

Locality Profile Information – Islay and Jura

How many people live here?

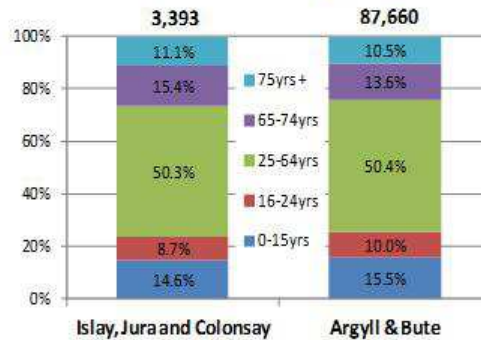

Population Over Time

Summary: The over 65yrs population group of Islay & Jura as a whole has increased over recent years. Due to datazone geographies, Colonsay is included here along with Islay & Jura.

Source: National Records of Scotland (NRS) Small Area Population Estimates (SAPE). Best fit of 2001 and 2011 datazones to locality area.

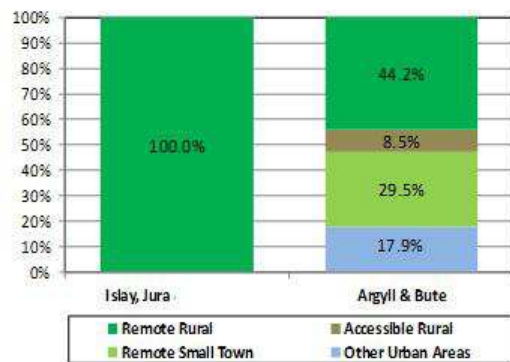

Population by Age

Summary: Islay, Jura & Colonsay, as a whole, have a higher proportion of 65yrs and over, than Argyll and Bute as a whole. Due to datazone geographies, Colonsay is included here along with Islay & Jura.

Source: National Records of Scotland (NRS) Small Area Population Estimates (SAPE), Mid Year 2014. Best fit of 2011 datazone to locality area.

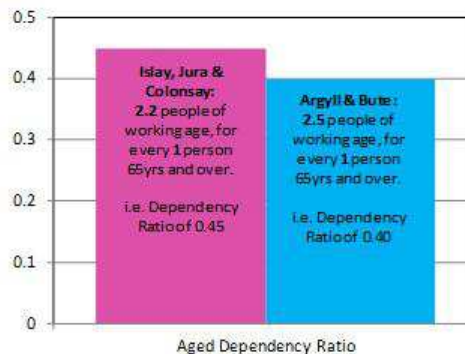

Population by Urban/Rural Classification

Summary: 100% Remote Rural.

Source: NRS Small Area Population Estimates, 2014. Scottish Government 6-fold Urban-Rural Classification 2012. Best fit of 2011 datazone to locality area.

Dependency Ratio

Summary: The Aged Dependency Ratio is a bit higher than Argyll & Bute's Aged Dependency Ratio, i.e. Islay, Jura & Colonsay, as a whole, have fewer working age people to support those 65yrs and over, than the Argyll & Bute population as a whole.

Note: The dependency ratio ignores the fact that not all of those 65+ are necessarily dependent (an increasing proportion of whom are working) and that many of those of 'working age' are not actually working. Due to datazone geographies, Colonsay is included here along with Islay & Jura.

Source: Calculated from National Records of Scotland Small Area Population Estimates, Mid Year 2014. Best fit of 2011 datazone to locality area.

No access to a private car:

- 'Remote Rural', 13%
- 'Remote Small Towns', 31%
- 'Accessible Rural', 14%
- 'Other Urban Areas', 30%

Locality Profile Information – Islay and Jura

What circumstances do people live in?

