This report provides an overview of the FQ4 2020/21 performance for the Education Service

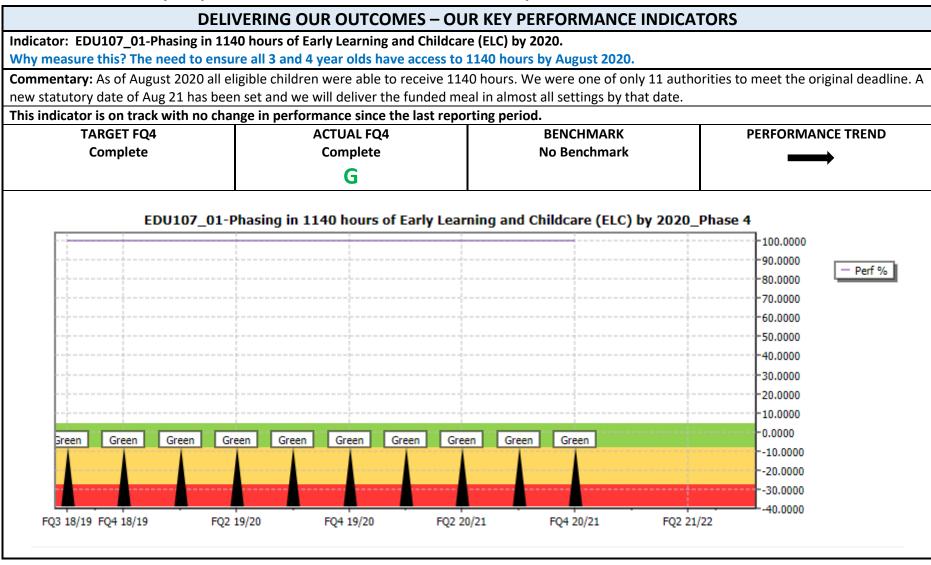

Delivering Our Outcomes – This highlights past performance as illustrated through the Services' Key Performance Indicators

KEY TO SYMBOLS

- R Indicates the performance has not met the expected Target
- G Indicates the performance has met or exceeded the expected Target

The Performance Trend Arrow indicates the direction of travel compared to the last performance reporting period

This report provides an overview of the FQ4 2020/21 performance for the Education Service

Indicator: EDU107 02-Early level and childcare learners spend 50% of their funded time outdoors.

Why measure this? All early level and childcare learners should have access to 50% outdoor provision.

Commentary: Almost all learners are now are spending a minimum 50% of time outdoors. As a result of COVID 19 we have been unable to offer further training as planned again this quarter. However all settings have guidance to support high quality outdoor play. Our outdoor learning course has been verified by SQA and training for trainers will begin in May 2021 with a pilot training course offered by July 2021

Indicator: EDU107_04-A counselling service is available in all secondary schools

Why measure this? This will provide support for mental health and wellbeing in our young people.

Commentary: The school counselling service is progressing positively. Since the service started on February 8th of this year 63 referrals have been received with the average age of the young person being 14 years. There is a relatively even balance across males and females, with slightly more females being referred. A wide range of referral reasons have been recorded including anxiety, relationships, trauma and emotional regulation, bereavement, bullying, low mood and self-injury /self-harm. Referrals are mostly being received from school staff. Early indications are that young people with particularly vulnerabilities, such as having additional support needs, being care experienced or being a young carer, are supported to access the service. Analysis of trends has identified that the service is being used well across all but one area of the authority and the reasons for this are being investigated further to ensure equity of access. Moving forward, further data will be collected including length of engagement and impact for young people.

Indicator: EDU107_07-The percentage of schools that use the progress and achievement module

Why measure this? This will enable the Education Service to assess and track children and young people's progress in raising their attainment

Commentary: 100% of schools across the authority are engaging with the Progress and Achievement module at 3 annual junctures - October, February and June. At these 3 points teachers of pupils from P1 to S3 enter data relating to every child's progress in literacy and numeracy within the Curriculum for Excellence level that they are currently working in. The resulting data sets are being used to develop planning and individualised targets for each pupil and identified groups. Data is analysed at school and authority level to ensure excellence and equity in provision. The authority uses the data to inform improvement planning with schools and clusters.

This report provides an overview of the FQ4 2020/21 performance for the Education Service

Indicator: EDU107_09-Support the increase in uptake of available Grants, Allowances and Entitlements.

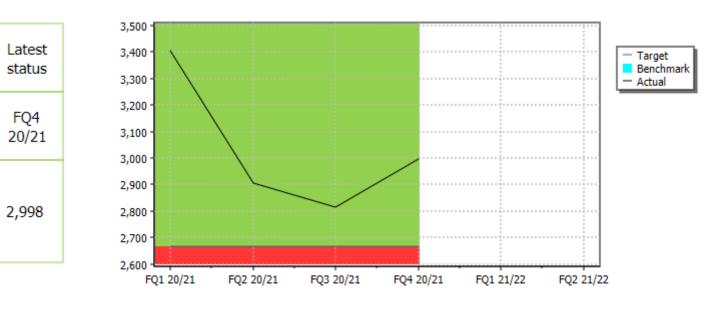

Why measure this? To demonstrate the support we are putting in to the most vulnerable families in the Authority to support children. This also maximises the Pupil Equity Fund allocation to schools through Scottish Government.

Commentary: Education Maintenance Allowance (EMA) and Clothing Grant payments have decreased whilst there has been an increase in Free School Meal (FSM) payments. Covid-19 has had an impact on all grant uptake.

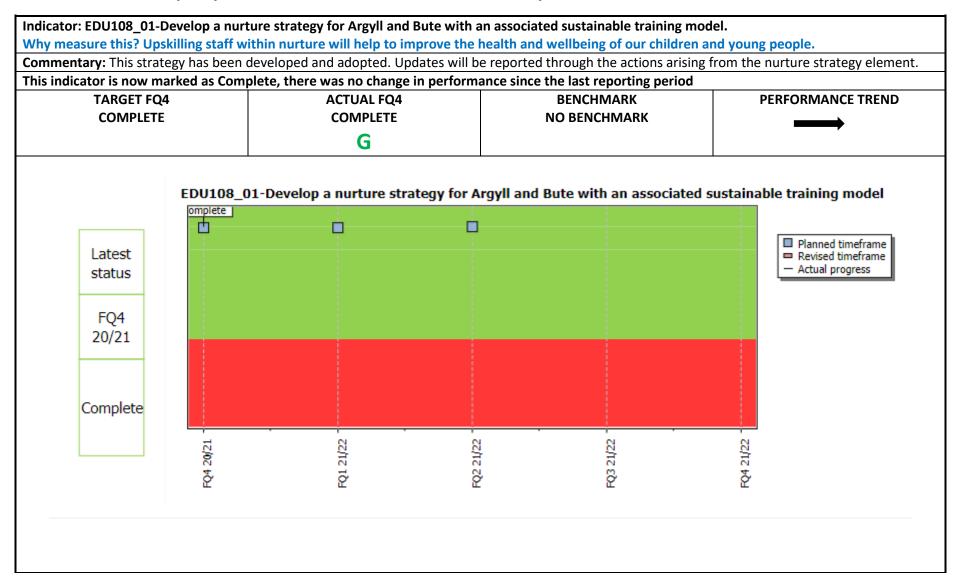

This indicator is above target and performance has increased since the last reporting period
