While 2,651 interviews were carried out, tenure data was not available for 9 of these households meaning they could not be included in the weighted analysis. Throughout this report the total unweighted base for all households is therefore 2,642.
Estimating and imputation procedures	Not applicable
Reliability of findings	Data accurate overall to +/-1.83% for Argyll and Bute residents.
