Key questions that should be asked prior to the self assessment exercise

- What areas do we need to focus on?
- What outcomes are there from self assessment?
- Do we need support from others and if so what type and level of support?
- How can we develop in order to build on our present compliance with the good practice principles outlined by CIPFA?
- Do we need to review the risk management process and risk register alignment to the existing corporate governance structure?
- Do we review the assurance framework in total internal controls; risk management framework; compliance; internal / external audit?
- Do we need to gauge the responsiveness of the Council to the current economic climate and relevant areas of particular attention, to gain some warning of issues appearing?