Scottish Index of Multiple Deprivation

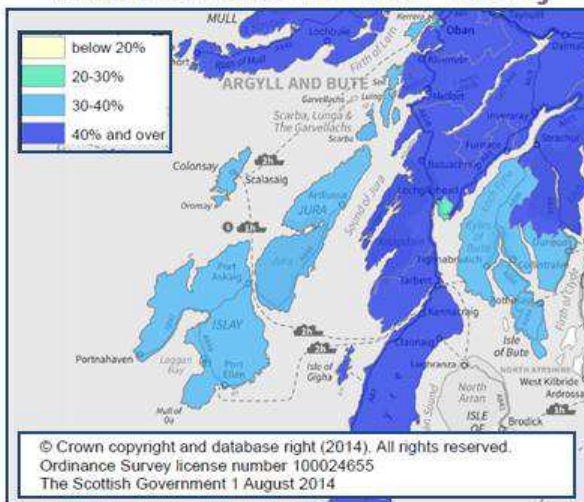

Summary: There are no people in Islay and Jura living in an area within the 20% most deprived areas in Scotland. There are no small areas within Islay and Jura, within the least deprived in Scotland.

Be aware that: Where populations in small areas are from mixed socio-economic backgrounds, which is more common in rural areas, deprivation may be hidden in this measure.

Source: 2013 Mid-year population estimates, National Records of Scotland. Scottish Index of Multiple Deprivation 2012, Scottish Government. Data best-fit of 2001 datazones to locality areas. Colonsay is included in this data.

% households in Fuel Poverty

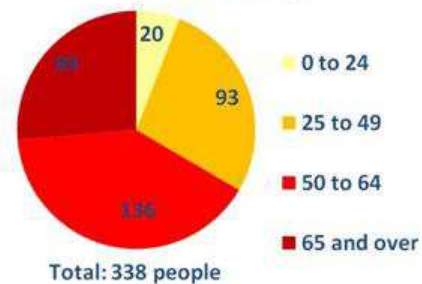

Summary: On Islay and Jura, 30-40% of households are estimated to be in fuel poverty.

Be aware that: Data are only available by 2001 intermediate geography and are estimated from a model. Different estimates of fuel poverty exist from different sources. All indicate relatively high levels of fuel poverty in rural areas of Argyll and Bute.

Source: Local Indicators of Fuel Poverty, 2014, Scottish Government.

Unpaid care

Number of people reporting providing unpaid care by age (census 2011)

Summary: 338 out of 3522 people living in households reported providing unpaid care. An Argyll and Bute survey found that 60% of carers received some support in their role but that 40% did not.

Be aware that: There are likely to be more unpaid carers than reported; people providing care for family/friends do not always consider themselves to be carers.

Locality Profile Information – Islay and Jura

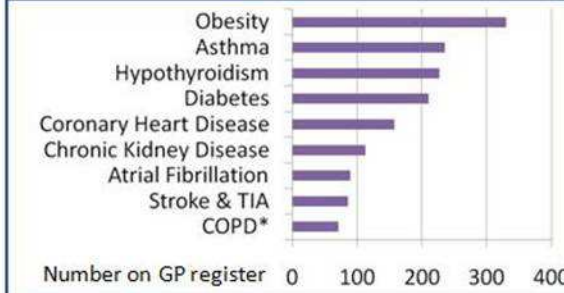

Health Conditions and Life Expectancy

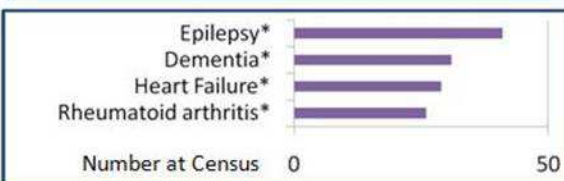

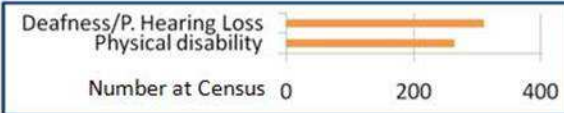

Number of People with Different Conditions

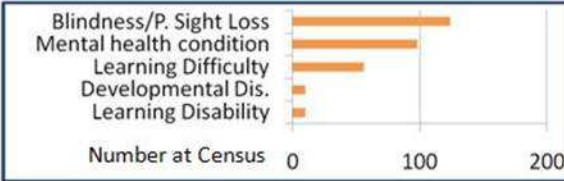

Hypertension

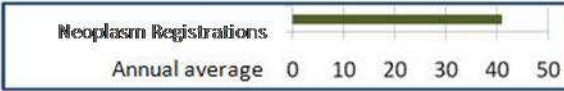

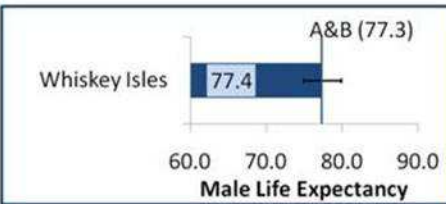

Summary: Conditions which occur often, and with which a person can live for a long time, are common. Many common conditions have similar lifestyle risk factors. Conditions have different care needs.

Be aware that: GP data only include people registered at the GP practices with the condition and may underestimate numbers with conditions. *Data suppressed from one GP practice due to small numbers. People may be on more than one register. Data from census are self-reported.

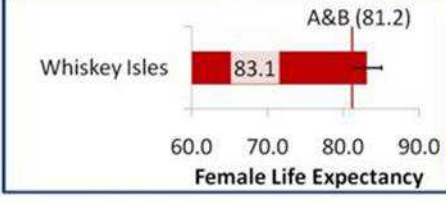

Source: GP: NHS National Services Scotland QOF data 2013/14, Census 2011: National Records of Scotland. Data best-fit of 2001 datazones. Annual Cancer registrations (average 2012-2014): NHS National Services Scotland.

Life Expectancy

Male Life Expectancy

Female Life Expectancy

Summary: Life expectancy is lower for males than females. Female life expectancy is higher than for Argyll and Bute as a whole.

Be aware that: Data based on 2001 Intermediate Geographies. Colonsay is included in this data. Source: ScotPHO Health and Wellbeing Profile. Data from 2009-2013. Easdale and the Slate islands are included in this data.

Multimorbidity - More Than One Condition

- Multimorbidity means having more than one long-term condition.
- Levels of multimorbidity have been estimated for Scotland as a whole (Barnett et. al. 2012).

- Multimorbidity is more common with increasing age but the total number of people with multimorbidity and aged under 65 is higher than the total number aged 65+
- Multimorbidity starts 10-15 years earlier in most deprived compared to least deprived areas

Health and Social Care Risk Behaviours

Alcohol Related Hospital Stays

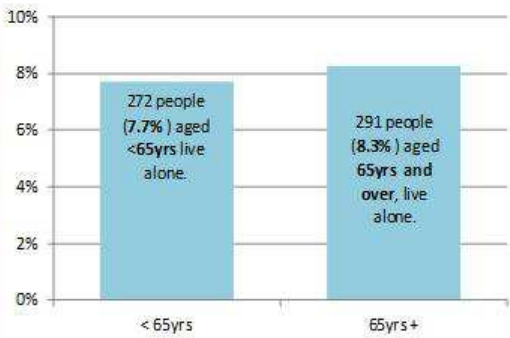

Summary: Rates of Alcohol-related hospital stays in the Whiskey Isles (Islay, Jura, Colonsay, Easdale & Slate Islands) are in line with the Argyll & Bute and Scottish averages. Data for Islay & Jura alone is not available. Many of these Alcohol-related hospital stays could be prevented.

Definition: General acute inpatient and day case stays with a diagnosis of alcohol misuse in any diagnostic position: number and directly age-sex standardised rate per 100,000 population. Data based on 2001 Intermediate Geographies.

Source: Scottish Public Health Observatory (ScotPHO), 2013/14 financial year. CI 95%.

Isolation

Single Households

Summary: People living alone may be at risk of social isolation.

Source: Scotland Census 2011. % of people living in households. Data best-fit of 2001 datazones to locality area (i.e. 'Islay, Jura & Colonsay'. Not possible to extract Islay & Jura alone).

Physical Activity

A source for data on physical activity for Islay & Jura residents was not available. The following relates to Scotland as a whole.

Results from the Scottish Health Survey estimate that people age 16+ spend an average of 5.75hrs sedentary per day.
